Proyecto kovalevskaya. Investigación matemático-literaria en el aula de primaria Margarita Marín Rodríguez,Juan Lirio Castro,2006 El proyecto Kovalevskaya tiene como objetivo central favorecer el aprendizaje matemático a través de recursos literarios con una metodología heurística de aula. La obra detalla las actividades de puesta en marcha de este proyecto durante dos cursos académicos.

Queridas matemáticas Sarah Strong,Gigi Butterfield,2024-04-29 Este libro destaca la importancia de escuchar las inquietudes y expectativas del alumnado con respecto al aprendizaje de las Matemáticas a través de la escritura de cartas destinadas a ellas, como si se tratara de alguien con quien se sinceran. A partir de sus experiencias compartidas se trabaja en el aula la identidad matemática de cada estudiante, la forma en que las personas se perciben a sí mismas como matemáticas y qué relaciones establecen entre sí para aprender juntas. Su propósito es acompañar a los docentes en la difícil e interesante tarea de proporcionar un ambiente de aprendizaje cómodo y atractivo en el que los estudiantes puedan acercarse a las Matemáticas con soltura, curiosidad y confianza en sus propias capacidades.

En Primaria, jugamos con las Mates Sagrario Martín Abad,2022-04-01 Este libro tiene como finalidad ayudar al aprendizaje de las Matemáticas en Educación Primaria (6-12 años) mediante el juego, con materiales elaborados por el profesorado y a veces, incluso, por el propio alumnado. Los contenidos están organizados según el currículo de esta área:

numeración, operaciones, magnitudes y medidas, geometría y estadística y probabilidad.

Matemáticas re-creativas Alan J. Bishop,Liliana Carbó Martí,Trini Colomer Font,Antonio Fernández-Aliseda,Luis Ferrero de Pablo,Ana García Azcárate,Joaquim Giménez Rodríguez,Juan Antonio Hans Martín,Mariona Monterde Farnés,JOSE ANTONIO MORA SANCHEZ,José Muñoz Santonja,Manuel Pazos Crespo,Núria Ramos Cata,Elisa Recarens i Mercader,Lluís Segarra i Neira,Manolo Alcalá Hernández,Josefa María Aldana Pérez,Claudi Alsina Català,2004-07-20 Las matemáticas son de las pocas materias de estudio que nunca han pasado desapercibidas en el ámbito escolar. El alumnado las ha sufrido o disfrutado, pero en ningún caso han provocado indiferencia. ¿Por qué las matemáticas, en opinión de amplios sectores del alumnado, han tenido y siguen teniendo la fama de asignatura «hueso», difícil, aburrida? En este sentido, cada vez son más los profesores de matemáticas que demuestran a través de su práctica que se puede enseñar matemáticas de manera atractiva y lúdica, vinculando su utilidad a la vida cotidiana. Éste es el propósito de la selección de artículos que configura Matemáticas re-creativas. El mosaico de reflexiones, estrategias y experiencias, de infantil, primaria y secundaria, que el lector encontrará en estas páginas argumenta la necesidad de plantear en las aulas unas matemáticas diferentes, más cercanas, motivadoras, atractivas y significativas para el alumnado.

Cómo propiciar el talento y la creatividad en la escuela Julián Betancourt Morejón,Ma. de los Dolores Valadez Sierra,2012-07-30 ¿Qué esperamos de una educación que fomente la creatividad y el talento en la escuela?, es la primera, de entre otras muchas preguntas que nos plantea Betancourt y Valadez en esta obra. La respuesta puede ser muy amplia en la medida que el lector se sumerge en las páginas de este libro y se encuentra que en nuestros salones de clases existen muchos alumnas y alumnos creativos, inteligentes o con talentos desbordantes que ocupan un educador que les haga fácil, motivante y desafiante su aprender. Para lograr lo anterior, el texto es rico y diverso en estrategias para enriquecer el trabajo en la escuela con los estudiantes con aptitudes sobresalientes y/o talentos específicos que las acompaña de con un directorio de recursos y materiales para ponerlas en práctica. Dada la actualidad de estos tópicos y la creciente demanda que de textos de este tipo existan en nuestro país, consideramos que el libro ofrecerá informaciones y herramientas prácticas novedosas y esclarecedoras sobre cómo fomentar el talento y la creatividad en la escuela, que contribuirá- en alguna medida- al desarrollo del fomento del talento desde la educación inicial hasta la universitaria.

Como Ayudar A Su Hijo A Aprender Matematicas, Septiembre 1999, (SPANISH). ,1999

Fantasía e imaginación, su poder en la enseñanza primaria Kieran Egan,1999-01-01 Esta obra muestra al profesorado cómo integrar la capacidad humana de imaginar y razonar en la planificación y desarrollo del currículum de la educación infantil y primaria. Kieran EGAN presenta con claridad un nuevo aspecto de la antigua función del narrador de cuentos, mostrando estrategias que cualquier docente puede llevar a la práctica. Esta interesante forma de enseñar se justifica por el simple hecho de que no hay niño al que no llame la atención escuchar: «Érase una vez...» La presentación de una idea

narrada en forma de cuento supone entregar al alumnado «un árbol al que trepar para ver desde allí todo el bosque». El autor nos recuerda la gran habilidad de niños y niñas para utilizar la fantasía y los cuentos como herramientas de aprendizaje, y nos anima a no cerrar la puerta a las fuentes de energía intelectual y emotiva más ricas del aula: la imaginación del niño y la del profesorado. En este libro, muy práctico y con una sólida fundamentación, EGAN revisa con lucidez las formas infantiles de aprender y abre perspectivas muy valiosas para proponer tareas escolares más relevantes y significativas en las distintas áreas de conocimiento y experiencia del currículum.

