Tony Addison, Alan Roe

The Report: Cote d'Ivoire 2020 Oliver Cornock, Côte d'Ivoire is an economic powerhouse in West Africa, posting average growth of 8% between 2011 and 2018. However, the rate of GDP growth in real terms fell to 6.7% in 2019 and is expected to contract to 2.7% in 2020 due to the Covid-19 pandemic and subsequent widespread shutdowns. Looking to the future, the IMF expects growth to rebound to 8.7% in 2021, highlighting the country's economic resilience.

The Report: Cote d'Ivoire 2019, Côte d'Ivoire has returned to economic growth after stabilising its political situation in 2011. The economy has grown at a rate of 9% per year since 2011, in part due to the emergence of its burgeoning industrial sector. As one of the fastest-growing African economies, with an annual GDP growth rate forecast at 7-7.5% in 2019, Côte d'Ivoire is now promoting sustainable and inclusive growth.

Africa 2.0 Russell Southwood, 2022-07-12 Africa wired up provides an important history of how two technologies – mobile calling and internet – were made available to millions of Sub-Saharan Africans and the impact they have had on their lives. The book deals with the political challenges of liberalization and privatization that needed to be in place to get these technologies built. It analyses how the mobile phone fundamentally changed communications in Sub-Saharan Africa and the ways Africans have made these technologies part of their lives. It examines critically the technologies' impact on development practices and the key role development actors played in accelerating things like regulatory reform, fibre roll-out and mobile money. The book considers how corruption in the industry is a prism through which patronage relationships in Government can be understood. The arrival of a start-up ecosystem has the potential to break these relationships and offer a new wave of investment opportunities. The author seeks to go beyond the hype to make a provisional assessment of the kinds of changes that have happened over three decades. It examines how and why these technologies became transformative and seem to have opened out a very different future for Sub-Saharan Africa.

Introduction to Côte d'Ivoire Gilad James, PhD, 2019-12-09 Côte d'Ivoire, or the Ivory Coast, is a country located in West Africa that borders the Gulf of Guinea. It is known for being the world's largest producer of cocoa beans, as well as for its vibrant cultural heritage. The country is home to over 25 million people, with the majority of the population being of African descent. The official language of Côte d'Ivoire is French, although local languages such as Baoulé, Dioula, and Anyin are also spoken. Côte d'Ivoire has a rich history that dates back to pre-colonial times. The country was first colonized by the French in

the late 19th century and gained independence in 1960. Since then, it has experienced periods of political instability, including a civil war that lasted from 2002 to 2011. Despite these challenges, Côte d'Ivoire has continued to develop its economy, which is largely driven by agriculture, including the production of coffee, cocoa, and palm oil. The country has also made progress in areas such as education and healthcare, although poverty and inequality persist in many parts of the country.

Business Opportunities, Start-ups, and Digital Transformation in Africa Herkulaas MvE Combrink, Tobias Knedlik, Samia Satti Osman Mohamed Nour, Ulrike Schuerkens, Katinka de Wet, Karl Wohlmuth, 2023 Volume 23 (2022/2023) of the African Development Perspectives Yearbook focusses on the issues of digital entrepreneurship, digital start-ups, and digital business opportunities in Africa. It investigates links between digitalization and development of productive capacities. It deals with business opportunities created by the digital transformation. It discusses the role of universities in the digital transformation process. It also presents book reviews and book notes. Country case studies include Senegal, Ghana, Ivory Coast, and South Africa.

Africa's Development Dynamics 2021 Digital Transformation for Quality Jobs African Union Commission, OECD, 2021-01-19 Africa's Development Dynamics uses lessons learned in the continent's five regions – Central, East, North, Southern and West Africa – to develop policy recommendations and share good practices. Drawing on the most recent statistics, this analysis of development dynamics attempts to help African leaders reach the targets of the African Union's Agenda 2063 at all levels: continental, regional, national and local.

