*Ruins of Ancient Rome* Roberto Cassanelli, 2002 Traditionally a critical component of the education of any architect was to draw the ruins of ancient Rome, reconstructing either from ancient sources or, more often, pure fantasy, what the original structures must have looked like. From this training emerged generations of architects imbued with the aesthetic ideals that would form the Neoclassical and Beaux-Arts building styles. In this magnificently printed volume are reproduced some of the most extraordinarily handsome drawings of the ruins of ancient Rome made by French Prix de Rome architects from 1775 through 1925. Accompanied by text that explains how the Prix de Rome was awarded and the significance of the prize in the history of architecture, as well as how the study of ancient models formed the basis for nineteenth- and early twentieth-century architectural styles, these drawings provide an invaluable understanding of how the modern imagination recorded and transformed ancient fragments into a modern architectural idiom.

The Temple of Peace in Rome Pier Luigi Tucci, 2017-11-16 In this magisterial two-volume book, Pier Luigi Tucci offers a comprehensive examination of one of the key complexes of Ancient Rome, the Temple of Peace. Based on archival research and an architectural survey, his research sheds new light on the medieval, Renaissance, and Baroque transformations of the basilica, and the later restorations of the complex. Volume 1 focuses on the foundation of the complex under Vespasian until its restoration under Septimius Severus and challenges the accepted views about the ancient building. Volume 2 begins with the remodelling of the library hall and the construction of the rotunda complex, and examines the dedication of the Christian Basilica of SS Cosmas and Damian. Of interest to scholars in a range of topics, The Temple of Peace in Rome crosses the boundaries between classics, archaeology, history of architecture, and art history, through Late Antiquity, the Middle Ages, and the early modern period.

**The Architecture of the Roman Triumph** Maggie L. Popkin, 2016-07-22 This book offers the first critical study of the architecture of the Roman triumph, ancient Rome's most important victory ritual. Through case studies ranging from the republican to imperial periods, it demonstrates how powerfully monuments shaped how Romans performed, experienced, and remembered triumphs and, consequently, how Romans conceived of an urban identity for their city. Monuments highlighted Roman conquests of foreign peoples, enabled Romans to envision future triumphs, made triumphs more memorable through emotional arousal of spectators, and even generated distorted memories of triumphs that might never have occurred. This book illustrates the far-reaching impact of the architecture of the triumph on how Romans thought about this ritual and, ultimately, their own place within the Mediterranean world. In doing so, it offers a new model for historicizing the interrelations between monuments, individual and shared memory, and collective identities.

**From Constantine to Charlemagne** Neil Christie,2016-12-05 This book offers an overview of the archaeological and structural evidence for one of the most vital periods of Italian history, spanning the late Roman and early medieval periods. The chronological scope covers the adoption of Christianity and the emergence of Rome as the seat of Western Christendom, the break-up of the Roman west in the face of internal decay and the settlement of non-Romans and Germanic groups, the impact of Germanic and Byzantine rule on Italy until the rise of Charlemagne and of a Papal State in the later eighth century. Presenting a detailed review and analysis of recent discoveries by archaeologists, historians, art historians, numismatists and

architectural historians, Neil Christie identifies the changes brought about by the Church in town and country, the level of change within Italy under Rome before and after occupation by Ostrogoths, Byzantines and Lombards, and reviews wider changes in urbanism, rural exploitation and defence. The emphasis is on human settlement on its varied levels - town, country, fort, refuge - and the assessment of how these evolved and the changes that impacted on them. Too long neglected as a 'Dark Age', this book helps to further illuminate this fascinating and dynamic period of European history.
