African Spirituality and Ethics Munyaradzi Felix Murove, 2023-12-28 This book explores the symbiotic relationship that exists between African spirituality and ethics. Felix Murove discusses how these two concepts are entwined, and illustrates how they play a role in applied ethical issues. He argues that the general understanding of spirituality in Africa stems from Christianity, which has had a negative impact on African indigenous spirituality. The conceptual tools that run throughout the book are considerably Afro-centric, a methodological strategy which inevitably requires the reader to adopt some prior willingness to learn these Afro-centric concepts without easily resorting to western Christian and philosophical categories of thought. The book advocates for an Afro-centric conceptualization of spirituality and ethics, and encourages the reader to adopt a more holistic approach to African spirituality.

Faith, Health, and Healing in African American Life Stephanie Y. Mitchem, Emilie M. Townes, 2008-08-30 Black Americans are more likely than Whites to die of cancer and heart disease, more likely to get diabetes and asthma, and less likely to get preventive care and screening. Some of this greater morbidity results from education, income level, and environment as well as access to health care. But the traditional medical model does not always allow for a more holistic approach that takes into account the body, the mind, the spirit, the family, and the community. This book offers a better understanding of the varieties of religiously-based approaches to healing and alternative models of healing and health found in Black communities in the United States. Contributors address the communal aspects of faith and health and explore the contexts in which individuals make choices about their health, the roles that institutions play in shaping these decisions, and the practices individuals engage in seeking better health or coping with the health they have. By paying attention to the role of faith, spirit, and health, this book offers a fuller sense of the varieties of ways Black health and health care are perceived and addressed from an inter-religious perspective. Community and religion-based initiatives have emerged as one key way to address the health challenges found in the African American community. In cities such as Atlanta, Baltimore, Dallas, and Oakland, residents organize exercise groups, teach one another how to cook with healthy ingredients, and encourage neighbors to get regular checkups. Churches have become key sites for health education, screening, and testing. Another set of responses to the challenge of Black health and healthcare in the United States comes from those who emphasize the body as a whole—body, mind, soul, and spirit, often drawing on religious traditions such as Islam and African-based religions such as Spiritism, Santeria, Vodun (aka Voodoo), Candomblé, and others. Understanding the issues and the various approaches is essential to combating the problems, and this unique volume sheds light on areas often overlooked when considering the issues.

Black Son Rising Michael Curtis Jones, 2006 Calling upon the author's experience as a youth counselor and prison volunteer, this inspiring work offers a challenging portrayal of black men and the contemporary obstacles they face in American society. With a message that calls equally for communal empathy and individual growth, this assessment of the

plight of black men views them in relation to today's most controversial topics (the prison system, drugs, education, and parenting), empowering the academic, social worker, minister, and interested reader.

Law, Religion and Human Flourishing in Africa M. Christian Green,2019-05-19 A shared interest of law and religion is the advancement of human flourishing, yet there is no common understanding of what it means for humans to flourish and the means by which to attain a flourishing life. The concept of human flourishing is especially important for Africa, where community and national development compete with forces of conflict and scarce resources. In the broadest sense, the concept of human flourishing focuses our attention on having a comprehensively good or worthwhile life, but various religious and legal traditions suggest different norms for measuring the quality of life and designing the institutional structures that could best facilitate and preserve it.

God Made Me Beauty-full Terri McFaddin,1997

African Religion Defined Anthony Ephirim-Donkor,2012-07-10 African religion is ancestor worship; that is, funeral preparations, burial of the dead with ceremony and pomp, belief in eternal existence of souls of the dead as ancestors, periodic remembrance of ancestors, and belief that they influence the affairs of their living descendants. Whether called Akw?sidai, Homowo, Voodoo, Nyant?r (Aboakyir), CandomblZ, or Santeria in Africa or the African Diaspora, ancestor worship centers on the ancestors and deities. This makes it a tenably viable religion, because living descendants are genetically linked to their ancestors. The author, a traditional king and professor, studies the Akan in Ghana to demonstrate that ancestor worship is as pragmatic, systematic, theological, teleological, soteriological — with a highly trained clerical body

and elders as mediators — and symbolic as any other religion in the world. Ancestor worship follows prescribed rites and rituals, formulas, precepts for ritual efficacy, and festivities of honor with music and dances to provoke ancestors and deities into joining in the celebration.
