Hidden Figures Margot Lee Shetterly, 2016 The true story of the black female mathematicians at NASA whose calculations helped fuel some of America's greatest achievements in space.

Hidden Figures Young Readers' Edition Margot Lee Shetterly, 2016-11-29 The uplifting, amazing true story—a New York Times bestseller! This edition of Margot Lee Shetterly's acclaimed book is perfect for young readers. It's the powerful story of four African-American female mathematicians at NASA who helped achieve some of the greatest moments in our space program. Before John Glenn orbited the earth, or Neil Armstrong walked on the moon, a group of dedicated female mathematicians known as "human computers" used pencils, slide rules, and adding machines to calculate the numbers that would launch rockets, and astronauts, into space. This book brings to life the stories of Dorothy Vaughan, Mary Jackson, Katherine Johnson, and Christine Darden, who lived through the Civil Rights era, the Space Race, the Cold War, and the movement for gender equality, and whose work forever changed the face of NASA and the country.

It focuses particularly on black women who served as human computers as they performed calculations at Langley Air Force Base in Virginia during and after World War II. During the war, the United States was desperate for mathematicians and engineers to work in aeronautics. With many men fighting in the war, women took on professional jobs. A number of black women applied for positions at Langley. Among them was Dorothy Vaughan, who had excelled in mathematics as a young woman and had then gone into teaching. Pay in segregated schools was much less than Vaughan could make as a human computer performing calculations for engineers. So she changed careers... Start Publishing Notes' Summary, Analysis, and Review of Margot Lee Shetterly's Hidden Figures: The American Dream and the Untold Story of the Black Women Mathematicians Who Helped Win the Space Race includes a summary of the book, review, analysis & key takeaways, and detailed About the Author section. PREVIEW: Hidden Figures begins with a prologue recounting author Margot Lee Shetterly's childhood in Hampton, Virginia. Her father worked for National Aeronautics and Space Administration's (NASA) Langley Research Center, and Shetterly was surrounded by an upwardly mobile black community. Given her father's job as a climate scientist and the similarly successful lives of her extended family, Shetterly experienced a comfortable middle class upbringing removed from the palpable pain and strife that has engulfed so many other black communities in America. As she writes, Shetterly knew so many African Americans working in science, math, and engineering that I thought that's just what black folks did. As Shetterly grew up and left Hampton, she became fascinated by the people she had grown up with and the individuals her father had once mentioned in passing. The popular conception of NASA was that of an organization staffed almost uniformly by white men; so who were the people that Shetterly's father had worked with, and where were they now?

Hidden Figures, Mit 1 Audio-CD Margot Lee Shetterly, 2020-06-23

Hidden Figures Margot Lee Shetterly, 2016 Before John Glenn orbited the Earth or Neil Armstrong walked on the moon, a group of professionals worked as Human Computers, calculating the flight paths that would enable these historic achievements. Among these were a coterie of bright, talented African-American women. Segregated from their white counterparts by Jim Crow laws, these colored computers, as they were known, used slide rules, adding machines, and pencil and paper to support America's fledgling aeronautics industry, and helped write the equations that would launch rockets, and astronauts, into space. Drawing on the oral histories of scores of these computers, personal recollections, interviews with NASA executives and engineers, archival documents, correspondence, and reporting from the era, *Hidden Figures* recalls America's greatest adventure and NASA's groundbreaking successes through the experiences of five spunky, courageous, intelligent, determined, and patriotic women: Dorothy Vaughan, Mary Jackson, Katherine Johnson, Christine Darden, and Gloria Champine. Moving from World War II through NASA's golden age, touching on the civil rights era, the Space Race, the Cold War, and the women's rights movement, *Hidden Figures* interweaves a history of scientific achievement and technological innovation with the intimate stories of five women whose work forever changed the world -- and whose lives show how out of one of America's most painful histories came one of its proudest moments.

