

Pudong New Area Shanghai China

Lu Zhiguo Tao Yitao

Shanghai Yue-man Yeung, 1996 As China's largest city best known for its pre-eminent achievements in the early part of the twentieth century, Shanghai grew modestly in comparison with southern China after the adoption of China's open policy in 1978. With the 1990 announcement of Pudong as an area for special development, Shanghai has raced ahead, seemingly on its way to an economic and cultural resurgence that is likely to accelerate development and modernization in the Yangzi Delta and China at large. This volume focuses on the physical and socioeconomic transformation of Shanghai across a wide range of topics. Drawing on the experience and expertise of researchers primarily in Hong Kong, this study is a major contribution to the subject of economic development and social change in China. It seeks to understand, analyze and interpret how Shanghai has transformed itself in recent years.

China's Economic Zones Lu Zhiguo Tao Yitao, 2012-03-01 A thorough examination of the establishment and development of China's Special Economic Zones (SEZ). These eight SEZs marked a major milestone in China's gradual market-oriented reform process, and the developmental fluctuations of these zones offers an in-depth understanding of the complexities and difficulties of reform. They also provide critical insight into China's thirty years of economic and social transformation. This book is a valuable and practical resource for governments, academics and policy advisors looking for an insight into and analysis of how the Special Economic Zone strategy played a key role in the transformation of China's economy.

Special Economic Zones and the Economic Transition in China Wei Ge, 1999 This book examines China's economic development since 1949, with special emphasis on the economic transition of the past two decades and the role of special economic zones in this gradually evolving process. Various issues concerning the formation of the zones are explored. The performance of the zones and their impacts on the Chinese economy and the transitional path are assessed in aspects such as economic growth, structural changes, investment financing, employment and wages, technology transfers and learning, productivity gains, standards of living, trade expansion and the changing pattern of foreign investment. The implications of the special economic zones as a policy instrument to facilitate the process of economic transition and development, as well as the relevant policy issues, are examined.

Urbanization and Production of Space Chao Ye,Liang Zhuang,2023-05-18 This book studies China's urbanization with the theory of production of space. The authors redefine the production of space and build a new theoretical framework for understanding the evolving relations between urbanization and spatial production. Since the reform and opening-up, especially in the last twenty years, the logic of spatial production has dominated China's urbanization. The authors choose the most representative cases, such as the Yangtze River Delta Urban Agglomeration, Jiangsu Province, National High-tech Industrial Development Zone, New Urban District, State-Level New Area, University Town, and some villages, to conduct a series of empirical studies on production of space at the macro-, meso-, and micro-scales. Through an in-depth analysis of the interaction between social spaces and urbanization influenced by power, capital, and class, the book reveals that the essence of China's urbanization is dominated by the logic of spatial production. The authors finally propose that an important shift toward humanism should be made in the future development of China's new-type urbanization, emphasizing more even and adequate development between different regions and between urban and rural areas, which also provides new ideas for the theory and practice of urbanization worldwide. This book can be read and referenced by researchers in the fields of urban and regional studies, geography, sociology, urban and rural planning, management, etc. It can also be used as a teaching reference book for teachers, researchers, and students of scientific research institutions in related fields.

Visual Sensors Oscar Reinoso,Luis Payá,2020-03-27 Visual sensors are able to capture a large quantity of information

from the environment around them. A wide variety of visual systems can be found, from the classical monocular systems to omnidirectional, RGB-D, and more sophisticated 3D systems. Every configuration presents some specific characteristics that make them useful for solving different problems. Their range of applications is wide and varied, including robotics, industry, agriculture, quality control, visual inspection, surveillance, autonomous driving, and navigation aid systems. In this book, several problems that employ visual sensors are presented. Among them, we highlight visual SLAM, image retrieval, manipulation, calibration, object recognition, navigation, etc.

An Assessment of the Investment Climate in China: Key Indicator Analysis MIC Research Team,2016-08-01 Amid the economic slowdown in Europe and North America, China - though still growing upwards in 2013 - is facing headwinds in the wake of rising labor and land costs. Coupled with China's fast-changing policy, laws and environments pertaining to foreign investment, it is getting tougher for foreign companies to invest and doing business in China. This report, serving as a reference for foreign companies when making investment decisions, is the aggregated results of China's investment climate survey conducted by TEEMA (Taiwan Electrical and Electronic Manufacturers' Association) and key indicators in the economic and political aspects are addressed and examined. This report also includes Taiwanese businesspeople' comments and suggestions on how to invest in China.

Studies on China's Special Economic Zones 6 Yiming Yuan,2024-11-28 This book reflects the latest academic achievements, research progress and policy propositions on China's special economic zones study. This book analyzes the problems encountered in the development of China's basic special economic zones and the theory of economic system reform, introduces the achievements and prospects of the development of China's special economic zones in the past 40 years of reform and opening-up, explores the successful experience of the special economic zones as China's new economic system, and conducts the comparative study with Shanghai Pudong New Area, Singapore and Hong Kong regarding of the rise of the finance industry.

China Deconstructs David S.G. Goodman,Gerald Segal,2002-03-11 China has experienced the world's fastest economic growth for over a decade. It is likely that within a generation, China will have the world's largest economy. Yet, at the moment when China looks set to regain its former power, serious questions have to be asked about the continuing integrity of China. The challenges posed by economic reform, succession politics, and new forces of political liberalism are compounded by boundary uncertainties, as China adopts a strategy of greater interdependence with the regional and global economy. The writers of this book analyse the factors that might lead to and that might prevent the break-up of China. They provide key data about economic activity and external connections of the major regional forces. Their analysis provides essential reading for those concerned with the prospects for China, and the future stability of East Asia.

China's Local Administration Jae Ho Chung,Tao-chiu Lam,2009-10-16 This book presents a comprehensive survey of China's local administration. It considers all kinds of local government units and their administrative functions, both historically and in the present day: ranging from the provinces, centrally-administered municipalities and autonomous regions to prefectures, counties, townships and urban districts.

Foreign Direct Investment in China Yingqi Wei,Xiaming Liu,2001-01-01 'The data used is rich, including national, regional and industry-level statistics.' - Yue Ma, The China Journal 'Wei and Liu provide a comprehensive analysis of the determinants and impact of FDI on the economy of China. The book is to be recommended to students of international business for its elegant use of sophisticated econometric techniques and economic theory in exploring the role of FDI in a major emerging economy that hosts a substantial volume of FDI.' - V.N.Balasubramanyam, Lancaster University, UK China is now among the top hosts for foreign direct investment (FDI) inflows in the world. This fact, combined with recent developments in internationalisation and economic growth in China, ensures a perfect opportunity to identify the determinants and impact of FDI in the largest transition economy in the world.
