The one ...

Python: 'super' object has no attribute 'attribute_name' After the base class's `__init__` ran, the derived object has the attributes set there (e.g. `some_var`) as it's the very same object as the self in the derived class' `__init__`. You can and should just ... *super () in Java* - Stack Overflow Sep 22, 2010 · `super()` is a special use of the super keyword where you call a parameterless parent constructor. In general, the super keyword can be used to call overridden methods, ...

How does Python's super () work with multiple inheritance? In fact, multiple inheritance is the only case where `super()` is of any use. I would not recommend using it with classes using linear inheritance, where it's just useless overhead. *python - replace block within { { super () } }* - Stack Overflow In the child template, I would like to include everything that was in the head block from the base (by calling `{{ super() }}`) and include some additional things, yet at the same time replace the ...
