"The Writings of James Barry and the Genre of History Painting, 1775-1809" Liam Lenihan, 2017-07-05 Examining the literary career of the eighteenth-century Irish painter James Barry, 1741-1806 through an interdisciplinary methodology, *The Writings of James Barry and the Genre of History Painting, 1775-1809* is the first full-length study of the artist's writings. Liam Lenihan critically assesses the artist's own aesthetic philosophy about painting and printmaking, and reveals the extent to which Barry wrestles with the significant stylistic transformations of the pre-eminent artistic genre of his age: history painting. Lenihan's book delves into the connections between Barry's writings and art, and the cultural and political issues that dominated the public sphere in London during the American and French Revolutions. Barry's writings are read within the context of the political and aesthetic thought of his distinguished friends and contemporaries, such as Edmund Burke, his first patron; Joshua Reynolds, his sometime friend and rival; Mary Wollstonecraft and William Godwin, with whom he was later friends; and his students and adversaries, William Blake and Henry Fuseli. Ultimately, Lenihan's interdisciplinary reading shows the extent to which Barry's faith in the classical tradition in general, and the genre of history painting in particular, is permeated by the hermeneutics of suspicion. This study explores and contextualizes Barry's attempt to rethink and remake the preeminent art form of his era.

**The History of Art in Song, Liao, Jin and Xixia of Dynasty** Li Shi, The book is the volume of "The History of Art in Song, Liao, Jin and Xixia of Dynasty " among a series of books of "Deep into China Histories". The earliest known written records of the history of China date from as early as 1250 BC, from the Shang dynasty (c. 1600-1046 BC) and the Bamboo Annals (296 BC) describe a Xia dynasty (c. 2070-1600 BC) before the Shang, but no writing is known from the period The Shang ruled in the Yellow River valley, which is commonly held to be the cradle of Chinese civilization. However, Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River. These Yellow River and Yangtze civilizations arose millennia before the Shang. With thousands of years of continuous history, China is one of the world's oldest civilizations, and is regarded as one of the cradles of civilization. The Zhou dynasty (1046-256 BC) supplanted

the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC, and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature and philosophy first developed during those troubled times. In 221 BC Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or emperor of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death, and was supplanted by the longer-lived Han dynasty (206 BC - 220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men, well-versed in calligraphy, history, literature, and philosophy, were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644-1912), which was replaced by the Republic of China in 1912, and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace, and periods of war and failed statehood - the most recent being the Chinese Civil War (1927-1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China; in some eras control stretched as far as Xinjiang and Tibet, as at present. Traditional culture, and influences from other parts of Asia and the Western world (carried by waves of immigration, cultural assimilation, expansion, and foreign contact), form the basis of the modern culture of China.

Jacob Burckhardt and the Crisis of Modernity John R. Hinde, 2000-06-28 As a historian of the Renaissance and the rise of Christianity, Burckhardt was concerned with periods of social, political, and cultural transformation. Writing in the aftermath of the 1848 Revolutions and in the long shadow cast by the French Revolution of 1789, he observed the rise of industrial capitalism and mass politics with trepidation. He especially lamented the fate of the individual, whose creativity had shaped the glories of the Renaissance and ancient Greece but who was increasingly domesticated and commodified in modern society. Unlike conventional accounts, which characterize him as an apolitical aesthete, Hinde shows us that Burckhardt was

as a thinker of profound importance whose conservative anti-modernism ranks him with his colleague Friedrich Nietzsche.