Cases on Entrepreneurship and Innovation Jana Schmutzler, Lorena A. Palacios-Chacón, Samantha Burvill, Veneta Andonova, 2024-07-05 Cases on Entrepreneurship and Innovation bridges the gap between the real-world complexities of diverse innovative and entrepreneurial endeavours in challenging environments and the academic classroom setting. It serves as an essential toolkit for academics and instructors, providing clear teaching guidance and tailoring real-world scenarios to be more relatable and context-relevant for students across the globe.

Nigeria's Soft Power in Anglophone West Africa Fidel Abowei, 2023-08-25 This book investigates Nigeria's soft power capabilities in West Africa, demonstrating the extent to which the power of attraction may serve the country's foreign policy interests. With the increasing popularity of internationally acclaimed cultural outputs, including afrobeat, Nollywood, and charismatic Pentecostalism, and a foreign policy disposition that is altruistic and sparsely transactional, there is increasing interest in how these soft power attributes influence perceptions of Nigeria in Africa. Drawing on extensive original research in Ghana and Liberia, this book highlights the attractive and unattractive elements of Nigeria's soft power potential. In so far as it makes the case for Nigeria's soft power in West Africa, it also discusses the challenges encumbering the effective deployment of the full range of Nigeria's soft power capabilities in the operationalization of its African policy. This book is a

timely contribution to prevailing scholarly discussions about the nature and utility of soft power in Africa. It will be of interest to both Africanists and researchers of international relations, foreign policy, and political science more broadly.

The Report: Cote d'Ivoire 2022 Oliver Cornock, After achieving a region-leading economic recovery in the decade since political stability was established, future growth and industrialisation strategy will continue to be shaped by the National Development Plan 2021-25, which constitutes a holistic approach to achieving emerging market status and meaningful poverty reduction by 2030.

Development Co-operation Report 2021 Shaping a Just Digital Transformation OECD, 2021-12-21 Digital transformation is revolutionising economies and societies with rapid technological advances in AI, robotics and the Internet of Things. Low and middle-income countries are struggling to gain a foothold in the global digital economy in the face of limited digital capacity, skills, and fragmented global and regional rules.

Food Systems in Africa Gaëlle Balineau, Arthur Bauer, Martin Kessler, Nicole Madariaga, 2021-02-08 Rapid population growth, poorly planned urbanization, and evolving agricultural production and distribution practices are changing foodways in African cities and creating challenges: Africans are increasingly facing hunger, undernutrition, and malnutrition. Yet change also creates new opportunities. The food economy currently is the main source of jobs on the continent, promising more employment in the near future in farming, food processing, and food product distribution. These opportunities are undermined, however, by inefficient links among farmers, intermediaries, and consumers, leading to the loss of one-third of all food produced. This volume is an in-depth analysis of food system shortcomings in three West African cities: Abidjan, Côte d'Ivoire; Rabat, Morocco; and Niamey, Niger. Using the lens of geographical economics and sociology, the authors draw on quantitative and qualitative field surveys and case studies to offer insightful analyses of political institutions. They show the importance of "hard" physical infrastructure, such as transport, storage, and wholesale and retail market facilities. They also describe the "soft" infrastructure of institutions that facilitate trade, such as interpersonal trust, market information systems, and business climates. The authors find that the vague mandates and limited capacities of national trade and agriculture ministries, regional and urban authorities, neighborhood councils, and market cooperatives often hamper policy interventions. This volume comes to a simple conclusion: international development policy makers and their financial and technical partners have neglected urban markets for far too long, and now is the time to rethink and reinvest in this complex yet crucial subject.

