David J. Newlands, Mark J. Hooper

The Global Business Handbook David J. Newlands, Mark J. Hooper, 2009 The Global Business Handbook is based on the structure of the very successful IÄ0/00SEG International School of Management's programme on international management. Concentrating on the big developments that are currently happening internationally, the book considers how managers operating in the global business landscape must change what they do to create advantages and remain competitive.

International Business Charles W. L. Hill, 2012 'International Business' addresses the strategic, structural and functional implications of international business in firms around the world.

Global Strategy Vinod K. Jain, 2016-07-15 Global Strategy: Competing in the Connected Economy details how firms enter, compete and grow in foreign markets. Jain moves away from the traditional focus on developed countries and their multinational enterprises, instead focusing on both developed and emerging economies, as well as their interaction in an increasingly connected world. As the current global business environment is increasingly shaped—and connected—by faster technological developments, geopolitical forces, emerging economies, and new multinationals from those economies, this highly charged dynamic provides rich opportunity to revisit mainstream paradigms in globalization, innovation, and global strategy. The book rises to the challenge, exploring new competitive phenomena, new business models, and new strategies. Rich illustrations, real-world examples, and case data, provide students and executives with the insights necessary to connect, compete, and grow in a globalized business environment. This bold book succinctly covers strategy models and implementation for a range of global players, providing students of strategy and international business with a rich understanding of the contemporary business environment. For access to additional materials, including Powerpoint slides, a list of suggested cases, and sample syllabus, please contact Vinod Jain (vinod.jain01@yahoo.com).

The New Rules of Retail Robin Lewis, Michael Dart, 2010-12-07 The retail world is undergoing a fundamental

transformation. Rapidly evolving technology, globalization, and a saturated marketplace offer consumers instant access to thousands of equally compelling products and services, creating unprecedented levels of expectation. The impact of these changes is so profound that 50 percent of today's retailers and consumer companies will not survive it. Traditional business models will become extinct, and the relationship between vendors and consumers will shift dramatically. Here, industry experts Robin Lewis and Michael Dart identify the forces behind these changes and look at the retail heroes of today and tomorrow to see how their business models are responding to the modern marketplace. They profile industry giants such as VF Corporation (owner of Wrangler and The North Face), Starbucks, and Ralph Lauren, as well as cutting-edge favorites like Apple, Gilt Groupe, and Amazon, to uncover why some retailers are so successful at reaching today's increasingly elusive and demanding customer while others miss the mark by a mile. What they find are three crucial factors that determine whether businesses win or lose: *Neurological Connectivity -- creating an addictive, irresistible shopping experience, from preshopping anticipation to consumption satisfaction *Preemptive Distribution -- using all possible distribution platforms to access consumers ahead of the competition *Value Chain Control -- vertically integrating control of a company's entire value chain, from creation through point of sale, for maximum delivery on the brand promise This essential formula, Lewis and Dart argue, is responsible for virtually every retail success story of the past few decades. So while the landscape may never look the same, The New Rules of Retail gives business leaders the tools they need to not only survive, but thrive.
