El árbol de la ciencia Henry James,2019-06-26 Plagada de humor e ironía, esta historia genial de Henry James relata las desventuras amorosas de Peter Brench; secretamente enamorado de la esposa de su mejor amigo: un escultor mediocre que se siente y se conduce como un genio incomprendido. La tensión por fin se desata cuando el hijo del matrimonio Mallow decide iniciar una carrera artística en París y esto lo lleva a descubrir lo que durante años toda su familia —incluido Peter Brench, su padrino— ocultó.

El Horror. ¿La Biblia es la palabra de Dios?,

Bajo el árbol del paraíso Juan José Prat Ferrer,2008 Los paradigmas, símbolos y otros constructos que el hombre culto ha usado en el desarrollo de la Folclorística forman parte de este estudio. Los reformadores de costumbres, humanistas e historiadores de los pueblos desarrollaron un interés por construir una cultura nacional basada en la preservación de un pasado prestigioso bajo la idea de una Edad de Oro original. Los fundadores de la disciplina buscaron la identidad cultural de los pueblos, fijando su atención en la cultura rural. Diversas escuelas se interesaron por buscar el origen de las tradiciones y su diseminación por Europa, tras el descubrimiento de las formas internacionales del folclore.

Don Quijote de la Mancha (Adobe PDF) Miguel de Cervantes,2015-05-05 Biblioteca Clásica de la Real Academia Española. Joyas universales de nuestras letras Biblioteca Clásica de la Real Academia Española. Joyas universales de nuestras letras Con esta publicación, que forma parte de la colección Biblioteca Clásica de la RAE(BCRAE),la Academia cumple con un encargo que se remonta ya a 1912 y que no era otro que ofrecer a los lectores una edición popular y escolar y otra crítica y erudita del Quijote. Esta segunda es la que, bajo la sabia y rigurosa dirección del académico Francisco Rico, sale en el año 2015, en que se conmemora el cuarto centenario de la aparición de la segunda parte de la gran novela de Cervantes. Todas estas circunstancias la convierten en especialmente singular.

Ciencia y política entre las dos repúblicas: Antonio Calvo Roy,2015-11-11 Ésta es la historia de un hombre apasionado, una persona a caballo entre dos siglos, y justo entre las dos repúblicas españolas, que se dejó la piel primero en ser él mismo y luego en ayudar a otros a ser ellos mismos, cuando cambio la investigación científica por la gestión. Es la historia de su voluntad, de sus luchas, de cómo fue posible enamorarse del mar desde la estepa aragonesa y, sobre todo, enamorarse del conocimiento del mar. Odón de Buen es un personaje desconocido y olvidado, injustamente desconocido y olvidado. Es

necesario reivindicar a esa generación de científicos a los que la Guerra Civil trunca la vida, y la muerte su memoria y su recuerdo.

An Archaeology of the Margins A. José Farrujia de la Rosa, 2013-11-26 This book analyses the problematics of archaeological heritage management in the Canary Islands, which are echoed in other parts of the world where the indigenous heritage is under-represented. The present-day management of Canarian archaeological heritage has a very specific and unusual context given that the archipelago is located on the fringes of Europe, belonging to Spain and therefore to the European Union, but geographically and in terms of early history being part of Africa. From a theoretical perspective, then, the proposed book analyzes issues such as the effects of colonialism and eurocentrism on the management of the archaeological heritage. It also examines the evolutionist and historico-cultural models used to analyze past societies and, ultimately, used to create identities that influence archaeological heritage management itself. From a practical point of view, the book presents a proposal for enhancing the archaeological heritage of the Canary Islands through the creation of archaeological parks (providing some concrete examples in the case of the city of La Laguna) and the active involvement of the local community. Parallel to this, the book considers the Canarian Archipelago as part of a problematic that is not unique to this area but is an example of poor indigenous heritage management overall. It demonstrates how the course of history and the politics of the past still have an excessive influence on the way in which the present-day archaeological heritage is interpreted and managed. Therefore, this book provides an almost unique opportunity for uncovering the history of archaeology within the margins of Europe (in fact, in an African region) and exploring colonial and foreign influences. In many ways it is a mirror of archaeological mainstreams and an exercise in (re)thinking the aim and status of present-day archaeology.

Between the Atlantic and the Mediterranean: Responses to Climate and Weather Conditions throughout History Ian D. Rotherham (eds), Cristina Joanaz de Melo, Ana Isabel Queiroz, Luís Espinha da Silveira, 2013 Between the Atlantic and the Mediterranean brings together a set of case studies on living organisms' adaptation to the evolution of the climate and adjustments to extreme weather conditions. Aiming to go beyond concerns about recent and forthcoming climate change, which have dominated research in environmental studies this book adopts a long-term perspective on adaptations and adjustments to nature. Although an important group of papers deal with the Portuguese territory and the Iberian Peninsula, in which a complex mosaic of Atlantic and Mediterranean climates helped to shape landscapes and history, the book has a broader geographical scope from England to Italy. Contributions look at the distribution and numbers of animal species and, material, social, cultural and religious responses to weather in the short term and to climate in the long term. The common ground is the reaction of living organisms to natural hazards. In the long term, these are cyclical, and nowadays predictable.

