Asians Wear Clothes on the Internet Minh-Ha T. Pham, 2015-11-13 In the first ever book devoted to a critical investigation of the personal style blogosphere, Minh-Ha T. Pham examines the phenomenal rise of elite Asian bloggers who have made a career of posting photographs of themselves wearing clothes on the Internet. Pham understands their online activities as “taste work” practices that generate myriad forms of capital for superbloggers and the brands they feature. A multifaceted and detailed analysis, *Asians Wear Clothes on the Internet* addresses questions concerning the status and meaning of “Asian taste” in the early twenty-first century, the kinds of cultural and economic work Asian tastes do, and the fashion public and industry’s appetite for certain kinds of racialized eliteness. Situating blogging within the historical context of gendered and racialized fashion work while being attentive to the broader cultural, technological, and economic shifts in global consumer capitalism, *Asians Wear Clothes on the Internet* has profound implications for understanding the changing and enduring dynamics of race, gender, and class in shaping some of the most popular work practices and spaces of the digital fashion media economy.

Everything Is Miscellaneous David Weinberger, 2008-04-29 Attempts to explain how new ways of classifying digital data will impact society.

Uncreative Writing Kenneth Goldsmith, 2011-09-20 Can techniques traditionally thought to be outside the scope of literature, including word processing, databasing, identity ciphery, and intensive programming, inspire the reinvention of writing? The Internet and the digital environment present writers with new challenges and opportunities to reconceive creativity, authorship, and their relationship to language. Confronted with an unprecedented amount of texts and language, writers have the opportunity to move beyond the creation of new texts and manage, parse, appropriate, and reconstruct those that already exist. In addition to explaining his concept of uncreative writing, which is also the name of his popular course at the University of Pennsylvania, Goldsmith reads the work of writers who have taken up this challenge. Examining a wide range of texts and techniques, including the use of Google searches to create poetry, the appropriation of courtroom testimony, and the possibility of robo-poetics, Goldsmith joins this recent work to practices that date back to the early twentieth century. Writers and artists such as Walter Benjamin, Gertrude Stein, James Joyce, and Andy Warhol embodied an ethos in which the construction or conception of a text was just as important as the resultant text itself. By extending this

tradition into the digital realm, uncreative writing offers new ways of thinking about identity and the making of meaning.
