Biodiversity Conservation, Law and Livelihoods: Bridging the North-South Divide Michael I. Jeffery,Jeremy Firestone,Karen Bubna-Litic,2008-01-07 The IUCN Academy of Environmental Law Research Studies' third colloquium of 2005 brought together more than 130 experts from 27 nations on nearly every continent. This book brings together a number of the papers presented there and offers a global perspective on biodiversity conservation and the maintenance of sustainable cultures. It addresses issues from international, regional, and country-specific perspectives. The book is organized thematically to present a broad spectrum of issues, including the history and major governance structures in this area; the needs, problems, and prerequisites for biodiversity; area-based, species-based, and ecosystem-based conservation measures; the use of components of biodiversity and the processes affecting it; biosecurity; and access to and sharing of benefits from components of biodiversity and their economic value.

Environmental Law Toolkit--NSW ,2005 The Environmental Law Toolkit is a community guide to environmental law in New South Wales. It is intended to provide a practical resource for members of the community with an interest in using the law to protect the environment. In particular, this guide covers the following elements of environmental law: environmental planning and assessment; natural resource management; pollution management; biodiversity conservation; and natural and cultural heritage. The guide also includes a chapter on environmental advocacy, covering topics such as: submissions, letters and petitions; using the media; access to information; defamation law and safe speech; incorporating an environmental group; corporations and environmental advocacy; environmental protest and criminal law; and seeking legal advice and representation.

The Biology and Conservation of Australasian Bats Bradley Law, Peggy Eby, Lindy Lumsden, Daniel Lunney, 2011 This book, the Biology and Conservation of Australasian Bats, follows from the successful 3-day forum of the same name held in April 2007 at the Australian Museum. The forum was organised jointly by the Royal Zoological Society of NSW and the Australasian Bat Society.

Carnivores of Australia Alistair Glen, Christopher Dickman, 2014-11-05 The Australian continent provides a unique perspective on the evolution and ecology of carnivorous animals. In earlier ages, Australia provided the arena for a spectacular radiation of marsupial and reptilian predators. The causes of their extinctions are still the subject of debate. Since European settlement, Australia has seen the extinction of one large marsupial predator (the thylacine), another (the Tasmanian devil) is in danger of imminent extinction, and still others have suffered dramatic declines. By contrast, two recently-introduced predators, the fox and cat, have been spectacularly successful, with devastating impacts on the Australian fauna. *Carnivores of Australia: Past, Present and Future* explores Australia's unique predator communities from pre-historic, historic and current perspectives. It covers mammalian, reptilian and avian carnivores, both native and introduced to Australia. It also examines the debate surrounding how best to manage predators to protect livestock and native biodiversity. Readers will benefit from the most up-to-date synthesis by leading researchers and managers in the field of carnivore biology. By emphasising Australian carnivores as exemplars of flesh-eaters in other parts of the world, this book will be an important reference for researchers, wildlife managers and students worldwide.

Research Handbook on Fundamental Concepts of Environmental Law Douglas Fisher, 2022-11-25 This expanded and updated Research Handbook delivers an authoritative and in-depth guide to the conceptual foundations of environmental law. It offers a nuanced reflection on the underlying principles by exploring issues such as human rights, constitutional rights, sustainable development and environmental impact assessment within the context of environmental law.

Understanding Soils in Urban Environments Pam Hazelton, Brian Murphy, 2021-11-01 With an ever-increasing proportion of the world's population living in cities, soil properties such as salinity, acidity, water retention, erosion and pollution are becoming more significant in urban areas. While these are known issues for agriculture and forestry, as urban development increases, it is essential to recognise the potential of soil properties to create problems for the environment as well as structural concerns for buildings and other engineering works. *Understanding Soils in Urban Environments* explains how urban soils develop, change and erode. It describes their physical and chemical properties with a focus on specific soil problems that cause environmental damage, such as acid sulfate soils, and also affect the integrity of engineering structural works. This fully revised second edition addresses contemporary issues, including an increase in the use of green roofs and urban green space as well as manufactured soils in a variety of urban environments. *Understanding Soils in Urban Environments* provides a concise introduction to all aspects of soils in urban environments and will be extremely useful to

students in a wide range of disciplines, from soil science and urban forestry and horticulture, to planning, engineering, construction and land remediation, as well as to engineers, builders, landscape architects, ecologists, planners and developers.

These include: - Corporate social responsibility - Green buildings - Management efficiency The articles provide insight access to the thought-leaders of today.

Fisheries Management in Australia Daryl Peter McPhee, 2008 Whether it's throwing a fresh local prawn on the BBQ or dangling a line off the local jetty, fisheries resources are economically and socially important for many Australians. Australian fisheries have undergone significant management changes over the last decade and Australia is now recognised as a world leader. This book is a comprehensive analysis of fisheries management in Australia. It provides practical insight into the cross-disciplinary tools of fisheries management. It takes the reader away from the outdated notion of managing the fish to the reality of managing human behaviour. It does so without losing track of the fundamental need to consider the ecosystem and its components. The book covers a diverse range of contemporary topics including: sharing fisheries resources between commercial and recreational fishers, marine park planning, current regulatory and policy environments, consultative and participatory frameworks, by-catch mitigation and fisheries habitat management. It is a must for tertiary students studying fisheries, fisheries management professionals, the fishing industry and anyone else with an interest in how our valuable but finite fisheries resources are managed.