Horizontes en la práctica docente. Complejidad, TIC y mediación educativa Genaro Aguirre Aguilar, 2020-10-02

Pensar la docencia desde la complejidad educativa. Esta obra reúne una serie de capítulos en los que se abordan temáticas relacionadas con la educación superior desde una mirada académica, destacándose como premisas el pensamiento complejo, las TIC, así como el trabajo estratégico que desempeña el docente como facilitador de procesos de enseñanza y aprendizaje a nivel universitario. Para ello, se toma como contexto la llamada «sociedad de la información y el conocimiento», en donde se ha definido una nueva ordenanza global que deviene en marco de referencia para entender los procesos de transformación que se les requieren a las universidades, en términos de políticas educativas, para la innovación de su currículo, los modelos educativos, como la transformación de las prácticas pedagógicas de sus académicos. Lo obra integra una serie de textos en donde se analiza el fenómeno educativo, con énfasis en el papel que juegan los docentes en la configuración de ambientes educativos que contribuyan al aprendizaje de sus estudiantes, para lo cual se proponen tres capítulos: «Perspectivas en la educación y el pensamiento complejo», «Comunicación, diversidad y mediación educativa» y «Sujetos de la educación y ámbitos emergentes para la enseñanza». Cada uno de los cuales se compone de textos que, en lo particular, abordan temáticas que permiten ampliar el horizonte desde el cual pueden ser comprendidas problemáticas que caracterizan a la educación contemporánea en el nivel superior.

Verde fresco: Árboles asombrosos y extraordinarios Lulu Delacre, 2023-03-28 A portrait of some of the world's most incredible trees, seen through the eyes of a landscaper who loves them—and his granddaughter who is beginning to understand why. ¿Por qué, abuelo? ¿Por qué? ¿Por qué me maravillan los árboles? Déjame compartir contigo ... Desde el extraordinario árbol arco iris hasta las poderosas y altísimas secoyas, los árboles del mundo son un espectáculo de diversidad ecológica y adaptaciones sorprendentes. En Verde fresco, un paisajista y su nieta se asombran con los diferentes tipos de árboles que hay en todo el mundo, algunos familiares, y otros un poco menos conocidos, pero todos extraordinarios a su manera. Rebosante de exuberancia y color, es claro que esta oda a los árboles del mundo despertará asombro y alegría en ambos niños y adultos. As he works with his young granddaughter to nurture a potted sapling, a Latino landscaper shares his love and admiration of trees. From the extraordinary rainbow gum tree to the mighty, towering redwood, each of the thirteen specimens he tells of is a miracle of the natural world—and some are strange beyond the wildest imagining. Brimming with exuberance and color, this ode to trees of the world—and the vast knowledge of landscapers and gardeners—offers a feast for the eyes, with author-illustrator Lulu Delacre paying touching tribute by imbedding seeds, fronds, and leaves within her art. Complete with an author's note, glossary, and further information on the featured trees, Cool Green will have readers eager to turn the pages to discover each new reminder of what a precious place our earth is.

3-2 Ideas Clave. El desarrollo de la competencia matemática Jesús M.a Goñi Zabala, 2008-07-09 El libro reflexiona

sobre la diferencia entre dos maneras distintas de enfocar la enseñanza de las matemáticas: las matemáticas como área de conocimiento del currículo de la educación y/o las matemáticas como competencia clave o básica para el aprendizaje. De estructura clara, además de las ideas que propone para el desarrollo de la competencia matemática, el libro incide en la importancia de la innovación y el cambio para mejorar la capacitación docente. Las ideas clave planteadas ayudan a responder a preguntas tales como: ¿Cuál es la razón que justifica la presencia de las matemáticas en el currículo? ¿Desde qué perspectiva deben definirse las finalidades que debe lograr la enseñanza de las matemáticas? ¿Por qué debe centrarse la enseñanza de las matemáticas en el desarrollo de la competencia matemática y qué debemos entender por competencia matemática?

La precomprensión de lo humano en la sociología de Luhmann Patricio Miranda Rebeco,2012 Este libro muestra un punto ciego de Luhmann: el concepto de lo humano tras su sociología sistémica, pero a la vez hace evidente la compatibilidad entre la contingencia del mundo social descrita por él y la apertura al mundo de un ser humano descentrado propuesta por la antropología filosófica. Este libro ofrece además una forma metodológica novedosa de entender teórica, histórica y filológicamente las relaciones entre sociología y filosofía: la técnica de la afinidad electiva —una forma que debe ser de interés para quienes piensen que la filosofía tiene algo o mucho que decir a la sociología y para todo el que asuma que la sociología es más que recolección de datos y descripción de hechos.

Cool Green: Amazing, Remarkable Trees Lulu Delacre, 2023-03-28 A portrait of some of the world's most incredible trees, seen through the eyes of a landscaper who loves them—and his granddaughter who is beginning to understand why. As he works with his young granddaughter to nurture a potted sapling, a Latino landscaper shares his love and admiration of trees. Introduction to Cybersemiotics: A Transdisciplinary Perspective Carlos Vidales, Søren Brier, 2021-04-14 This book traces the origins and evolution of cybersemiotics, beginning with the integration of semiotics into the theoretical framework of cybernetics and information theory. The book opens with chapters that situate the roots of cybersemiotics in Peircean semiotics, describe the advent of the Information Age and cybernetics, and lay out the proposition that notions of system, communication, self-reference, information, meaning, form, autopoiesis, and self-control are of equal topical interest to

semiotics and systems theory. Subsequent chapters introduce a cybersemiotic viewpoint on the capacity of arts and other practices for knowing. This suggests pathways for developing Practice as Research and practice-led research, and prompts the reader to view this new configuration in cybersemiotic terms. Other contributors discuss cultural and perceptual shifts that lead to interaction with hybrid environments such as Alexa. The relationship of storytelling and cybersemiotics is covered at chapter length, and another chapter describes an individual-collectivity dialectics, in which the latter (Commind) constrains the former (interactants), but the former fuels the latter. The concluding chapter begins with the observation that digital technologies have infiltrated every corner of the metropolis - homes, workplaces, and places of leisure - to the extent that cities and bodies have transformed into interconnected interfaces. The book challenges the reader to participate in a broader discussion of the potential, limitations, alternatives, and criticisms of cybersemiotics.
