Manga and Anime Go to Hollywood Northrop Davis,2015-12-17 The media industries in the United States and Japan are similar in much the same way animals on earth share a similar DNA, but while a horse and a kangaroo maybe 95% related on a biological level, they are also very different - this is the way it is with manga/anime in Japan and Hollywood animation/movies/TV. Although sharing some key common origins, they developed mostly separately but influenced each other significantly along the way. That confluence is now accelerating into new forms of hybridization that will drive much of future storytelling entertainment. Understanding these common and divergent DNA origins, the cross-influences and the independent traits is one of many reasons why this book is so important. Through original interviews with top creators in these fields and illuminating case studies including adaptations of Japanese mangas and animes for Hollywood remakes, *Manga and Anime go to Hollywood* analyzes the specific dynamics of this confluence between Japanese manga/anime and American film,animation and television. In addition, it shows how to use this knowledge creatively to shape the future of global narrative storytelling, including through the educational system. It is a fascinating to any reader with an interest in the inter-related history of Japanese manga/anime and Hollywood since the Meiji period through WW2, what is happening on the cutting edge right now - and into the future.

Dis-Orienting Planets Isiah Lavender III,2017-04-07 Contributions by Suparno Banerjee, Cait Coker, Jeshua Enriquez, Joan Gordon, Veronica Hollinger, Malisa Kurtz, Stephanie Li, Bradford Lyau, Uppinder Mehan, Graham J. Murphy, Baryon Tensor Posadas, Amy J. Ransom, Robin Anne Reid, Haerin Shin, Stephen Hong Sohn, Takayuki Tatsumi, and Timothy J. Yamamura Isiah Lavender III's Dis-Orienting Planets amplifies critical issues surrounding the racial and ethnic dimensions of science fiction. This edited volume explores depictions of Asia and Asians in science fiction literature, film, and fandom with particular regard to China, Japan, India, and Korea. Dis-Orienting Planets highlights so-called yellow and brown peoples from the constellation of a historically white genre. The collection launches into political representations of Asian identity in science fiction's imagination, from fear of the Yellow Peril and its racist stereotypes to techno-Orientalism and the remains of a postcolonial heritage. Thus the essays, by contributors such as Takayuki Tatsumi, Veronica Hollinger, Uppinder Mehan, and Stephen Hong Sohn, reconfigure the very study of race in science fiction. A follow-up to Lavender's Black and Brown Planets, this collection expands the racial politics governing the renewed visibility of Asia in science fiction. One of the few on this subject, the volume probes Gary Shteyngart's novel Super Sad True Love Story, the acclaimed film Cloud Atlas, and Guillermo del Toro's monster film Pacific Rim, among others. Dis-Orienting Planets embarks on a wide-ranging assessment of Asian representations in science fiction, upon the determination that our visions of the future must include all people of color.

Weapons Technology Sabine Lorca,AI,2025-03-10 Weapons Technology explores the fascinating relationship between real-world military technology and its depiction in manga. The book examines how advancements in weapon systems, from firearms to cyber warfare and drone technology, are reimagined in popular manga series. By analyzing the technological aspects of both, the book reveals how manga often reflects, and potentially shapes, public perceptions of advanced military technology. The book provides a historical and technological context for understanding weapon systems, tracing their

evolution and exploring the science behind them. It analyzes specific manga series, demonstrating how real-world technologies like advanced armor systems and futuristic combat scenarios are adapted into fictional narratives. This approach highlights the influence of actual military innovation on imaginative storytelling. Organized into three parts, the book first introduces fundamental concepts of weapons technology. Next, it presents manga case studies that examine how these technologies are incorporated and adapted. Finally, it synthesizes these observations to reveal broader patterns of influence and discusses the ethical implications, making it valuable for anyone interested in the intersection of technology, military history, and culture.

The Untimely Art of Scribble Victoria de Rijke, 2023-05-29 This book offers new definitions, vocabularies and insights for “scribbling”, viewing it as a fascinating and revealing process shared by many different disciplines and practices. The book provides a fresh and timely perspective on the nature of mark making and the persistence of the gestural impulse from the earliest graphic marks to the most sophisticated artistic production. The typical treatment of scribbling in the literature of artistic development has cast the practice as a prelude to representation in drawing and writing, with only occasional acknowledgment of the continuing joy and experiment of making marks across many arts practices. The continuous line the author traces between the universal practice of scribbling in infancy and early childhood and the work of radical creativity for contemporary and historical artists is original and clarifying, expanding the range of drawing behaviors to that of avant-garde painters, performance and the digital.