Hidden Figures Margot Lee Shetterly, 2016-09-06 The #1 New York Times bestseller The phenomenal true story of the black female mathematicians at NASA whose calculations helped fuel some of America's greatest achievements in space. Soon to be a major motion picture starring Taraji P. Henson, Octavia Spencer, Janelle Monae, Kirsten Dunst, and Kevin Costner. Before John Glenn orbited the earth, or Neil Armstrong walked on the moon, a group of dedicated female mathematicians known as "human computers" used pencils, slide rules and adding machines to calculate the numbers that would launch rockets, and astronauts, into space. Among these problem-solvers were a group of exceptionally talented African American women, some of the brightest minds of their generation. Originally relegated to teaching math in the South's segregated public schools, they were called into service during the labor shortages of World War II, when America's aeronautics industry was in dire need of anyone who had the right stuff. Suddenly, these overlooked math whizzes had a shot at jobs worthy of their skills, and they answered Uncle Sam's call, moving to Hampton, Virginia and the fascinating, high-energy world of the Langley Memorial Aeronautical Laboratory. Even as Virginia's Jim Crow laws required them to be segregated from their white counterparts, the women of Langley's all-black "West Computing" group helped America achieve one of the things it desired most: a decisive victory over the Soviet Union in the Cold War, and complete domination of the heavens. Starting in World War II and moving through to the Cold War, the Civil Rights Movement and the Space Race, *Hidden Figures* follows the interwoven accounts of Dorothy Vaughan, Mary Jackson, Katherine Johnson and Christine Darden, four African American women who participated in some of NASA's greatest successes. It chronicles their careers over nearly three decades they faced challenges, forged alliances and used their intellect to change their own lives, and their

country's future.

Hidden Figures Margot Lee Shetterly, 2022-05-12 SOON TO BE A MAJOR MOTION PICTURE The #1 New York Times Bestseller Set amid the civil rights movement, the never-before-told true story of NASA's African-American female mathematicians who played a crucial role in America's space program. Before Neil Armstrong walked on the moon, a group of professionals worked as 'Human Computers', calculating the flight paths that would enable these historic achievements. Among these were a coterie of bright, talented African-American women. Segregated from their white counterparts, these 'coloured computers' used pencil and paper to write the equations that would launch rockets, and astronauts, into space. Moving from World War II through NASA's golden age, touching on the civil rights era, the Space Race, the Cold War, and the women's rights movement, 'Hidden Figures' interweaves a rich history of mankind's greatest adventure with the intimate stories of five courageous women whose work forever changed the world.

Summary of Hidden Figures by Margot Lee Shetterly The Summary Guy, 2017-06-30 Hidden Figures: A Complete Summary Hidden Figures is an autobiography about African-American women who greatly contributed to the US winning the space race. Back in the 1940s, women began joining the workforce because there was great lack of workers due to the many men who were fighting in the Second World War. There was one place that was in desperate need of intelligent and hard-working people. That place was NACA. Many African-American women applied for the jobs there with different levels of success. Some women succeeded in laying down entry-level jobs in engineering positions, while several of them ended up

contributing to the American launch that sent the first man to the moon. As we read the book, we can see that the author organized every chapter in a somewhat loose chronological order, and that every chapter is based around a central theme. The book could be a problem if the reader does not possess adequate knowledge about rocket science. But those who continue reading will find that this is an inspiring story. Here Is A Preview of What You Will Get: - A summarized version of the book. - You will find the book analyzed to further strengthen your knowledge. - Fun multiple-choice quizzes, along with answers to help you learn about the book. Hidden Figures Margot Lee Shetterly,2018-01-16 Based on the New York Times bestselling book and the Academy Award-nominated movie, author Margot Lee Shetterly and illustrator Laura Freeman bring the incredibly inspiring true story of four black women who helped NASA launch men into space to picture book readers! Dorothy Vaughan, Mary Jackson, Katherine Johnson, and Christine Darden were good at math...really good. They participated in some of NASA's greatest successes, like providing the calculations for America's first journeys into space. And they did so during a time when being black and a woman limited what they could do. But they worked hard. They persisted. And they used their genius minds to

change the world. In this beautifully illustrated picture book edition, we explore the story of four female African American mathematicians at NASA, known as colored computers, and how they overcame gender and racial barriers to succeed in a highly challenging STEM-based career. Finally, the extraordinary lives of four African American women who helped NASA put the first men in space is available for picture book readers, proclaims Brightly in their article 18 Must-Read Picture Books of 2018. Will inspire girls and boys alike to love math, believe in themselves, and reach for the stars.

The Excellent Mind Nathan L. King, 2021-02-19 Nathan L. King's *The Excellent Mind* considers the importance of the intellectual virtues: the character traits of excellent thinkers. He explains what it means to have an excellent mind: one that is curious, careful, self-reliant, humble, honest, persevering, courageous, open, firm, and wise. Drawing from recent literature in philosophy and psychology, he considers what these virtues are like in practice, why they are important, and how we grow in them. King also argues that despite their label, these virtues are not just for intellectuals: they are for everyone. He shows how intellectual virtues are critical to living everyday life, in areas as diverse as personal relationships, responsible citizenship, civil discourse, personal success, and education. Filled with vivid examples and relevant applications, *The Excellent Mind* will serve as an engaging introduction to the intellectual virtues for students and anyone interested in the topic.
