**Creation Myths of the World** David A. Leeming, 2009-12-18 The most comprehensive resource available on creation myths from around the world—their narratives, themes, motifs, similarities, and differences—and what they reveal about their cultures of origin. ABC-CLIO's breakthrough reference work on creation beliefs from around the world returns in a richly updated and expanded new edition. From the Garden of Eden, to the female creators of Acoma Indians, to the rival creators of the Basonge tribe in the Congo, *Creation Myths of the World: An Encyclopedia, Second Edition* examines how different cultures explain the origins of their existence. Expanded into two volumes, the new edition of *Creation Myths of the World* begins with introductory essays on the five basic types of creation stories, analyzing their nature and significance. Following are over 200 creation myths, each introduced with a brief discussion of its culture of origin. At the core of the new edition is its enhanced focus on creation mythology as a global human phenomenon, with greatly expanded coverage of recurring motifs, comparative themes, the influence of geography, the social impact of myths, and more.

*CREATION, Myths Old and New* Colin Jamieson, 2014-10-28 Sir Karl Popper, the great philosopher, said, 'The real mystery in life is that the universe itself seems to be creative.' This book is an introduction to creativity with an essay on the connection between faith and fiction. It contains a few of the author's favorite ancient cultural myths, some folktales of recent times, and some original stories. These are ideal for reading to children. This book includes stories for families from our ancestors great and unknown; some are contemporary individualistic doodles in the sands of time that readers may simply enjoy. All of us should be telling the stories of our imaginations for the sake of our children and future generations, not only for their pleasure but wherein they might find a way forward through the mysteries and changes in life. The book has commentaries on the myths and finishes with an explanation of the purpose of myths that concludes with a challenge for modern myth making.

**The Creation of Inequality** Kent Flannery, Joyce Marcus, 2012-05-15 Flannery and Marcus demonstrate that the rise of inequality was not simply the result of population increase, food surplus, or the accumulation of valuables but resulted from conscious manipulation of the unique social logic that lies at the core of every human group. Reversing the social logic can reverse inequality, they argue, without violence.

*The Speed of Light* David A. Grandy, 2009-07-06 Light -- our experience of light, our measurement of light, and the notion that light speed is constant -- can be understood to mark our interface with the cosmos. David A. Grandy's book moves from the scientific to the existential, from Einstein to Merleau-Ponty, from light as a phenomenon to light as that which is constitutive of reality. To measure the speed of light is to measure something about the way we are measured or blended into the cosmos, and that universal blending predetermines our measurement of light speed in favor of a universal or constant value. It's quite a trip, one aimed at scientists who have pondered light speed constancy, philosophers inclined to question the idea that mind and world are distinct, and scientifically or philosophically inclined persons who enjoy stretching themselves in new ways.

Interrogating Human Origins Martin Porr, Jacqueline Matthews, 2019-12-06 Interrogating Human Origins encourages new critical engagements with the study of human origins, broadening the range of approaches to bring in postcolonial theories, and begin to explore the decolonisation of this complex topic. The collection of chapters presented in this volume creates spaces for expansion of critical and unexpected conversations about human origins research. Authors from a variety of disciplines and research backgrounds, many of whom have strayed beyond their usual disciplinary boundaries to offer their unique perspectives, all circle around the big questions of what it means to be and become human. Embracing and encouraging diversity is a recognition of the deep complexities of human existence in the past and the present, and it is vital

to critical scholarship on this topic. This book constitutes a starting point for increased interrogation of the important and wide-ranging field of research into human origins. It will be of interest to scholars across multiple disciplines, and particularly to those seeking to understand our ancient past through a more diverse lens.

**The Incest Theme in Literature and Legend** Otto Rank, 1992 Among the strictly scientific applications of analysis to literature, Rank's exhaustive work on the theme of incest easily takes the first place.--Sigmund Freud.

The Conflict of the Ages Teacher Edition I The Scientific History of Origins Michael J. Findley, Mary C. Findley, Teacher Edition includes complete student text, review questions, vocabulary, and answer keys. The Conflict of the Ages is a Multi-Part exploration of History, Science and ancient Literature. This first installment covers the concepts of God, time, Creation, physics, cosmology, and specifics about each day of Creation. We make comparisons with ancient sources to see where they agree with the Scriptural account. We reference classic and modern scientific views, exposing errors, preconceptions, presuppositions and falsehoods taught as fact by the mainstream scientific community. God is the first witness and the Bible the first eyewitness account of beginnings and origins. Other ancient documents contain at least some truths and parallel accounts.

Bully Beef & Balderdash Graham Wilson, 2012-03-15 The Australian Imperial Force, first raised in 1914 for overseas war service, became better known by its initials - the AIF. There was a distinct character to those who enlisted in the earliest months and who were destined to fight on Gallipoli. During the war the AIF took its place among the great armies of the world, on some of history's oldest battlefields. The Australians would attack at the Dardanelles, enter Jerusalem and Damascus, defend Amiens and Ypres, and swagger through the streets of Cairo, Paris, and London, with their distinctive slouch hats and comparative wealth of six shillings per day. However, the legend of the AIF is shrouded in myth and mystery. Was Beersheba the last great cavalry charge in history? Did the AIF storm the red light district of Cairo and burn it to ground

while fighting running battles with the military police? Was the AIF the only all-volunteer army of World War I? Graham Wilson's *Bully Beef and Balderdash* shines an unforgiving light on these and other well-known myths of the AIF in World War I, arguing that these spectacular legends simply serve to diminish the hard-won reputation of the AIF as a fighting force. Graham Wilson mounts his own campaign to rehabilitate the historical reputation of the force and to demonstrate that misleading and inaccurate embellishment does nothing but hide the true story of Australia's World War I fighting army. *Bully Beef and Balderdash* deliberately tilts at some well-loved windmills and, for those who cherish the mythical story of the AIF, this will not be comfortable reading. Yet, given the extraordinary truth of the AIF's history, it is certainly compelling reading.

An annotated Further Reading list of books and articles about the site completes each entry.

The Universal Myths Alexander Eliot, Joseph Campbell, 1990-02-01 Crossing the boundaries of time, region, and culture, universal myths have provided inspiration and guidance for countless generations—laying a foundation for the religious, social, and political heritage of nations and peoples since the beginning of time. Here is a rich and absorbing survey of the common myths that connect all cultures, Eastern and Western, from antiquity to the present day. With stunning power, the stuff of legend is explored in all its drama and magnificence. There are stories of gods and men—and legendary heroes from Zeus to King Arthur to the “Superman” of modern media; tales of heaven, earth, and the origins of man from Hindu, American Indian, and Western thought; and retellings of mythic quests and legendary lovers, from the epic wanderings of Odysseus to the tragedy of Tristram and Iseult and the Krishna marriage of Heaven and Earth. This extraordinary work, compiled and arranged by theme from stories of creation to tales of death and rebirth, examines and compares the world's myths that have shaped our common past and continue to influence us still.

*The Conflict of the Ages Teacher III They Deliberately Forgot: The Flood and the Ice Age* Michael J. Findley, Mary C. Findley, Includes full student text, review questions, vocabulary, and answer keys. The worldwide Flood is one of the most discounted records in the Scriptures. Yet it is supported around the world by historical accounts. Take a look at feasibility studies on the safety and the stocking of the Ark. The Geologic Column ought to prove that fossils reveal the age of the earth. They show progression from simple to complex organisms over millions of years. But do they? Take a look at living fossils. Meet the extinct creature found only in the oldest layers but more complex than later life forms. Consider the real conditions that surrounded the Flood and the Ice Age.
