Swarm Intelligence Applications for the Cities of the Future Leonor Marques Mano Domingos,Maria José Sousa,2025-03-13 This book explores the transformative power of swarm intelligence and digital innovations in shaping the cities of the future. It presents a comprehensive analysis of how social learning, citizen engagement, advanced technology, design, construction, planning and public policies converge to create cities that are sustainable, resilient, and inclusive. The initial chapters stress the importance of collective intelligence in urban development, using technologies like Virtual Reality to increase citizen participation and democratise decision-making. Public policies play a key role in driving the digital transformation needed for greener cities, with frameworks and tools to enhance transparency and accountability. Digital technologies in policymaking ensure that policies are adaptive, data-driven, and responsive to real-time challenges. Internet of Things systems are explored for their role in improving public safety, urban resilience, and energy efficiency through digital twins, blockchain, and sensor networks. Swarm intelligence is highlighted for optimising energy management, reducing consumption, and promoting renewable resources. Healthcare integration into urban planning and sustainability is also discussed, with a comparative analysis of cities showing how tech innovation enhances resilience against climate change. Swarm intelligence beyond cities is also explored, such as for disaster response, healthcare, environmental conservation, and agriculture. Autonomous systems like drones and nanobots are shown to improve efficiency across various sectors. Overall, this book advocates for a holistic approach to urban development, integrating digital technologies and collective intelligence to create cities that are technologically advanced, socially equitable, and environmentally sustainable.

Probability, Statistics and Life Cycle Assessment Reinout Heijungs, 2024-05-20 This textbook discusses the use of uncertainty analysis and sensitivity analysis in environmental life cycle assessment (LCA). This is a topic which has received a lot of attention by journals, including the leading (Springer) International Journal of Life Cycle Assessment. Despite its importance, no coherent textbook exists that summarizes the progress that has been made in the last 20 years. This book attempts to fill that gap. Its audience is practitioners (professional and academic) of LCA, teachers, and Ph.D. students. It gives a very broad overview of the field: probability theory, descriptive statistics, inferential statistics, error analysis, sensitivity analysis, decision theory, etc., all in relation to LCA. Much effort has been taken to give a balanced overview, with a uniform terminology and mathematical notation.

Environmental Assessment of Lightweight Electric Vehicles Patricia Egede, 2016-07-25 This monograph addresses the challenge of the environmental assessment of lightweight electric vehicles. It poses the question whether the use of lightweight materials in electric vehicles can reduce the vehicles' environmental impact and compares the environmental performance of a lightweight electric vehicle (LEV) to other types of vehicles. The topical approach focuses on methods from life cycle assessment (LCA), and the book concludes with a comprehensive concept on the environmental assessment of LEVs. The target audience primarily comprises LCA practitioners from research institutes and industry, but it may also be beneficial for graduate students specializing in the field of environmental assessment.

Life Cycle Assessment (LCA) Walter Klöpffer, Birgit Grahl, 2014-05-19 This first hands-on guide to ISO-compliant Life Cycle Assessment (LCA) makes this powerful tool immediately accessible to both professionals and students. Following a general introduction on the philosophy and purpose of LCA, the reader is taken through all the stages of a complete LCA analysis, with each step exemplified by real-life data from a major LCA project on beverage packaging. Measures as carbon and water footprint, based on the most recent international standards and definitions, are addressed. Written by two pioneers of LCA, this practical volume is targeted at first-time LCA users but equally makes a much-valued reference for more experienced practitioners. From the content: * Goal and Scope Definition * Life Cycle Inventory Analysis * Life Cycle

Impact Assessment * Interpretation, Reporting and Critical Review * From LCA to Sustainability Assessment and more.

Interpretation, Critical Review and Reporting in Life Cycle Assessment Mary Ann Curran, 2023-09-26 This book discusses the phase “Interpretation” in an outstanding way. According to the opinio communis within the LCA community, “Interpretation” is classified as fourth phase of the LCA framework. However, referring to ISO 14040, this book defines “Interpretation” according to its function in the LCA framework, and this means that “Interpretation has a much broader influence than generally accepted. It overarches goal and scope, inventory analysis and impact assessment. Conclusions are drawn from the results of the inventory and the impact assessment, and recommendations refer to the objective of the study, the goal and scope phase. Likewise to be considered are the defined framework conditions, the reasons for carrying out the study as well as the context of the intended applications and the target groups of the results). A second highlight of this book concerns “Interpretation” as discussed in conjunction with Critical Review and Reporting, which is an outstanding approach. The relationship between interpretation and critical review can be seen in the fact that interpretation is a kind of structured preparation of a critical review; in practice, the performance of a critical review can be made much easier if the preparers of a life cycle assessment study very carefully follow the requirements that are specifically placed on the interpretation. Because the critical review is the independent quality control of an LCA, the results improve the credibility of reporting. The critical review helps to avoid text weaknesses and potential misunderstandings because these aspects will easier be realized by independent readers from different viewpoints. The reviewers thus also represent the first readership of a study and can help to ensure that the specific requirements for good and clear reporting of life cycle assessments are met. Sound reporting needs clear conclusions.

