Desafíos para la seguridad internacional en el orden global en transición: los retos geopolíticos de las grandes potencias y el cambio climático PERIANES BERMÚDEZ Ana Belén , 2022-01-11 Las XII Jornadas de Estudios de Seguridad del Instituto Universitario General Gutiérrez Mellado (IUGM), celebradas durante los días 22, 23 y 24 de septiembre de 2020, abordaron dos cuestiones de gran interés académico en el ámbito del estudio de la paz y la seguridad internacional. La primera de ellas es la transición hacia un mundo multipolar, que se centró en las implicaciones actuales y de futuro de esta reconfiguración de poder global, incluyendo cuestiones específicas sobre las dinámicas que generan grandes potencias en el sistema internacional, así como su lucha por la hegemonía en regiones estratégicas clave del mundo. En segundo lugar, se analizó la estrecha relación entre cambio climático y seguridad global bajo un enfoque holístico que analizó de forma transversal aspectos tan relevantes como los movimientos migratorios derivados de los drásticos cambios medioambientales, o la multilateralidad de las consecuencias para la seguridad internacional de las variaciones del sistema climático. Las Jornadas de Estudios de Seguridad del IUGM gozan de una gran acogida por parte del público interesado en el campo de la paz y la seguridad internacional. De este modo, se han convertido año tras año en una cita consolidada e ineludible para estudiantes, profesores, analistas y profesionales del sector, tanto en España como fuera de nuestras fronteras. La edición de 2020 se organizó en torno a tres paneles principales: «Hacia un mundo multipolar: el orden global en transición»; «El cambio climático y la seguridad internacional» y, el «Programa de Doctorado», en el que participan exclusivamente alumnos matriculados en el programa de Seguridad Internacional del Instituto. Este libro recopila algunas de las comunicaciones presentadas en las XII Jornadas que, tras un proceso de evaluación externa, fueron seleccionadas para su publicación. Todas las comunicaciones que se presentaron pueden encontrarse en la publicación *Actas de las XII Jornadas de Estudios de Seguridad*, editada por el IUGM en formato digital.

Recursos naturales estratégicos Rosío Vargas, José Luis Valdés-Ugalde, 2006 Este libro pone sobre la mesa un tema vital para la supervivencia de la llamada aldea global: la inminente escasez de recursos naturales estratégicos, básicamente los hidrocarburos y el agua, y los riesgos que ello supone para el bienestar y la paz mundiales. Expertos de varias disciplinas y nacionalidades abordan el problema desde diferentes perspectivas: la seguridad nacional, la integración energética, la verdadera situación de las reservas mundiales de hidrocarburos, en particular el caso de México, y los límites que la geología y la naturaleza han impuesto ya a la obtención y explotación de estos recursos. El panorama que nos presentan, respaldado con análisis y fuentes de primera mano, no es prometedor, ni para las grandes o medianas potencias, ni para los países emergentes--[Http://www.cisan.unam.mx](http://www.cisan.unam.mx).

Raíces de los conflictos armados Mariano Aguirre, 1996 En coedición con el Centro de Investigación para la Paz, CIP. El Anuario del Centro de Investigación para la Paz 1996 se ocupa de analizar teóricamente las diferentes raíces históricas, económicas, geográficas, y medioambientales de los conflictos armados de fin de siglo, sus tipologías, y estudia los casos de Argelia, Chechenia, Haití, Sri Lanka, y los acuerdos de paz para Bosnia-Herzegovina y entre Israel y la Autoridad Nacional Palestina.

Economía contemporánea Milton H. Spencer, 1993 La manera más efectiva e interesante de aprender economía es haciéndola y es necesario conocer las bases de la economía para poder aplicarla inteligentemente. De acuerdo con esto, un texto de introducción al tema debería, a mi juicio, proporcionar a los estudiantes la teoría fundamental necesaria para hacer tres cosas: comprender las cuestiones de política pública, evaluar las opiniones contradictorias y llegar a conclusiones documentadas. Este libro trata de alcanzar estos objetivos de distintas formas. Aunque no se encuentra en otros textos, éste abunda en artículos recientes, ejemplos del mundo real, asuntos corrientes, estudio de casos y problemas prácticos. Lo más importante es que estas características se han conseguido sin sacrificar la teoría básica.

La vida en el cosmos Autores varios, 2025-04-02 La vida en el cosmos: el gran misterio que define quienes somos Desde el Big Bang hasta la búsqueda de vida extraterrestre, este libro nos sumerge en la mayor aventura del conocimiento humano. La materia primordial del universo, forjada en el corazón de las estrellas, se transformó en moléculas cada vez más complejas que sembraron el cosmos con los ingredientes básicos de la vida. El agua, omnipresente pero esquiva, marca el camino de nuestra búsqueda en lunas heladas y exoplanetas distantes. Mientras la humanidad da sus primeros pasos hacia las estrellas, nuestros instrumentos escudriñan el cosmos en busca de señales de vida. Por primera vez en la historia, tenemos las herramientas para responder científicamente a la pregunta más antigua: ¿estamos solos en el universo? La respuesta podría transformar para siempre nuestra comprensión del cosmos y de nosotros mismos. Viaja desde el Big Bang hasta los océanos subterráneos de lunas distantes en una aventura que conecta los orígenes del cosmos con nuestro destino entre las estrellas.

Los problemas del conocimiento y la perspectiva ambiental del desarrollo José María Montes, 2000 La racionalidad económica y las condiciones impuestas por el orden económico internacional han ocasionado la destrucción del patrimonio de recursos naturales; la problemática ambiental surge así de las estrategias de conocimientos y de poder que han determinado los procesos de producción y las formas de explotación de la naturaleza. Los ensayos de este libro hacen un aporte original a la concepción del ambiente como un espacio complejo de procesos interdependientes que articula las condiciones ecológicas, tecnológicas y culturales para fundar un potencial y un paradigma alternativo de producción para los países del tercer mundo.
