Twenty Thousand Leagues Under the Sea Jules Verne,2014 Twenty Thousand Leagues Under the Sea (French: Vingt mille lieues sous les mers) is a classic science fiction novel by French writer Jules Verne published in 1870. It tells the story of Captain Nemo and his submarine Nautilus, as seen from the perspective of Professor Pierre Aronnax. The title refers to the distance traveled while under the sea and not to a depth, as 20,000 leagues is over six times the diameter of Earth. The greatest depth mentioned in the book is four leagues. In the book, a league is equivalent to four kilometres. A literal translation of the French title would end in the plural seas, thus implying the seven seas through which the characters of the novel travel; however, the early English translations of the title used sea, meaning the ocean in general.

The Complete Twenty Thousand Leagues Under the Sea Jules Verne,1991 When an unidentified monster threatens international shipping, French oceanographer Pierre Aronnax and his unflappable assistant Conseil join an expedition

organized by the US Navy to hunt down and destroy the menace. After months of fruitless searching, they finally grapple with their quarry, but Aronnax, Conseil, and the brash Canadian harpooner Ned Land are thrown overboard in the attack, only to find that the monster is actually a futuristic submarine, the Nautilus, commanded by a shadowy, mystical, preternaturally imposing man who calls himself Captain Nemo. Thus begins a journey of 20,000 leagues - nearly 50,000 miles - that will take Captain Nemo, his crew, and these three adventurers on a journey of discovery through undersea forests, coral graveyards, miles-deep trenches, and even the sunken ruins of Atlantis. Jules Verne's novel of undersea exploration has been captivating readers ever since its first publication in 1870.

He studied law at Paris, but turned to writing almost immediately after completing his education, and brought out his first comedy in 1850. This was followed by several comic operas. However, he is chiefly known by his scientific romances, of which the first, *Five Weeks in a Balloon*, appeared in 1863. *Twenty Thousand Leagues Under the Sea* is perhaps the best example of Verne's tales of the marvels of invention, and we have to remember that when it was written, in 1873, nobody had yet succeeded in making a boat to travel under water. For that reason it was, in a way, a prophetic book, shadowing forth the wonderful possibilities of human ingenuity in exploring the ocean's unknown depths. Jules Verne died March 24, 1905. Twenty Thousand Leagues Under the Sea (Annotated with Biography of Verne and Plot Analysis) Jules Verne, 2013-11-22 Some critics claim that *Twenty Thousand Leagues Under the Sea*, published in 1870, is Jules Verne's masterpiece. The novel is narrated by Professor Pierre Aronnax of the Paris Museum of Natural History. It is set in the year 1866 (Verne was already working on the manuscript at that time) and the world of the sea is in the news with the supposed sightings of a sea monster

that is much too large and fast to be a whale. When a boat is damaged, apparently by the sea monster, Aronnax, while on a researching assignment in New York is asked by the United States government to help track down the monster. Aronnax (illustrations of Aronnax in the original edition look very much like Verne) takes his loyal Belgian valet (Conseil) with him – both Aronnax and Conseil are men of science – cool, rational, and possessing encyclopaedic knowledge of the sea. Ned Land serves as their foil – a passionate and foolhardy harpooner from Canada. This annotated edition includes a biography and critical essay.

20,000 Leagues Under the Sea Jules Verne, 2014-07-30 *Twenty Thousand Leagues Under the Sea* (French: *Vingt mille lieues sous les mers*) is a classic science fiction novel by French writer Jules Verne published in 1870. It tells the story of Captain Nemo and his submarine Nautilus, as seen from the perspective of Professor Pierre Aronnax after he, his servant Conseil, and Canadian harpoonist Ned Land wash up on their ship. On the Nautilus, the three embark on a journey which has them going all around the world. The original edition had no illustrations; the first illustrated edition was published by Hetzel with illustrations by Alphonse de Neuville and Edouard Riou. The book was highly acclaimed when released and still is now; it is regarded as one of the premiere adventure novels and one of Verne's greatest works, along with *Around the World in Eighty Days* and *Journey to the Center of the Earth*. The description of Nemo's ship, the Nautilus, was considered ahead of its time, as it accurately describes features on submarines, which at the time were very primitive vessels. Thus, the book has been able to age well because of its scientific theories, unlike some other of Verne's works, like *Journey to the Center of the Earth*, which are not scientifically accurate and serve more simply as adventure novels.

Hollywood Presents Jules Verne Brian Taves, 2015-05-26 An “illuminating” look at how filmmakers have taken us around the world, under the sea, and to the center of the earth over the course of a century (Milwaukee Express). Even for those who have never read Jules Verne, the author’s very name conjures visions of the submarine in *Twenty Thousand Leagues Under the Sea*, the epic race in *Around the World in Eighty Days*, the spacecraft in *From the Earth to the Moon*, and the daring descent in *Journey to the Center of the Earth*. One of the most widely translated authors of all time, Verne has inspired filmmakers since the early silent period and continues to fascinate audiences more than a century after his works were first

published. His riveting plots and vivid descriptions easily transform into compelling scripts and dramatic visual compositions. In *Hollywood Presents Jules Verne*, Brian Taves investigates the indelible mark that the author has left on English-language cinema. Adaptations of Verne's tales have taken many forms—early movie shorts, serials, feature films, miniseries, and television shows—and have been produced as both animated and live-action films. Taves illuminates how, as these stories have been made and remade over the years, each new adaptation looks back not only to Verne's words but also to previous screen incarnations. He also examines how generations of actors have portrayed iconic characters such as Phileas Fogg and Captain Nemo, and how these figures are treated in pastiches such as *Journey 2: The Mysterious Island*. Investigating the biggest box-office hits as well as lower-budget productions, this comprehensive study will appeal not only to fans of the writer's work but also to readers interested in the ever-changing relationship between literature, theater, and film.
