**It's Lonely at the Centre of the Earth** Zoe Thorogood, Maxime le Dain, 2024-02-21 Nominée pour l'Eisner Award de la meilleure autobiographie Nominée pour l'Eisner Award du meilleur auteur Dans une exploration artistique autobiographique, Zoe Thorogood dépeint six mois de son quotidien qui sombre au fil des jours dans une profonde mélancolie. Elle offre un regard intime et métanarratif sur son existence, celle d'une artiste dont la création est la raison de vivre, révélant sa lutte pour la santé mentale - à travers les hauts et les bas de l'anxiété, de la dépression et du syndrome de l'imposteur - alors qu'elle se forge une carrière prometteuse dans l'art séquentiel. « Ce livre frappe et secoue aussi fort que si un poing traversait la page. » Publishers Weekly « Zoe Thorogood s'intéresse aux sensations et à la façon dont elles sont vécues d'une manière qui ne ressemble à aucune autre. » AIPT « Sûrement le meilleur roman graphique de l'année. » The Beat « Tout simplement un chef d'oeuvre de bande dessinée. » Broken Frontier « Empruntant à divers styles de la culture populaire - comics, cartoons, mangas... -, l'artiste installe avec le lecteur une tendre complicité. L'autodérision lui fait prendre de la hauteur : son humour est aussi dévastateur que ses idées noires. » Le Monde

*Spaceship Neutrino* Christine Sutton,1992-10-15 Try to imagine a spaceship that could pass right through the Earth without even noticing it was there. And one that could cross the vastness of space at the speed of light, and then penetrate into the very heart of subatomic matter to seek out its fundamental structure. Imagine, then, a particle that is almost nothing that can tell you almost everything about the structure of matter and the evolution of the Universe. Impossible? In fact, all of these descriptions can be applied to the neutrino, a subatomic particle that is so elusive it is almost undetectable. Spaceship Neutrino charts the history of the neutrino, from its beginnings in the 1930s, when it was postulated as a way of explaining an otherwise intractable problem in physics, to its crucial role in modern theories of the Universe. Christine Sutton is well known for her popular science writing. In this book she describes how the detection and measurement of neutrino properties have tested technology to its limits, requiring huge detectors, often located deep in mines, under mountains or even under the sea. As part of the story she explains without the use of mathematics how our understanding of the structure of matter and the forces that hold it together have come from work with neutrinos, and how these insignificant particles hold the key to our understanding of the beginning and the end of the Universe. This fascinating, well-written and highly illustrated book will be enjoyed by anyone with an interest in modern physics or astronomy, from school level right through to the professional scientist.

Star Matters David John West,2023-08-19 Many people on Earth think that we may have been visited by aliens.

Conspiracy theorists believe that governments are aware and refuse to make this information public. These conspiracy theorists are correct. In ages past the emerging human race on planet Earth came to the attention of race Dawn of Gaya for its spiritual awareness. A small number of Guides were sent to Earth and have lived amongst humans ever since, assisting with every significant technological and philosophical discovery in history. Amily of race Dawn of Gaya, is tasked with discreetly reading the human race on Earth for its promotion to join advanced human races across the galaxy. Born of an Earthly baby and Gayan soul, Amily and her fellow Travellers of Dawn must carefully develop selected academics and political leaders to achieve Gayan enlightenment. Race Spargar are rivals to Dawn of Gaya in our galactic neighbourhood. Spargar are only concerned with binding emerging human races that can be snared by their own computing and network technology. The exponential rise of Information Technology and the subsequent birth of the Internet on planet Earth makes our world a prime target for Spargar annexation. As their mission plays out on Earth and across the Galaxy the Travellers of Dawn tutor their specially chosen earthly contacts. They must also counter the grim invasion plans of their Spargar rivals and avoid being hunted down by Spargar agents who pay little heed to the niceties of galactic peace treaties. Let the Star Matters begin...

**Assault on Charlestown** Steve P Lee,2018-12-03 Decades before the calamitous events in Charlestown, Captain Alice Davenport and the crew of the BCRS Fiennes suffered their own disastrous encounter with the Varla K'dyamon. Their spaceship destroyed, they find themselves marooned on Eskelon IV, a planet they were studying for future colonisation. It now appears to be their permanent home with no chance of rescue. Furthermore, the outcome of the Varla K'dyamon's battle

with an ancient alien defensive system is unknown. The greatest threat to their survival may come from space, not from their new habitat. Roman and Mint continue to work for Department 44, desperately seeking knowledge and weapons that may allow them to combat the threat posed by Tiada Vejour. But, they aren't the only ones hard at work on Obsirion II; plans and projects are coming to fruition in Charlestown. The malevolent alien still plans to enslave the entire population of the planet and call surviving members of its clan to a vast source of energy.
