Karin Nielsen-Saines

Megaliths of the World Luc Laporte,Jean-Marc Large,Laurent Nespolous,Chris Scarre,Tara Steimer-Herbet,2022-08-22 Bringing together the latest research on megalithic monuments throughout the world, 150 researchers offer 72 articles, providing a region-by region account in their specialist areas, and a summary of the current state of knowledge. Highlighting salient themes, the book is vital to anyone interested in the phenomenon of megalithic monumentality.

El dolmen de Azután (Toledo) Primitiva Bueno,Rodrigo Balbín Behrmann,Rosa Barroso,2005 El dolmen de Azután es una de las más espectaculares arquitecturas megalíticas de todo el interior peninsular. Las primeras excavaciones dejaron al descubierto una gran cámara de cinco metros de diámetro con corredor y un enorme túmulo muy bien conservado, que contribuye a destacar el volumen de la sepultura datada por CI4 a partir del V milenio cal BC. Las recientes investigaciones certifican la antigüedad de la magnífica construcción, su uso continuado hasta el III milenio cal BC, la profusión de su decoración y la realidad de un doblamiento anexo. Habitat y contextos funerarios configuran un espacio multifuncional en el que los ancestros actúan como el elemento aglutinador. Es la posición de los enterramientos la que indica la situación de los grupos en los territorios utilizados por las culturas productoras desde el Neolítico Medio en adelante.

The Megalithic Architectures of Europe Luc Laporte,Chris Scarre,2015-12-31 Megalithic monuments are among the most striking remains of the Neolithic period of northern and western Europe and are scattered across landscapes from Pomerania to Portugal. Antiquarians and archaeologists early recognized the family resemblance of the different groups of tombs, attributing them to maritime peoples moving along the western seaways. More recent research sees them rather as the product of established early farming communities in their individual regions. Yet the diversity of the tombs, their chronologies and their varied cultural contexts complicates any straightforward understanding of their origins and distribution. Megalithic Architectures provides new insight by focusing on the construction and design of European megalithic tombs – on the tomb as an architectural project. It shows how much is to be learned from detailed attention to the stages and the techniques through which tombs were built, modified and enlarged, and often intentionally dismantled or decommissioned. The large slabs that were employed, often unshaped, may suggest an opportunistic approach by the

Neolithic builders, but this was clearly far from the case. Each building project was unique, and detailed study of individual sites exposes the way in which tombs were built as architectural, social and symbolic undertakings. Alongside the manner in which the materials were used, it reveals a store of knowledge that sometimes differed considerably from one structure to another, even between contemporary monuments within a single region. The volume brings together regional specialists from Scandinavia, Germany, Britain, France, Belgium and Iberia to offer a series of uniquely authoritative studies. Results of recent fieldwork are fully incorporated and much of the material is published here for the first time in English. It provides an invaluable overview of the current state of research on European megalithic tombs.

The Archaeology of 'Underdog Sites' in the Douro Valley Santiago Sánchez de la Parra-Pérez,Sonia Díaz-Navarro,Javier Fernández-Lozano,Javier Jiménez Gadea,2021-07-08 This volume brings together the best presentations from the 8th and 9th Archaeology of the Douro Valley meetings, held in Ávila (2018) and Astorga (2019). Papers aim to show the importance of projects that have been left in the background despite obtaining interesting archaeological data about the occupation of this valley and its evolution.

Historia de una cultura: Castilla y León Agustín García Simón,José Ortega Valcárcel,1995

Archaeology in the River Duero Valley Jose Carlos Sastre Blanco,Patricia Fuentes Melgar,Óscar Rodríguez-Monterrubio,2018-10-19 From Prehistory to the Middle Ages, from the Spanish mainland to the Portuguese Atlantic Coast, the Duero (or Douro as it is known in English because of its Portuguese translation) has served as a river of great historical importance. It is a river flowing from the past into the future with the legacy of the Homo Antecessor and the most ancient remains of European Prehistory, showcasing the first samples of inland farming during the Iberian Neolithic period and many examples of Schematic Rock Art. Before the total obliteration of archaeological sites in the Duero valley due to active agricultural labours and the course of time itself, the Archaeological and Protohistoric Society of Zamora, Zamoraprotohistórica, leads a programme of researching activities to preserve this heritage and to keep it safe for future generations. In order to accomplish this, the association organises a cycle of conferences, lectures and meetings gathering local, national and international archaeologists and historians in a dynamic and vibrant exchange of knowledge. This volume is a compilation of the most remarkable interventions in those meetings, and each paper gathered here represents a unique reflection on the history of the river.

La Prehistoria en la península Ibérica López García, Pilar,2017-01-01 El presente volumen es el resultado de la colaboración interdisciplinar de un grupo de los más destacados especialistas en el estudio de la Prehistoria peninsular, que han combinado los más actuales conocimientos científicos sobre el tema para ofrecer una visión holística de un pasado que no siempre se interpreta exclusivamente a través de la cultura material. El resultado es una obra completamente distinta a las hasta el momento publicadas, que se aleja de una presentación meramente cronológica al permitir una lectura más temática, sin necesidad de tener que leer capítulo tras capítulo para la comprensión de un periodo tan amplio como el que nos ocupa. A lo largo de sus páginas se analizan aspectos como la evolución humana, el paisaje, la alimentación, el desarrollo de la agricultura y la ganadería, así como el arte, desde el Paleolítico hasta el Bronce Medio.

El megalitismo en Cantabria Luis César Teira Mayolini,2016-03-15 Reedición, en versión digital, de esta obra que supone la primera valoración global de la documentación arqueológica disponible acerca de una región como Cantabria, con una amplia tradición de trabajos paleolíticos, donde el análisis de las arquitecturas funerarias, de hace unos 6.000 años, sólo se había abordado de forma ocasional y a partir de presupuestos poco sistemáticos.