Eco-efficient Construction and Building Materials Fernando Pacheco-Torgal, Luisa F. Cabeza, Joao Labrincha, Aldo Giuntini de Magalhaes, 2014-02-14 Eco-efficient Construction and Building Materials reviews ways of assessing the environmental impact of construction and building materials. Quantification and qualification of the environmental impacts of milk processing in The Republic of Armenia using Life Cycle Assessment methodology with particular focus on product- and process-related quality attributes Sonika Aminforoughi, 2015-03-06 Environmental Life Cycle Assessment (ELCA) is a young, but, increasingly a well-known technique, to assess the environmental impacts associated with products. In this dissertation thesis, a product-/process-related ELCA for a typical Armenian dairy factory has been performed. Here, the environmental impacts associated with the manufacturing processes of selected dairy products have been investigated. The production of raw milk at the supplier dairy farm and the disposal of the solid waste and waste water incurred during production and processing have been considered as well. Due to

the multi-functional nature of dairy factories, an allocation procedure according to the calorific value of each product under assessment has been conducted. In order to execute the ELCA, the software SimaPro has been used. As the methodology for Life Cycle Impact Assessment, the ReCiPe Midpoint method has been applied. Inventory, characterization, normalization, contribution, and sensitivity analyses have been carried out accordingly. The results of these analyses have determined the significant impact categories by each analyzed product and the products with the greatest environmental impacts. Furthermore, the “hotspots” of the processes have been determined. Ökologische Lebenszyklusanalyse (Ökobilanz) ist eine junge, jedoch inzwischen eine gut bekannte Methode zur Untersuchung der Umweltauswirkungen der Produkte. Im Rahmen dieser Dissertation wurde eine produkt-/prozessbezogene Lebenszyklusanalyse für eine typische armenische Molkerei durchgeführt. Hierbei wurden die Umweltauswirkungen der Herstellungsprozesse ausgewählter Molkereiprodukte untersucht. Die Rohmilchproduktion in der Lieferfarm und die Entsorgung der anfallenden Produktionsabfälle und -abwässer wurden gleichfalls betrachtet. Wegen der multifunktionalen Natur der Molkereien wurde ein Allokationsverfahren basierend auf dem Brennwert jedes untersuchten Produktes durchgeführt. Um die ökologische Lebenszyklusanalyse durchzuführen, wurde die Software SimaPro verwendet. Die Methode ReCiPe Midpoint wurde als Methode der Wirkungsabschätzung verwendet. Dementsprechend wurden Inventory-, Wirkungsabschätzungs-, Normalisierungs-, Beitrags- und Sensitivitätsanalysen durchgeführt. Ergebnisse dieser Analysen haben die signifikanten Umweltkategorien bei jedem untersuchten Produkt und die Produkte mit den höchsten Umweltauswirkungen identifiziert. Darüber hinaus wurden die „Hotspots“ der Prozesse festgestellt.

Circular Economy and Sustainability Alexandros Stefanakis, Ioannis Nikolaou, 2021-09-14 The concept of circular economy is based on strategies, practices, policies, and technologies to achieve principles related to reusing, recycling, redesigning, repurposing, remanufacturing, refurbishing, and recovering water, waste materials, and nutrients to preserve natural resources. It provides the necessary conditions to encourage economic and social actors to adopt strategies toward sustainability. However, the increasing complexity of sustainability aspects means that traditional engineering and management/economics alone cannot face the new challenges and reach the appropriate solutions. Thus, this book highlights the role of engineering and management in building a sustainable society by developing a circular economy that establishes and protects strong social and cultural structures based on cross-disciplinary knowledge and diverse skills. It includes theoretical justification, research studies, and case studies to provide researchers, practitioners, professionals, and policymakers the appropriate context to work together in promoting sustainability and circular economy thinking. Volume 1, Circular Economy and Sustainability: Management and Policy, discusses the content of circular economy principles and how they can be realized in the fields of economy, management, and policy. It gives an outline of the current status and perception of circular economy at the micro-, meso-, and macro-levels to provide a better understanding of its role in

achieving sustainability. Volume 2, Circular Economy and Sustainability: Environmental Engineering, presents various technological and developmental tools that emphasize the implementation of these principles in practice (micro-level). It demonstrates the necessity to establish a fundamental connection between sustainable engineering and circular economy. - Presents a novel approach, linking circular economy concepts to environmental engineering and management to promote sustainability goals in modern societies - Approaches the topic on production and consumption at both the micro and macro levels, integrating principles with practice - Offers a range of theoretical and foundational knowledge in addition to case studies that demonstrate the potential impact of circular economy principles on both economic and societal progress

An Environmental Life Cycle Approach to Design John Cays, 2020-12-19 This book introduces readers to Life Cycle Approach (LCA)-supported design solutions, through non-geometric-data-driven methodologies, to provide a clear picture of how to optimize individual designs in addressing ecological challenges. By offering LCA, the book gives designers a complimentary set of science-based perspectives and techniques with a focus on high data quality for clarity and public accessibility. While most design solutions and resources are meant to appeal to people by solving everyday problems, this book uses LCA designs to appeal to people through a combination of practicality, accuracy, and the need to decelerate ecological destruction through products offered to marketplace consumers. In essence, the book teaches designers how to craft environmentally responsive designs for their clients at little to no extra cost, but with necessary ecological benefits. The book analyzes the human desire for consumption, and suggests design innovations for promoting best practices. LCA tools, data, and methodologies are explained and offered as these potential innovations for affecting positive environmental change. As an underlying component of LCA, the book defines the energy essentials related to environmental problems, and how LCA design solutions must address these factors while also appealing to a designated client-base. The book also teaches designers how to consider corporate incentives for trusting LCA designs, such as investor confidence, loyalty, and consumer trust. The book will appeal to a broad range of designers interested in sustainable and data-driven design, and may be utilized by non-LCA specialists in expanding their design perspectives and goals in the marketplace.
