As only the 10^x with x being a multiple of 3 get their own names, you read 100,000,000,000,000,000,000 as 100×10^{18} , so this is 100 quintillion in American and British English and ... **Is it proper to state percentages greater than 100%? [closed]** People often say that percentages greater than 100 make no sense because you can't have more than all of something. This is simply silly and mathematically ignorant. However, I often see where those who are dealing with financing (banks and investment houses for bonds) use the MM for millions of dollars. That being said, I think the most appropriate usage is using one alpha symbol consistently so that ... "6-foot tall" or "6-feet tall"? - *English Language Learners Stack* ... I have heard/seen people say/write "She is 5 feet 10 inches tall" and "She is 5-foot-10." But in formal writing, is there a convention? I found both "8-foot-tall" and "nine-feet tall" in online sou... **Correct usage of lbs. as in "pounds" of weight** May 4, 2013 · Assuming it's not casual usage, I'd recommend "All items over five pounds are excluded," instead. Most style guides recommend spelling out numbers of ten or less, and in such a case I'd spell out the unit, too. "a 100" vs "100" - *English Language & Usage Stack Exchange* Aug 24, 2016 · The flow rate increases 100-fold (one hundred-fold) Would be a more idiomatic way of saying this, however, the questioner asks specifically about the original phrasing. The above Ngram search would suggest that a one hundred has always been less frequently used in written language and as such should probably be avoided.
