Photography and Italy Maria Antonella Pelizzari, 2010-11-15 In this beautifully illustrated book Maria Antonella Pelizzari traces the history of photography in Italy from its beginnings to the present as she guides us through the history of Italy and its ancient sites and Renaissance landmarks. Pelizzari specifically considers the role of photography in the formation of Italian national identity during times of political struggle, such as the lead up to Unification in 1860, and later in the nationalist wars of Mussolini's regime. While many Italians and foreigners— such as Fratelli Alinari or Carlo Ponti, John Ruskin or Kit Talbot—focused their lenses on architectural masterpieces, others documented the changing times and political heroes, creating icons of figures such as Garibaldi and the brigands. Pelizzari's exploration of Italian visual traditions also includes the photographic collages of Bruno Munari, the neorealist work of photographers such as Franco Pinna, the bold stylized compositions of Mario Giacomelli, and the controversial images created by Oliviero Toscani for Benetton advertising in the 1980s. Featuring unpublished works and a rare selection of over one hundred images, this book will appeal to art collectors and students of art history and Italian culture.

Encyclopedia of Nineteenth-Century Photography John Hannavy, 2013-12-16 The Encyclopedia of Nineteenth-Century Photography is the first comprehensive encyclopedia of world photography up to the beginning of the twentieth century. It sets out to be the standard, definitive reference work on the subject for years to come. Its coverage is global – an important 'first' in that authorities from all over the world have contributed their expertise and scholarship towards making this a truly comprehensive publication. The Encyclopedia presents new and ground-breaking research alongside accounts of the major established figures in the nineteenth century arena. Coverage includes all the key people, processes, equipment, movements, styles, debates and groupings which helped photography develop from being 'a solution in search of a problem'

when first invented, to the essential communication tool, creative medium, and recorder of everyday life which it had become by the dawn of the twentieth century. The sheer breadth of coverage in the 1200 essays makes the Encyclopedia of Nineteenth-Century Photography an essential reference source for academics, students, researchers and libraries worldwide.

Imaging History Bruno Vandermeulen,Danny Veys,2011 In archaeology, photography is mainly used as a technique for gathering data and evidence. Within the framework of the research project '(in)site, site-specific photography revisited' the relationship between photography and archaeology, or broader, history is explored. How do photographers visualize history? What is the importance of place, particularly the place that remains after the event took place? How do photographers or artists use photography to depict the past, when time has become 'past time'? These articles and portfolios explore, both on practical and theoretical level, how history can be captured. The research project is an attempt to redefine the traditional relationship between archaeology and photography in order to produce new forms of image-making more adapted to contemporary visual culture. The project considers photography as a practice in which a picture is shaped and constructed by the photographer, not a practice in which a picture is mechanically taken.

Jazz e Foto Guido Michelone,

Fotografia e culture visuali del XXI secolo Enrico Menduni,Lorenzo Marmo,2018-03-01 Obiettivo del volume è quello di indagare la centralità della fotografia all'interno dei regimi scopici della modernità, oltrepassando le singole specificità mediali per mettere pienamente in luce il carattere interdisciplinare della visualità. Si è cercato di conciliare la riflessione teorica con l'approccio storico-culturale, e ci si è focalizzati in particolare sull'Italia e sulla situazione degli studi in questo paese, anche con lo scopo di compiere una riflessione sul ruolo delle culture visuali nella costituzione dell'identità nazionale, sia individuale sia collettiva.

Pittorialismo e cento anni di fotografia pittorica in Italia Italo Zannier,Monica Maffioli,Angelo Maggi,2004

Italian Humanist Photography from Fascism to the Cold War Martina Caruso,2020-08-19 Spanning four decades of radical political and social change in Italy, this interdisciplinary study explores photography's relationship with Italian painting, film, literature, anthropological research and international photography. Evocative and powerful, Italian social documentary photography from the 1930s to the 1960s is a rich source of cultural history, reflecting a time of dramatic change. This book shows, through a wide range of images (some published for the first time) that to fully understand the photography of this period we must take a more expansive view than scholars have applied to date, considering issues of propaganda, aesthetics, religion, national identity and international influences. By setting Italian photography against a

backdrop of social documentary and giving it a distinctive place in the global history of photography, this exciting volume of original research is of interest to art historians and scholars of Italian and visual culture studies.

A Course on Aesthetics Renato Barilli, 1993 A Course on Aesthetics offers a broad perspective of current scholarship in aesthetics without favouring any one particular school, discipline, or ideology. Written in an elegant and clear style, Barilli's text explores the basic inherent structures of human thought about the classification and evaluation of the arts. Barilli avoids any binding or dogmatic conclusions about artistic assessment in his consideration of both historical and more current art forms such as video and performance art. In doing so, he presents a contemporary account of a scholarly concern. In A Course on Aesthetics, Barilli examines the aesthetic experience in general, the passage from aesthetics to art, the user of art, and the critic. In his brilliant analyses of the phenomenology of various forms of art - from literature to music, from painting to art, from theatre to television - he discusses the relationship between representation and expression, touching on many of the major questions debated in contemporary criticism. A bibliography provides direction for further study of the history of aesthetics as a discipline. Renato Barilli has published numerous books in Italian on poetics, cultural theory, and contemporary art, including *Culturologia e Fenomenologia Degli Stili*, *L'Arte Contemporanea*, and *Il Ciclo Del Postmoderno*. The University of Minnesota Press has also published a translation of his *Rhetoric* (1989). Karen Pinkus is translator of Giorgio Agamben's *Language and Death* (Minnesota, 1991).

Strange Sisters Francesca Orestano, 2009 This collection of essays stems from the conference 'Nineteenth-Century Literature and Aesthetics', which was held at the University of Milan in 2006 and organised by the editors of this volume. The interface between word and image covered in these essays embraces the fields of literature, architecture, painting, photography, music and art criticism. The authors stress the role of aesthetics in a number of contexts ranging from the early 1830s to the fin de siècle and beyond, as far as the last influences of Victorian taste on the early years of the twentieth century. During the nineteenth century the ancient interaction between literature and aesthetics was challenged and criticised by Martineau, Rossetti, Ruskin, Pater, Wilde, Beardsley, Cameron and Carroll, among others: their awareness of the complexity of visual perception problematised the existing categories of realism, artistic conventions, discourse of description, translation and representation. The essays cover almost a century of debate between literature and aesthetics. They focus on the intersection of word and image by emphasising transgressions in art hierarchies, forms and languages, which restyle existing categories and project them into new aesthetic dimensions beyond the conventional idea of the sister arts.

Photography and Its Origins Tanya Sheehan, Andres Zervigon, 2014-11-20 Recent decades have seen a flourishing interest in and speculation about the origins of photography. Spurred by rediscoveries of 'first' photographs and proclamations of

photography's death in the digital age, scholars have been rethinking who and what invented the medium. *Photography and Its Origins* reflects on this interest in photography's beginnings by reframing it in critical and specifically historiographical terms. How and why do we write about the origins of the medium? Whom or what do we rely on to construct those narratives? What's at stake in choosing to tell stories of photography's genesis in one way or another? And what kind of work can those stories do? Edited by Tanya Sheehan and Andrés Mario Zervigón, this collection of 16 original essays, illustrated with 32 colour images, showcases prominent and emerging voices in the field of photography studies. Their research cuts across disciplines and methodologies, shedding new light on old questions about histories and their writing. *Photography and Its Origins* will serve as a valuable resource for students and scholars in art history, visual and media studies, and the history of science and technology.
