Teoría del aprendizaje transformador Leonardo Alfonso Sánchez Vanegas,2024-09-15 Teoría del Aprendizaje

Transformador presenta una propuesta innovadora en el campo de la educación para jóvenes y adultos víctimas del conflicto armado en Colombia. Leonardo Alfonso Sánchez Vanegas desarrolla el Modelo Educativo Flexible (MEF) Escuela Global, un enfoque pedagógico basado en competencias que busca responder a las necesidades educativas de una población vulnerable. A través de un análisis riguroso y una metodología mixta, que combina estudios empíricos y técnicas interpretativas, el autor explora cómo la violencia y el desplazamiento han afectado el acceso y la permanencia en el sistema educativo formal. El libro no solo describe los desafíos a los que se enfrentan estas comunidades, sino que también propone soluciones concretas a través de una educación flexible, adaptada a los contextos rurales y urbanos marginales. En este sentido, el MEF Escuela Global se erige como una herramienta clave para la reconstrucción social y el desarrollo sostenible en el marco del postconflicto. La obra es de particular interés para educadores, investigadores y formuladores de políticas educativas, ya que ofrece una visión integral sobre la importancia de un enfoque educativo transformador que fomente la equidad, la inclusión y el liderazgo comunitario. Este trabajo aporta una contribución significativa al campo de las ciencias de la educación y la pedagogía en contextos de conflicto y vulnerabilidad social.

José Rivera Ramírez, un sacerdote diocesano Demetrio Fernández González,2004

Neuroeducación de profesores y para profesores María Caballero,2017-09-14 La sociedad ha cambiado y los alumnos tienen nuevas necesidades que hacen que ser profesor ahora sea muy diferente. El maestro del siglo xxi necesita, además de conocimientos sobre su materia, herramientas que le permitan atender correctamente a esta nueva realidad. Para conseguirlo, una nueva ciencia, la Neuroeducación, ofrece una herramienta muy poderosa que ayuda a enseñar y aprender atendiendo al propio órgano encargado de todo el proceso: el cerebro. Porque el cerebro humano ha evolucionado para educar y ser educado, y ser capaces de explicar y comprender los procesos cerebrales que están en la base del aprendizaje - la memoria, las emociones, los sentimientos, etc. - nos ayuda a modificar las estrategias pedagógicas para adecuarlas a las características de cada persona y sus necesidades específicas, consiguiendo así que nuestros métodos de enseñanza se

adapten a las etapas del desarrollo evolutivo y a las diferencias individuales. En esta obra se exponen las bases neurales, resumiendo lo principal y estableciendo su significado para el proceso educativo, pero manteniendo una orientación práctica, que si bien impregna toda la obra, tiene un reflejo especial en los apartados denominados «¿Qué puede hacer el profesor en el aula?». La presentación es muy amena y práctica, con ejemplos, cuadros y esquemas. De este modo, se plantea el cambio en la metodología del profesor como una de las bases de la transformación de la escuela, y se demuestra con ejemplos tomados de la práctica diaria de su autora como docente, estableciendo un puente de conexión entre la Neurociencia y las habilidades que hay que desarrollar en el ámbito educativo.

Selección de lecturas Pedagogía-Psicología: la labor del maestro desde su praxis educativa: algo más que el currículo ,2020-09-09 La escuela como institución formadora tiene como objetivo educar la personalidad del educando para que este se inserte en su medio social y pueda participar y generar espacios sensibles y críticos, porque la enseñanza que deja huella en el corazón, es una verdadera enseñanza de la razón. Y esa es la enseñanza que se propone implementar en las aulas de todos los días: un espacio para que profesores y alumnos construyan Zonas de Desarrollo Próximos, (ZDP) siempre potenciales, enriquecidas con la experiencia del sujeto. Se exige una escuela transformadora y sensible, productora de destrezas-habilidades y conformadoras de competencias; transmisora de valores. Se pide una escuela distinta, inclusiva.

Social Alternatives in Southern Europe and Latin America Montserrat Duch-Plana,Josep M. Pons-Altés,2024-03-19 This book deals with the evolution of initiatives connected to the social and solidarity economy and their political cultures and educational implications in the south of Europe and in Latin America. Employing a comparative perspective, the contributors present 11 studies of these trajectories in Argentina, Chile, Portugal, France, Italy, Spain, and Catalonia in order to engender familiarity with social tributary practices and projects in the Latin world. As the cyclical crises of capitalism and their resulting inequalities have created proposals of reform and brought them into action, certain shared ideological influences and policies have emerged across these societies. Faced with the interpretative schemes used for the Anglo-Saxon sphere, which have been the usual reference in international research, this volume's geographical and cultural matrix of analysis helps fill a longstanding gap in this field. The book will be of interest to scholars, educators, and students specialising in the history and political science of the social and solidarity economy sectors, as well as professionals involved in cooperatives, mutual aid societies, and associations.

Cognición, neurociencia y aprendizaje María Angélica Pease,Flavio Figallo,Liz Ysla,2016-02-01 Debate sobre la realidad de los adolescentes que acceden a la educación superior en el cual participan diversas disciplinas: psicología,

neurociencia, sociología, biología, ingeniería, educación y medicina. La investigación multidisciplinaria en este campo es reciente, sobre todo en lo que se refiere a cómo los adolescentes aprenden, procesan información y construyen conocimientos. Dado que aún prevalece la visión del joven estudiante como un individuo con carencias y debilidades frente a los adultos —con un cerebro inacabado y capacidades incompletas—, este trabajo resulta fundamental para cambiar esta mirada reduccionista y negativa. A través de los artículos de este libro se trata a los adolescentes universitarios bajo una óptica distinta, como sujetos de aprendizaje con grandes potencialidades y mentes que se pueden estimular mediante procesos de enseñanza adecuados. Se trata de una lectura que ayudará a identificar los aspectos que permitan desarrollar las capacidades de los adolescentes en la educación superior, con miras a proponer estrategias para que los docentes mejoren sus prácticas y alcancen sus objetivos.

Una triple alianza para un aprendizaje universitario de calidad Juan Carlos Torre Puente,2010-11-01 El aprendizaje universitario está determinado por factores personales, interpersonales, sociales, culturales, disciplinares y contextuales. En este libro se analizan tres aspectos de índole personal que conducen a la consecución de un aprendizaje de calidad: la autosuficiencia, la autorregulación y los enfoques de aprendizaje adoptados por los estudiantes.
