Arte, poder y sociedad en la España de los siglos XV a XX Miguel Cabañas Bravo,Wifredo Rincón García,2008 Fruto del congreso "XIII Jornadas Internacionales de Historia del Arte. Arte, poder y sociedad en la España de los siglos XV a XX" es este libro que al igual que las jornadas está organizado en tres secciones: El análisis y la reflexión artística; El poder y el arte y La sociedad y el arte. Se pretende con esta tarea incentivar la reflexión y llamar la atención sobre la importancia de las investigaciones y análisis sobre estas relaciones entre arte, poder y sociedad y hacer una puesta al día sobre la significación de estas vinculaciones en la España de las últimas seis centurias.

40.- Artes industriales de los siglos XVI y XVII Ernesto Ballesteros Arranz,2015-02-02 Los centros cerámicos habían desarrollado en tiempos anteriores técnicas peculiares -el reflejo metálico- que tuvieron amplia resonancia en Europa. Pero el Renacimiento va a incorporar una nueva estética y unas nuevas técnicas para la cerámica. Se hará, a imitación de lo italiano, loza pintada con un repertorio de temas decorativos distante de lo mudéjar. lo geométrico da paso, paulatinamente, a las representaciones figuradas, y aparecen las grandes composiciones de azulejos.

Collections of Painting in Madrid, 1601-1755 (Parts 1 and 2) Marcus B. Burke,Peter Cherry,1997-01-01 This two-part book on collections of paintings in Madrid is part of the series Documents for the History of Collecting, Spanish Inventories 1, which presents volumes of art historical information based on archival records. One hundred forty inventories of noble and middle-class collections of art in Madrid are accompanied by two essays describing the taste and cultural

atmosphere of Madrid in the seventeenth and eighteenth centuries.

Painting in Spain Jonathan Brown, 1998-01-01 El Greco, Ribera, Velázquez, Murillo--these are but a few of the great sixteenth- and seventeenth-century artists of Spain's golden age of painting. In this authoritative and handsome book, an enlarged, extended, and revised version of his Golden Age of Painting in Spain, eminent Spanish art scholar Jonathan Brown surveys the development of painting in Spain during this fascinating period. Focusing on the interaction between art and the socioeconomic and political conditions that prevailed in Spain's golden age, this book offers information about religious beliefs, social attitudes, the activities of patrons and collectors, and how these were absorbed and interpreted by painters. The author sets the history of Spanish paintings within a European context and explores Spain's contact with artistic centers in Italy and the Netherlands. He discusses not only Spanish artists but also such non-Spanish painters as Titian, Ruben, and Luca Giordano, who either worked in Spain or influenced other artists there. Brown also examines the collections of foreign paintings that Spanish noblemen and prelates assembled and how these collections affected the production of art and the social status of the Spanish artist. In this up-to-date and innovative analysis of two hundred years of Spanish painting, Brown describes a country that brilliantly transformed the artistic impulses it received from abroad to fit the needs of its own society.

Cultura científica en España en el siglo XVI Acisclo Fernández Vallín y Bustillo, Real Academia de Ciencias Exactas, Físicas y Naturales (Madrid), 1893

Pintura toledana de la segunda mitad del siglo XVI Isabel Mateo Gómez, Amelia López-Yarto, 2003 Se han ordenado las biografías de los pintores alfabéticamente, sin embargo, deben considerarse cronológicamente como punto de partida de esta generación, Juan Correa de Vivar y Francisco de Comontes, quienes, aunque sólo sobrepasan en quince años la mitad de siglo, influyen decisivamente - sobre todo el primero - en los pintores de la última generación. La pintura toledana de este momento es abundantísima como lo demuestra la obra existente y la numerosa documentación que aportan los archivos catedralicios y notariales. En muchos casos no se ha podido compaginar documento con obra, debido al desmantelamiento de los retablos durante la desamortización y, de otro, por la venta a particulares o destrucción de las obras.

23.-Arte mudéjar. Ernesto Ballesteros Arranz, 2015-02-02 Se conoce por arte mudéjar o morisco la producción artística de los musulmanes que trabajaron al servicio de los cristianos. A medida que iba avanzando esa oleada histórica que tan desafortunadamente conocemos con el nombre de Reconquista, grandes masas de población musulmana iban sometiéndose a la administración de los reinos cristianos. Estos guerreros del norte no contaban la mayor parte de las veces con suficientes arquitectos para erigir sus obras, y recurrián en gran medida al trabajo de los «alarifes» musulmanes, que conocían su oficio

a la perfección.

Painting and Devotion in Golden Age Iberia Jean Andrews, 2020-06-01 It is the first monograph in English on Luis de Morales since the 1960s, which is essential for those who do not read Spanish because most of the literature on Morales is in Spanish. It provides an extended consideration of the relationship between Morales' paintings and the devotional practices of his times, using devotional writing aimed at a lay readership and sermons. It highlights the importance of Portuguese cultural influences on his work and notes the significance of his work in Portugal as an influence on Portuguese painters and style.

Imágenes de España en culturas y literaturas europeas (siglos XVI-XVIII) VV.AA, 2007-12-01 Una colección de rigurosos ensayos históricos sobre las imágenes que diferentes pueblos europeos elaboraron en el periodo sobre España y los españoles. España era entonces la principal potencia político-militar europea con una ostensible presencia cultural y religiosa, de ahí la contundencia de las imágenes y los estereotipos que forjaron parte de la llamada leyenda negra.

38.- Escultura barroca castellana Ernesto Ballesteros Arranz, 2015-02-02 Tras la escultura renacentista y su última etapa de profundo manierismo, el siglo XVII trae consigo una nueva concepción de la escultura. El clásico equilibrio entre la masa y el movimiento que se producía en las obras renacientes se rompe ahora en favor de este último, haciendo que las figuras se muevan en el espacio con gestos teatrales y ampulosos. Esta va a ser la constante en la escultura europea de la centuria, que seguirá fielmente los dictados de la escultura italiana; pero, en cambio, en España durante este siglo, el Siglo de Oro de la escultura hispana, se realizarán obras de características propias bien diferenciadas de las europeas.