Educational Innovation: Tools and Practices for Effective Learning , Educational Innovation: Tools and Practices for Effective Learning stands as a testament to the transformative power of innovative educational strategies. Directed and coordinated by a distinguished team of experts, this book offers a comprehensive exploration of methodologies and practices

designed to enhance learning outcomes across diverse educational contexts. The book is structured into several key chapters, each addressing a critical aspect of modern education. It begins with practical insights into using digital badges in Moodle, illustrating their potential to foster motivation and creativity in online learning environments. Subsequent chapters delve into the implementation of systematic reviews in early childhood and primary education, highlighting innovation projects that integrate technology, interdisciplinary approaches, and constructivist principles to meet the demands of 21st-century learners. A significant portion of the book focuses on higher education practices, including strategies to maintain academic integrity in the face of artificial intelligence and promoting deep learning through Immediate Response Systems (IRS). These explorations emphasize the role of technology in creating active, reflective, and student-centered learning environments. The book also provides insights into intercultural competencies in secondary education, offering perspectives from high school students in Barcelona, and the development of sustainable and productive projects in global contexts such as Antioquia, Colombia. Through these case studies, the book underscores the universal applicability of innovative methodologies, transcending geographical and cultural boundaries. At its heart, the book advocates for a balance between technological integration and pedagogical depth. It explores the ethical dimensions of education in a rapidly evolving digital landscape while proposing strategies that emphasize collaboration, creativity, and inclusivity. This work challenges educators to rethink traditional teaching models, embrace technological advancements, and commit to lifelong learning. As a resource, this book equips educators, policymakers, and researchers with tools and practices that inspire transformation in classrooms worldwide. It is a call to action for reimagining education as a dynamic, equitable, and forward-looking endeavour, capable of meeting the challenges of our interconnected and constantly changing world.

Manual de Psicología de la Educación María del Mar Prados Gallardo, Virginia Sánchez Jiménez, Inmaculada Sánchez Queija, Rosario Del Rey Alamillo, Miguel Ángel Pertegal Vega, María del Carmen Reina Flores, Pilar Ridao Ramírez, Francisco Javier Ortega Rivera, Joaquín Mora Merchán, 2016-01-28 El propósito de este manual es que los futuros profesionales de la Educación Primaria e Infantil adquieran un marco de referencia psicológico que sustente la concepción de desarrollo, aprendizaje, educación y cultura, así como de sus relaciones mutuas. Con esta obra los estudiantes podrán conocer un marco interpretativo de los procesos, factores y variables psicológicas que influyen en el aprendizaje y en el diseño de las situaciones de enseñanza y aprendizaje. Los factores cognitivos, metacognitivos y afectivos no son algo intrínseco del individuo, sino que, dada la perspectiva teórica que se adopta, estos procesos psicológicos se construyen en los contextos sociales en los que los individuos participan. Por tanto, se trata de ver las relaciones mutuas que se producen entre estos factores y el proceso de aprendizaje escolar. Además, en esta nueva edición se desarrolla tanto la interacción entre el profesor y el alumno como la que se produce entre los propios estudiantes, y se pone un especial énfasis en la comprensión del aula como una comunidad de prácticas, el aprendizaje como la socialización en modos de discursos, el papel del

profesorado como mediador y guía de procesos de co-construcción y negociación de significados compartidos en el aula, etc. En lo que a la interacción entre el alumnado se refiere, se estudia el valor de las relaciones entre éstos no sólo de cara al desarrollo cognitivo y a la adquisición de conocimientos, sino también sus implicaciones para el desarrollo afectivo y relacional. Un rasgo distintivo de este manual es la inclusión de temas tan relevantes como son la transformación de los centros educativos en comunidades de aprendizaje, la educación y bienestar emocional de estudiantes y docentes y la importancia del juego y el pensamiento creativo en la educación formal. Finalmente, el libro se cierra con dos capítulos aplicados y centrados en los procesos instruccionales de la lengua escrita y del conocimiento lógico-matemático.

Conversaciones matemáticas con Maria Antònia Canals Purificació Biniés Lanceta, 2008-09-04 ¿Son difíciles las matemáticas? ¿Qué está pasando en las escuelas y en los institutos para que ésta sea una de las asignaturas más suspendidas? ¿Hay que revisar currículos y didácticas? ¿Es posible disfrutar aprendiendo matemáticas? ¿Existen claves didácticas que ayuden a que esta asignatura deje de ser la pesadilla de la mayoría de alumnos y de muchos maestros? ¿Cuál es la situación actual y qué es necesario cambiar en la enseñanza de las matemáticas? Con un lenguaje divulgativo, este libro va desgranando todas estas preguntas y apuntando respuestas que puedan orientar a maestros y maestras en su práctica educativa. A la voluntad divulgativa, que hace amena y fácil su lectura, se añade la sabiduría, el trabajo y las propuestas y ejemplos prácticos del personaje de excepción con el que se dialoga: Maria Antònia Canals.
