*microsimulation modeling for health decision sciences using r* - Jun 21 2023  
 r is a programming language that has gained recognition within the field of decision modeling it has the capacity to perform microsimulation models more efficiently than software commonly used for decision modeling incorporate statistical analyses within decision models and produce more transparent models and reproducible results

**simulation models for decision making** coursera - May 20 2023  
 uncertainty leads to challenges in decision making mathematically we represent uncertainty by defining probabilities when several of the outcomes are possible in the future this module provides an overview of probability concepts that are essential to lay a good foundation for simulation modeling

**overview of decision models used in research decision and simulation** - Aug 23 2023

feb 18 2010 the fundamental tool of decision analysis is a decision analytic model most often a decision tree or a markov model a decision model provides a way to visualize the sequences of events that can occur following alternative decisions or actions in a logical framework as well as the health outcomes associated with each possible pathway