The Report: Côte d'Ivoire 2015 Oxford Business Group, 2015-03-19 The IMF forecasts over 7.5% average growth through to 2017, but attracting private investment both to large infrastructure developments and lower-profile industrial projects will be key to ensuring social stability. Despite regional competition from Senegal and Ghana in terms of investment attractiveness, Côte d'Ivoire is likely to regain its place as an economic centre if it can successfully revise its hard and soft

infrastructure. Although progress has been made, the possibility of political unrest remains, prompting concerns over the presidential elections set for October 2015. The preservation of peace and economic recovery will depend on the outcome of the elections and the ability of the new government to continue the reconciliation agenda.

Dynamiques du développement en Afrique 2021 Transformation digitale et qualité de l'emploi African Union Commission, OECD, 2021-01-19 Dynamiques du développement en Afrique tire les leçons des expériences des cinq régions du continent – Afrique australe, centrale, de l'Est, du Nord et de l'Ouest – pour développer des recommandations en matière de politiques publiques et partager les bonnes pratiques. Étayé par les plus récentes statistiques, son décryptage des dynamiques de développement vise à permettre aux leaders africains de réaliser la vision stratégique de l'Agenda 2063 à tous les niveaux : continental, régional, national et local.

Digital Economy Report 2024 United Nations Conference on Trade and Development (UNCTAD), 2024-07-10 The Digital Economy Report 2024 turns the attention to the environmental footprint of digitalization. The Report discusses environmental impacts along the life cycle of digital devices and information and communications technology infrastructure with regard to raw material extraction and processing, manufacturing, distribution; use and the end-of-life phase. The direct effects on natural resources, including transition minerals, energy and water, as well as greenhouse gas emissions and waste-related pollution can be said to constitute the “environmental footprint” of the ICT sector. There are also indirect environmental effects from the use of digital technologies and services in different sectors of the economy, and the Report includes a dedicated chapter on e-commerce. The report underlines the need to maximize the positive impact of digitalization while minimizing the negative impacts on environmental sustainability.

Resources Matter Tony Addison, Alan Roe, 2024-11-25 This is an open access title available under the terms of a CC BY-NC-SA 3.0 IGO licence. It is free to read at Oxford Academic and is offered as a free PDF download from OUP and selected open access locations. The extraction and use of natural resources underpins a global economy that provides high living standards for many as well as the prospect of ending poverty in the developing world. Mining as well as the oil and gas industry - which constitute the 'extractive industries' - are vitally important sectors in many developing countries. They provide substantial public revenues as well as much-needed foreign exchange, and livelihoods for many. Yet, the extractives industries are highly controversial. The continued extraction and burning of fossil fuels in energy generation and transport, together with the emissions associated with mining and metals refining, has taken the world to levels of emissions that increasingly imperil humanity. In addition, the extractive industries have a poor record of damaging nature both through pollution as well as via the destruction of biodiversity (thereby endangering the livelihoods that depend on such renewable natural capital). This book explores a central issue of our time: our materials world is simultaneously both part of the problem (especially fossil fuels) as well as part of its solution (the materials necessary for the technologies required for 'net

zero'). Resources Matter discusses how the extractive industries can be leveraged to generate larger and more beneficial impacts in poorer economies and improve livelihoods at local and national levels. A central argument is that the so-called 'resource curse' - the potentially negative effect of resource booms on economies and societies - is not inevitable, as it is often said to be. Rather, much can be done through policy, coordinated government action in partnership with the private sector, and judicious investments to improve the prospects for resource wealth to make a positive contribution to escaping underdevelopment and poverty. Companies in the extractives industry have a key role in working with governments to achieve these goals.

