Norman L. Keltner, Lee Hilyard Schwecke, Carol E. Bostrom

Occupational Therapy in Mental Health Catana Brown, Virginia C Stoffel, Jaime Munoz, 2019-02-05 This revision of a well-loved text continues to embrace the confluence of person, environment, and occupation in mental health as its organizing theoretical model, emphasizing the lived experience of mental illness and recovery. Rely on this groundbreaking text to guide you through an evidence-based approach to helping clients with mental health disorders on their recovery journey by participating in meaningful occupations. Understand the recovery process for all areas of their lives—physical, emotional, spiritual, and mental—and know how to manage co-occurring conditions.

Nurse as Educator Susan Bacorn Bastable, 2014 Nurse as Educator: Principles of Teaching and Learning for Nursing Practice, Fourth Edition prepares nurse educators, clinical nurse specialists, and nurse practitioners for their ever-increasing role in patient teaching, health education, health promotion, and nursing education. This text can be used in undergraduate or even graduate courses; one of the strengths of this text is that it is written in a style that enables students to easily understand new concepts and readily apply them. Other strong features include coverage of the motivational and sociocultural differences that affect teaching and learning. The Fourth Edition of this best-selling text has been updated and revised to include the latest research and data in the field of nurse education. Nurse as Educator: Principles of Teaching and Learning for Nursing Practice, Fourth Edition is the text of choice in nursing education courses and programs, as well as for institutional and community-based settings. The text includes access to the Navigate Companion Website for students which features engaging learning tools. Updates to the new edition include discussion of the following: The IOM's new report The Future of Nursing: Leading Change Advancing Health New material on how to teach motor skill learning National Action Plan around health literacy New content on the transgender population Updated formulas to measure patient health literacy Completely revised chapter on Educating Learners with Disabilities This text is a must have for either undergraduate or graduate courses.

Nurse as Educator Susan B. Bastable, 2013-07-23 Nurse as Educator: Principles of Teaching and Learning for Nursing Practice, Fourth Edition prepares nurse educators, clinical nurse specialists, and nurse practitioners for their ever-increasing

role in patient teaching, health education, health promotion, and nursing education. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

Health Professional as Educator Susan B. Bastable, Pamela Gramet, Karen Jacobs, Deborah Sopczyk, 2010-10-06 Health Professional as Educator: Principles of Teaching and Learning focuses on the role of the health professional as educator of patients/clients, staff, and students in the clinical arena and classroom settings. It covers key principles of teaching and learning in both scope and depth, providing information from research and practice on the educational process, the characteristics of the learner, and techniques and strategies of teaching and learning. This comprehensive text covers important topics including literacy; compliance and motivation; assessment of learning needs, learning styles, and readiness to learn; behavioral objectives; teaching methods; instructional materials; technology in education; gender, socioeconomic, and cultural influences on learning; and evaluation of teaching and learning. Case studies are provided in each chapter for application of the concepts, review questions at the end of each chapter assist the reader with review of the important material presented, and an instructor's manual provides numerous materials for presentation and testing of content. Unlike other textbooks on education, this text contains a comprehensive coverage of literacy in the adult client population, including guidelines on how to develop and/or critique printed education materials for effective patient/client teaching. It also includes a chapter on writing behavioral objectives and developing teaching plans and learning contracts. There are unique topics included in this text, such as the teaching and learning of motor skills, how to access motivation, the concept of the learning curve, the concept of the spacing effect (massed and distributive learning); gender, socioeconomic, and cultural attributes of the learner, working with a wide variety of diverse populations, and the ethics of student-teacher and client-teacher relationships. - Publisher.

Intellectual Disabilities: Health and Social Care Across the Lifespan Fintan Sheerin, Carmel Doyle, 2023-06-19 This textbook provides nurses, allied health and social care professionals with the background knowledge necessary to support individuals with intellectual disabilities and their families. It is a unique and viable resource which is particularly timely, as recent decades have seen a significant change in the demographics and associated care and support needs of this population. The textbook is laid into four sections to provide a logical structure for the content with chapters developing key topic areas relevant to the field. The introductory section sets the overall context for the book and considers the importance of developing an understanding of intellectual disability as a core concept identifying philosophies and models of service that underpin health and social care across the lifespan. Communication as a basis for caring and the overall concept of person-centred caring in a multidisciplinary context is considered. The second section explores key concepts from birth to adulthood exploring the nature of intellectual disability, the child with intellectual disability and other related neurodevelopmental conditions. The third section explores adulthood to older age and considers specific health care needs, understanding

behaviour and other fundamental concepts including mental health, ageing and palliative care. The fourth and final section explores the integration of health and social care addressing such issues as supporting and enabling families, education, employment, and sexuality and relationships. Edited by experienced and widely respected professionals, this textbook is written by international practitioners, educators and researchers who all play critical roles in working with individuals with intellectual disability and their families.

based approaches. - NEW! Updated chapters on interprofessional collaboration and teamwork highlight a team-based model of health care, with patients, providers, and families working together.

Psychology for Nurses Devinder Rana, Dominic Upton, 2013-09-13 This text aims to be useful and relevant for student nurses from all backgrounds with a range of professional aspirations. It demonstrates the importance of psychology in both the nursing role and in health care in general.

