Introducción a la metodología de la investigación científica Marcelo M. Gómez,2006

Metodología de la Investigacion Jose Luis Abreu,2016-03-17 La determinación de las preguntas de investigación y del método es un paso muy importante, tanto en el proceso de investigación cuantitativa como en el proceso de investigación cualitativa debido a que estas preguntas estrechan los objetivos y los propósitos de la investigación para conformar preguntas específicas que los investigadores intentan abordar en sus estudios. Este es un libro que ofrece una metodología de investigación sencilla con bases y criterios rigurosamente científicos que se ajustan a los requisitos demandados por las actividades de investigación más actualizadas. Como tema de interés y curiosidad científica, se establece que el síndrome Todo Menos Tesis (TMT) define a un conjunto de estudiantes que habiendo concluido todas las asignaturas o requisitos de una carrera, se retrasan o no terminan la tesis. Se determina que es un problema multifactorial con múltiples causas, entre las cuales se encuentran el diseño curricular y su influencia en el rendimiento en postgrado, variables de tipo cognoscitivo afectivo y social, entre otras. En el libro de forma interesante y entretenida se plantean soluciones al síndrome de todo menos tesis.

Metodología de la investigación Héctor Daniel Lerma González,2022-08-31 Cuando un docente, estudiante o investigador desea llevar a cabo una investigación necesita tener a la mano un documento sencillo que lo guíe, que le permita revisar de manera concreta, práctica y con un ejemplo orientador los pasos del proceso investigativo. Este libro fue escrito con tal propósito. Una investigación consta de tres etapas: planificación, ejecución y presentación del informe final. El resultado de la "planificación" es el diseño de la investigación, denominado proyecto o protocolo; el resultado de la "ejecución" de este plan o proyecto son las mediciones y análisis de las variables del estudio, y el "documento final" es un informe estructurado de los resultados y de la forma como se obtuvieron. En esta nueva edición del texto se realizó una revisión, ampliación y actualización de todos los capítulos. Desde hace muchos años, este libro ha sido utilizado para orientar

los trabajos de grado en pregrados y posgrados, y en la asignatura Metodología de la Investigación de diferentes universidades del país. Asimismo, es una herramienta útil para aclarar los conceptos del proceso científico en secundaria. Incluye - Cada uno de los elementos para elaborar la propuesta, el anteproyecto y el proyecto de una investigación. - Actualización según el manual de la American Psychological Association (APA) en su última versión y de las normas ICONTEC, para la presentación de trabajos científicos. - Ampliación de conceptos sobre las variables, tablas, cuadros y gráficas. - Ejemplos claros y sencillos que sirven como guía en cada paso. Contenidos en el Sistema de Información en Línea (SIL) Al final del libro encontrará el código para ingresar al Sistema de información en Línea - SIL - donde encontrará presentaciones de las diferentes etapas del proceso científico

Introducción a la metodología de la investigación científica A. Alvarez,E. Barrios,E. Gutierrez,A. Garcia,R. Roca,L. Delgado,G. Martinez,F. Nieto,R. Fescina,2003

Metodología de la investigación - 5ta edición Héctor Daniel Lerma González,2016-01-01 Todo profesional que busque realizar su trabajo de una manera más eficiente, creativa y con impacto en la comunidad, debe plantearse preguntas para realizarlo mejor. La solución a los interrogantes planteados la obtiene mediante la búsqueda y análisis de la información sobre el problema, seguido por la investigación. Una vez llegan a su mente las ideas sobre el problema a estudiar, el profesional debe darle un orden a la información recolectada y a los documentos producidos, y es ahí cuando se hace necesario un texto guía sobre el proceso de investigación. Este texto -que llega a su quinta edición- guía a los lectores con un lenguaje claro y conciso en la elaboración de la primera parte de una investigación, la planificación, que consta de tres partes: la propuesta, el anteproyecto y el proyecto. El autor describe los elementos de cada una y ofrece ejemplos ilustrativos de las relaciones entre ellas por medio de útiles flujogramas. En esta edición se actualizó el capítulo sobre presentación de trabajos científicos según el manual de la American Psychological Association (APA) en su última versión. Estudiantes y profesionales con interés en la investigación o en acercarse a la realidad a través del método científico tienen aquí un valioso texto de referencia para cualquier investigación académica o profesional de tipo cuantitativo. Incluye: 1. Construcción y operacionalización de variables sencillas y complejas en la propuesta de investigación. 2. Ejemplo de anteproyecto. 3. Descripción de normas APA para la presentación de trabajos de investigación. Contenidos en el Sistema de Información en Línea (SIL): Al final del libro encontrará el código para ingresar al Sistema de información en Línea - SIL -

Metodología de la Investigación cuantitativa-cualitativa y redacción de la tesis Humberto Ñaupas Paitán,Marcelino Rául Valdivia Dueñas,Jesús Josefa Palacios Vilela,Hugo Eusebio Romero Delgado,2019-03-01 Es para mí una satisfacción presentar la obra Metodología de la Investigación Cuantitativa-Cualitativa y Redacción de Tesis, a petición de sus autores a quienes

agradezco por esta distinción. En la era de la información, la complejidad de la construcción del conocimiento científico es cada vez mayor, los cuestionamientos al método científico como el único camino para llegar al conocimiento, ha generado un movimiento importante en el claustro universitario. Así se empieza a trabajar la investigación cualitativa. Las ideas de Popper, Lakatos y Feyerabend, van calando en la cátedra universitaria, sin desmerecer la presencia de Bunge.
