Law and Regulation of Aerodromes Dr. Ruwantissa Abeyratne, 2014-04-02 This book encapsulates in detail the principles pertaining to legal and regulatory aspects of aerodromes. As the title denotes, it discusses the various aspects of the structure and functioning of an aerodrome and the complexities involved. It focuses on the law and regulation of aerodrome certification and planning, aerodrome services, financial and economic planning, security, management and governance. The airport industry is one of the fastest growing within the aviation industry, requiring innovation and creativity in management. This in turn has called for an increased focus on advanced management programmes for airport managers and lawyers. The Airport Management Professional Accreditation Programme (AMPAP) offered worldwide by the International Civil Aviation Organization and Airports Council International, and the Angkasa Pura II Airport Management Excellence Programme of Indonesia are two such initiatives which give airport professionals a sound grounding on the principles and techniques of management and law.

Legal and Ethical Regulation of Biomedical Research in Developing Countries Remigius N. Nwabueze, 2016-04-22 There has been a rapid increase in the pace and scope of international collaborative research in developing countries in recent years. This study argues that whilst ethical regulation of biomedical research in Africa and other developing countries has attracted global attention, legal liability issues, such as the application of common law rules and the development of legally enforceable regulations, have been neglected. It examines some of the major research scandals in Africa and suggests a new ethical framework against which clinical trials could be conducted. The development of research guidelines in Uganda, Tanzania, Malawi and Nigeria are also examined as well as the role of ethics committees. Providing a detailed analysis of the law of negligence and its application to research ethics committees and their members, common law and constitutional forms of action and potential negligence claims, the book concludes by suggesting new protocols and frameworks, improved regulation and litigation. This book will be a valuable guide for students, researchers, and policy-makers with an interest in medical law and ethics, bioethics, customary law in Africa and regulation in developing countries.

Regulating Reproduction Emily Jackson, 2001-10-10 This new book provides a clear and accessible analysis of the various ways in which human reproduction is regulated. A comprehensive exposition of the law relating to birth control, abortion,

pregnancy, childbirth, surrogacy and assisted conception is accompanied by an exploration of some of the complex ethical dilemmas that emerge when one of the most intimate areas of human life is subjected to regulatory control. Throughout the book, two principal themes recur. First, particular emphasis is placed upon the special difficulties that arise in regulating new technological intervention in all aspects of the reproductive process. Second, the concept of reproductive autonomy is both interrogated and defended. This book offers a readable and engaging account of the complex relationships between law, technology and reproduction. It will be useful for lecturers and students taking medical law or ethics courses. It should also be of interest to anyone with a more general interest in women's bodies and the law, or with the profound regulatory consequences of new technologies.

The Umbilical Cord Blood Controversies in Medical Law Karen Devine, 2017-01-12 Since the therapeutic value of umbilical cord blood (UCB) stem cells was first recognised in the late 1980s, there has been a proliferation of both public and private UCB banks worldwide. However, the ability to utilise such a potentially valuable resource has provoked a number of controversies. In a distinctly accessible style, this book unpacks the socio-legal implications of the UCB collection process and constructs a detailed analysis of the law and ethics that surrounds UCB banking in the UK, including ownership of the cells. Its enquiry is located within the theoretical framework of altruism versus self-interest and explores the notions of risk and choice associated with this distinctive blend of public/private healthcare provision. The book evaluates the impact of the Human Tissue Act 2004 and the European Union Tissues and Cells Directive (2004/23/EC) on the UCB industry and provides a unique insight into the effect that the law may have on the NHS whose maternity staff and premises are used to collect UCB. This book would be of interest primarily to a UK readership in addition to expectant families, health professionals, students, academics, practitioners and the UCB industry elsewhere in the world.

Bioequity - Property and the Human Body Nils Hoppe, 2016-04-15 Recent scandals involving the use of human body parts have highlighted the need for legal clarification surrounding property law and the use of human tissue. This book advances the notion that the legal basis for dealing with this is already available in the law but has thus far neither been used nor discussed. Proposing an alternative approach to constructing entitlements in human tissue and resolving resulting property conflicts, a new methodology is also advanced for abstracting different concepts within the debate which enables comparison and distinction between different cases of entitlement and retention.

Flying in the Face of Criminalization Sofia Michaelides-Mateou, Andreas Mateou, 2016-04-15 Two parallel investigations take place after every aviation accident: one technical, one judicial. The former must be conducted with the sole intention of making safety recommendations to prevent the recurrence of similar accidents. The judicial investigation, however, has the intention of identifying those parties that have been at fault and to apportion blameworthiness for criminal and civil liability. Consequently, this results in a predicament for those parties that have been identified as having played a role in the accident, a dilemma between not supplying information aimed at enhancing safety and preventing future accidents and, on the other hand, supplying such information which may possibly be used against them in subsequent criminal prosecution. The situation is compounded by inconsistent approaches between different legal systems; aviation professionals may find themselves faced with criminal charges in one country but not in another, and they may also be unsure as to whether statements given during the technical investigation could be used against them in a court of law. Aviation safety is, to a large extent, built upon the trust placed by pilots, ATCOs and other aviation professionals in the process of accident investigation. This book examines the growing trend to criminalize these same people following an accident investigation and considers the implications this has for aviation safety.