CSIRO List of Australian Vertebrates Mark Clayton, 2006 A fully updated, new edition of the definitive listing of Australia's vertebrates and their conservation status.

Indigenous Governance of Traditional Knowledge Neva Collings, 2023-08-17 This book addresses the issue of Indigenous peoples' participation in genetic resource access and benefit-sharing and associated traditional knowledge for self-determination. Genetic resources from nature are increasingly used in global biodiversity research and development, but they often use Indigenous peoples' traditional knowledge without their consent and without sharing the benefit. The Nagoya Protocol is an instrument of the Convention on Biological Diversity intended to ensure Indigenous peoples' traditional knowledge is used with their prior and informed consent or approval and entails benefit-sharing on mutually agreed terms. Many countries with significant Indigenous populations have signed the Nagoya Protocol and are currently grappling with implementation of its provisions. This book takes up a case study of Australia to demonstrate how Indigenous community governance in settler states can serve as a path to implementing the Nagoya Protocol. Australia's access and benefitsharing framework is globally hailed as best practice, offering lessons for other countries implementing the Nagoya

Protocol. Focusing on two Indigenous community organisations in Australia, the book establishes a unique evaluative framework for analysing and differentiating the governance arrangements used by Indigenous communities for facilitating decision-making related to traditional knowledge. This book will appeal to scholars working in the areas of international environmental law, human rights, biotechnology law, and Indigenous legal issues; as well as those directly engaged in implementing access and benefit-sharing measures and developing law reform strategies.

Global Forest Governance R. Maguire, 2013-03-01 This work provides an important, broad and legal critique and assessment of transnational trends, structures and innovations currently in use for managing forests.

Practical Conservation Biology David Lindenmayer, Mark Burgman, 2005-10-26 Practical Conservation Biology covers the complete array of topics that are central to conservation biology and natural resource management, thus providing the essential framework for under-graduate and post-graduate courses in these subject areas. Written by two of the world's leading environment experts, it is a 'must have' reference for environment professionals in government, non-government and industry sectors. The book reflects the latest thinking on key topics such as extinction risks, losses of genetic variability, threatening processes, fire effects, landscape fragmentation, habitat loss and vegetation clearing, reserve design, sustainable harvesting of natural populations, population viability analysis, risk assessment, conservation biology policy, human population growth and its impacts on biodiversity. Practical Conservation Biology deals primarily with the Australian context but also includes many overseas case studies. The book is the most comprehensive assessment of conservation topics in Australia and one of the most comprehensive worldwide. Winner of the 2006 Whitley Award for Best Conservation Text.

Status of Conservation and Decline of Amphibians Harold Heatwole, Jodi Rowley, 2018-06 Amphibians are among the most threatened groups of animals on earth. In part due to their highly permeable skin, amphibians are highly sensitive to environmental changes and pollution and provide an early-warning system of deteriorating environmental conditions. The more we learn about the impact of environmental changes on amphibians, the better we as humans will be able to arrest their demise, and our own. Status of Conservation and Decline of Amphibians brings together the current knowledge on the status of the unique frogs of Australia, New Zealand, and the Pacific. Although geographically proximate, each region presents unique challenges and opportunities in amphibian research and conservation. This book contributes to an understanding of the current conservation status of the amphibians of each region, aims to stimulate research into halting amphibian declines, and provides a better foundation for making conservation decisions. It is an invaluable reference for environmental and governmental agencies, researchers, policy-makers involved with biodiversity conservation, and the interested public.

An Environmental Court in Action Elizabeth Fisher, Brian Preston, 2022-07-28 This book provides a critical assessment of the New South Wales Land and Environmental Court (NSWLEC). Effective adjudication has become a key consideration

for environmental lawyers. One of the most important questions is whether environmental law frameworks need their own courts, with the conclusion being: yes they do. Here, a pioneer of such a court, the NSWLEC is forensically examined to see what it might teach other such courts. Showing a court 'in action' it suggests models that practitioners and policy makers might follow. It also speaks to the environmental law scholars, setting out a conceptual framework for studying such courts as legal institutions. This multi-faceted collection is invaluable to scholars and practitioners alike.

The Legal Protection of Foreign Investment Wenhua Shan, 2012-06-14 The law of foreign investment is at a crossroads. In the wake of an unprecedented global financial crisis and a sharp surge of investment arbitration cases, states around the world are reflecting on the pros and cons of the current liberal investment regime and exploring new ways ahead. This book brings together leading investment lawyers from more than 20 main jurisdictions of the world to tackle the challenge of producing a first comparative study of foreign investment law. Based on the General and National Reports presented at the 'Protection of Foreign Investment' Session at the 18th International Congress of the International Academy of Comparative Law (Washington DC, July 2010), the book is a unique resource for investment lawyers. Part I of the book presents a comparative overview of key aspects of foreign investment protection in the world today, including admission, investment contracts, treatment standards, tax regime and incentives, performance requirement, property and expropriation, monetary transfer and dispute settlement. Part II presents in-depth and detailed accounts of the investment laws of more than 20 jurisdictions, including Argentina, Australia, Canada, China, Croatia, Czech Republic, Ethiopia, France, Germany, Greece, Italy, Japan, South Korea, Macau, Peru, Portugal, Russia, Singapore, Slovenia, Turkey, the UK and the USA. The book will be an invaluable guide to legal and business communities with an interest in the law and practice of foreign investment in the world in general and in these jurisdictions in particular.