Africa's Business Revolution Acha Leke, Mustapha Chironga, George Desvaux, 2018-10-30 The Definitive Guide to Doing Business in Africa For global and Africa-based companies looking to access new growth markets, Africa offers exciting opportunities to build large, profitable businesses. Its population is young, fast-growing, and increasingly urbanized--while rapid technology adoption makes the continent a fertile arena for innovation. But Africa's business environment remains poorly understood; it's known to many executives in the West only by its reputation for complexity, conflict, and corruption. Africa's Business Revolution provides the inside story on business in Africa and its future growth prospects and helps executives understand and seize the opportunities for building profitable, sustainable enterprises. From senior leaders in McKinsey's African offices and a leading executive on the continent, this book draws on in-depth proprietary research by the McKinsey Global Institute as well as McKinsey's extensive experience advising corporate and government leaders across Africa. Brimming with company case studies and exclusive interviews with some of Africa's most prominent executives, this book comes to life with the vibrant stories of those who have navigated the many twists and turns on the road to building successful businesses on the continent. Combining an unrivalled fact base with expert advice on shaping and executing an Africa growth strategy, this book is required reading for global business executives looking to expand their existing operations in Africa--and for those seeking a road map to access this vast, untapped market for the first time.

Dinâmicas do desenvolvimento em África 2021 Transformação digital e empregos de qualidade African Union Commission, OECD, 2021-06-10 Dinâmicas do desenvolvimento em África usa as lições de cinco regiões do continente – África Central, África Oriental, Norte de África, África Austral e África Ocidental – para desenvolver recomendações em matéria de políticas públicas e partilhar boas práticas. Com base nas estatísticas mais recentes, esta análise das dinâmicas de desenvolvimento visa ajudar os líderes africanos a cumprirem as metas da Agenda 2063 da União Africana a todos os níveis: continental, regional, nacional e local.

New Funding Models for Global Mission Tim Welch, 2023-04-23 Financing Mission from Anywhere to Everywhere Times are changing, and conventional methods of funding missionaries are shifting. Churches in Africa, Asia, and Latin America no longer depend on Western funding for sending out their own missionaries. How then does the Majority World fund

missionaries? *New Funding Models for Global Mission* begins by summarizing how world missions has been funded from the past to the present. It then critiques the common fundraising approach where missionaries raise their own financial support and suggests possible adjustments. Tim Welch presents seventeen other funding models that are more appropriate options for contemporary missionaries, along with an overview of what the Bible says about missionary funding. He concludes with fifteen practical recommendations for individuals, churches, and mission agencies. This book seeks to give prophetic leadership in order to change systems and practices for successfully resourcing missionaries. New models—better suited to the situation in which the global church finds itself—provide more funding and opportunities to glorify the Lord among the nations.

African Economic Outlook 2015 Regional Development and Spatial Inclusion African Development Bank, OECD, United Nations Development Programme, 2015-05-25 The African Economic Outlook 2015 analyses Africa's growing role in the world economy and predicts the continent's two-year prospects in crucial areas: macroeconomics, financing, trade policies and regional integration, human development, and governance.

The Diaspora's Role in Africa Stella-Monica N. Mpande, 2021-11-07 Africans living in the diaspora have a unique position as potential agents of change in helping to address Africa's political and socioeconomic challenges. In addition to sending financial remittances, their multiple, hybrid identities in and out of geographical and psychocultural spaces allow them to play a role as cultural and political ambassadors to foster social change and sustainable development back in their African homelands. However, this hybrid position is not without challenges, and this book reflects some of the conundrums faced by members of the diaspora as they negotiate their relationships with their home countries. The author uses her lived experiences and empirical research to ask: are members of the diaspora conduits of Western cultural hegemony at the cost of their traditional preservation and meaningful development in Africa? How does the Western media's portrayal of Africa as the Dark Continent in the 21st century influence their decision-making process to invest back home? How could African nations' governments manage their relationships with citizens abroad to motivate them to invest in their home countries? How do some citizen-residents in Africa and African Diaspora communities perceive each other in the context of Africa's development? How could the African Diaspora collaborate with citizen-residents across growth sectors to impact Africa's development? The book hopes to inspire agents of change within the diaspora and features diverse African entrepreneurs' success stories and their experiences of tackling these challenges. The book will be of interest to aspiring entrepreneurs, researchers across African studies, and the expanding and vibrant field of diaspora research.
