 represents a certain symmetry in

nature forces always occur in pairs and  
 one body cannot exert a force on  
 another without experiencing a force  
 itself we sometimes refer to this law  
 loosely as action reaction where the  
 force exerted is the action and the force  
 experienced as a consequence is the  
 reaction

 web newton s third law of motion tells  
 us that forces always occur in pairs and  
 one object cannot exert a force on  
 another without experiencing the same  
 strength force in return we sometimes  
 refer to these force pairs as action  
 reaction pairs where the force exerted  
 is the action and the force experienced  
 in return is the reaction although

 web newton s third law of motion  
 describes the nature of a force as the  
 result of a mutual and simultaneous  
 interaction between an object and a  
 second object in its surroundings this  
 interaction results in a simultaneously  
 exerted push