Human Simulation for Nursing and Health Professions Linda Wilson, Leland Rockstraw, 2011-10-21 This book could easily become the go to text for standardized patient utilization and the backbone for implementation strategies in learning programs...It is a must-have for all disciplines interested in adding the human simulation experience to their programs.--
Nursing Education Perspectives Today there is an explosion in the use of simulation in nursing and health professions education. The contributors to this text are experts in this format of teaching. They are the designers of the learning spaces, the authors of simulation cases and evaluation methods, the experts who program the human patient simulators and who teach the patient actors to enact the clinical scenarios. I consider this a handbook on the design, evaluation and practice of simulation for clinical education. If you are a faculty member with concerns about how your students will make the transition from student to professional, use simulation in your curriculum and learn for yourself that pretending is simulation for life but simulation is pretending for the delivery of exquisite clinical care. Gloria F. Donnelly, PhD, RN, FAAN Dean and Professor Drexel University College of Nursing and Health Professions Human simulation is changing the face of clinical education in the health professions. Its use has expanded beyond medical school to encompass nursing and mental health clinical education. This comprehensive guide to establishing and managing a human simulation lab has been written by nationally acclaimed simulation experts and is geared for undergraduate, graduate, and professional settings. The text takes the reader step-by-step through the process of planning, organizing, implementing, and maintaining a simulation lab. It describes the required technology, how to train standardized patients, how to implement a simulation, evaluation and analysis of the simulation experience, and how to develop a business plan. The guide details simulation in undergraduate and graduate nursing programs, physician's assistant programs, and mental health education, as well as the use of simulation with critically ill patients, and in perioperative, perianesthesia, women's health, and rehabilitation science settings. Key Features: Offers a blueprint for developing, implementing, and managing a human simulation lab Details use of simulation in numerous nursing and mental health settings along with case studies Provides tools for evaluation and analysis of the simulation experience Presents undergraduate and graduate nursing simulation scenarios and pedagogical strategies Discusses simulation training and required technology Includes templates for writing cases for BSN and MSN levels

Essentials for Nursing Practice - E-Book Patricia A. Potter, Anne G. Perry, Patricia A. Stockert, Amy Hall, 2018-03-12 Get a solid foundation in essential nursing principles, concepts, and skills! *Essentials for Nursing Practice*, 9th Edition combines

everything you need from your fundamentals course and streamlines it into a format that's perfect for busy nursing students. The ninth edition retains many classic features, including chapter case studies, procedural guidelines, and special considerations for various age groups, along with new content including a chapter on Complementary and Alternative Therapies, interactive clinical case studies on Evolve, a new Reflective Learning section, and QSEN activities to encourage active learning. Thoroughly reviewed by nursing clinical experts and educators, this new edition ensures you learn nursing Essentials with the most accurate, up-to-date, and easy-to-understand book on the market. - Progressive case studies are introduced at the beginning of the chapter and are then used to tie together the care plan, concept map, and clinical decision-making exercises. - Focused Patient Assessment tables include actual questions to help you learn how to effectively phrase questions to patients as well as target physical assessment techniques. - Nursing skills at the end of each chapter feature full-bleed coloring on the edge of the page to make them easy to locate. - Safety guidelines for nursing skills sections precede each skills section to help you focus on safe and effective skills performance. - Detailed care plans in the text and on Evolve demonstrate the application of the 5-step nursing process to individual patient problems to help you understand how a plan is developed and how to evaluate care. - Unexpected outcomes and related interventions for skills alert you to possible problems and appropriate nursing action. - Patient Teaching boxes help you plan effective teaching by first identifying an outcome, then developing strategies on how to teach, and finally, implementing measures to evaluate learning. - Care of the Older Adult boxes highlight key aspects of nursing assessment and care for this growing population. - Key points neatly summarize the most important content for each chapter to help you review and evaluate learning. - Evidence-Based Practice boxes include a PICO question, summary of the results of a research study, and a F description of how the study has affected nursing practice — in every chapter. - Patient-Centered Care boxes address racial and ethnic diversity along with the cultural differences that impact socioeconomic status, values, geography, and religion. - 65 Skills and procedural guidelines provide clear, step-by-step instructions for providing safe nursing care. - 5-step nursing process provides a consistent framework for clinical chapters. - Concept maps visually demonstrate planning care for patients with multiple diagnoses. - NOC outcomes, NIC interventions, and NANDA diagnoses are incorporated in care plans to reflect the standard used by institutions nationwide.

Psychiatric Nursing Norman L. Keltner, Lee Hilyard Schwecke, Carol E. Bostrom, 1999 Psychiatric Nursing focuses on the therapeutic skills expected of today's psychiatric nurse. This book uses the simple and unique model of psychotherapeutic management, which is composed of three components: 1) The Therapeutic Nurse-Patient Relationship provides the nursing student with the tools necessary for effective communication with individual patients, groups of patients, families of patients, and patients from various cultural backgrounds; 2) Psychopharmacology offers information on the most important psychotropic drugs used in psychiatry today, including important nursing responsibilities associated with their

administration; and 3) Milieu Management explores the importance of developing the therapeutic environment to maximize its contribution to patient care.
