50 Years on the Bodhisattva Path(菩提道) Shih Cheng Yen,2019-01-01 Tzu Chi Merit Association, founded in 1966, is the starting point of Tzu Chi's charity work. With the vision and mission of "for Buddha's teachings, for sentient beings," Dharma Master Cheng Yen resolutely led Tzu Chi volunteers to serve society. They give with loving-kindness without regrets, compassion without resentment, joy without worries, and equanimity without expectations. The development of Tzu Chi over the last fifty years embodies a model of charity work in Buddhism. Master Cheng Yen encourages her disciples to persist diligently to walk the Bodhisattva-path, take the Buddha's heart as their own with gratitude for everything, take their teacher's mission as their own, and help all sentient beings. Saving the world begins with saving people's hearts. When we light the lamp in our own hearts, we can gather the power of great love from many people and bring infinite light to the world, leading to many fifty years to come.

Postharvest Extension and Capacity Building for the Developing World Majeed Mohammed,Vijay Yadav
Tokala,2018-12-07 It is estimated that around 1.3 billion tons per year of food produced for human consumption, which is about one-third of all food produced, is either lost or wasted globally. Reduction of the postharvest losses is being considered as one of the sustainable ways to ensure world food security. Postharvest Extension and Capacity Building for the Developing World provides information on postharvest extension/outreach programs, capacity building, and practical methodologies for postharvest extension professionals and food science teachers, food processing trainers, and outreach specialists who work in the field. The book provides information on training of postharvest trainers, food loss assessment methods, capacity building in universities and agro-industry, distance education methods, models for cost effective postharvest/food processing extension work, success stories, and lessons learned from past projects and programs. The book is divided into four sections.

Section I explains postharvest loss assessments methods, Section II is on capacity building, and Sections III and IV focus on training and postharvest extension models. Food loss assessment methodologies are highlighted from several high-profile institutions and it is envisioned that researchers and postharvest extension personnel will benefit from the development and field testing of a hybrid methodology, incorporating the strengths and utilizing the best practices from each of the methodologies in current use. Chapters cover postharvest extension work and capacity building in a wide range of regions.
