Breaking White Supremacy Gary Dorrien, 2018-01-09 The award-winning author of *The New Abolition* continues his history of black social gospel with this study of its influence on the Civil Rights movement. The civil rights movement was one of the most searing developments in modern American history. It abounded with noble visions, resounded with magnificent rhetoric, and ended in nightmarish despair. It won a few legislative victories and had a profound impact on U.S. society, but failed to break white supremacy. The symbol of the movement, Martin Luther King Jr., soared so high that he tends to overwhelm anything associated with him. Yet the tradition that best describes him and other leaders of the civil rights movement has been strangely overlooked. In his latest book, Gary Dorrien continues to unearth the heyday and legacy of the black social gospel, a tradition with a shimmering history, a martyred central figure, and enduring relevance today. This part of the story centers around King and the mid-twentieth-century black church leaders who embraced the progressive, justice-oriented, internationalist social gospel from the beginning of their careers and fulfilled it, inspiring and leading America's greatest liberation movement.

Two-Party Politics in the One-Party South Samuel L. Webb, 2018-05-22 Samuel L. Webb presents new evidence that, contrary to popular belief, voters in at least one Deep South state did not flee en masse from the Republican party after Reconstruction. Instead, as Webb conclusively demonstrates, the party gained strength among white voters in northern Alabama's Hill Country region between 1896 and 1920.

Inside Science Robert E. Kohler, 2019-02-27 Context and situation always matter in both human and animal lives. Unique insights can be gleaned from conducting scientific studies from within human communities and animal habitats. *Inside Science* is a novel treatment of this distinctive mode of fieldwork. Robert E. Kohler illuminates these resident practices through close analyses of classic studies: of Trobriand Islanders, Chicago hobos, corner boys in Boston's North End, Jane Goodall's chimpanzees of the Gombe Stream Reserve, and more. Intensive firsthand observation; a preference for generalizing from observed particulars, rather than from universal principles; and an ultimate framing of their results in narrative form characterize these inside stories from the field. Resident observing takes place across a range of sciences, from anthropology and sociology to primatology, wildlife ecology, and beyond. What makes it special, Kohler argues, is the direct access it affords scientists to the contexts in which their subjects live and act. These scientists understand their subjects not by keeping their distance but by living among them and engaging with them in ways large and small. This approach also demonstrates how science and everyday life—often assumed to be different and separate ways of knowing—are in fact overlapping aspects of the human experience. This story-driven exploration is perfect for historians, sociologists, and philosophers who want to know how scientists go about making robust knowledge of nature and society.

Film Quotations Robert A. Nowlan, Gwendolyn W. Nowlan, 2016-04-30 Certain lines define a movie. Marlene Dietrich in *Morocco*: "Anyone who has faith in me is a sucker." Too, there are lines that fit actor and character. Mae West in *I'm No Angel*: "I'm very quick in a slow way." Jane Fonda in *California Suite*: "Fit? You think I look fit? What an awful shit you are. I look gorgeous." From the classics to the grade-B slasher movies, over 11,000 quotes are arranged by over 900 subjects, like accidents, double entendres, eyes (and other body parts!), ice cream, luggage, parasites, and ugliness. Each quote gives the movie title, production company, year of release, speaker of the line, and, when appropriate, a comment putting the quote in context.

A Leader's Gift Barry Banther,2014-04-22 You can no longer count on old motivational tricks to inspire loyalty among your associates. The rules of leading have changed, and now you must be able to take a diverse team and win with them quickly. Barry Banther knows how to equip you for today's business world because he knows what lasting leadership is made of. He has identified five qualities that aren't things leaders have; rather, they are things they give away freely and frequently to everyone they lead in the workplace. By embracing and demonstrating the five qualities expounded in this book, you will become a leader who brings out the best in your associates, whether you're a new manager or you occupy a C-suite office. Banther consults with and trains the teams of CEOs of family-owned as well as Fortune 100 companies. He has been the lead consultant on more than 400 leadership development engagements and has written 50-plus leadership training programs that are used by companies worldwide. After a career in broadcasting and, later, teaching and administration at the college level, Banther served three Florida governors as their appointee to oversee private higher education and was elected to an unprecedented three terms as chairman of the Florida State Board of Independent Colleges and Universities. Having learned

the hard way—caring about numbers rather than people—Banther can tell you with confidence that when leaders put others first they themselves become more valuable to their team and their company than any authority or job title could ever mandate! That's also the best way to grow your bottom line: deploy the right people with the right skills at the right time to create loyal and repeat customers!

Exploring Management John R. Schermerhorn, 2011-10-11 The primary goal of this edition of Exploring Management is to help build core management competencies for today's global and more complex workplace, including issues related to planning, organizing, leading, and controlling (POLC) - with more hands-on type materials such as cases, exercises, and application. Schermerhorn uses a conversational and interactive writing style to master concepts in a bite-size and fundamental approach. This text presents managerial concepts and theory in a straight-forward, interesting style with a strong emphasis on application. The discussion of theory is framed in a unique, engaging, and concise way. The goal is to promote critical thinking and ability to make sound business decisions using managerial theory. Concepts are explored and reinforced by most hands-on applications, exercises, cases, and the integration of technology. The text also focuses on the most important aspects of the POLC model, emphasizing skill-building.

Big Data, Emerging Technologies and Intelligence Miah Hammond-Errey, 2024-01-29 This book sets out the big data landscape, comprising data abundance, digital connectivity and ubiquitous technology, and shows how the big data landscape and the emerging technologies it fuels are impacting national security. This book illustrates that big data is transforming intelligence production as well as changing the national security environment broadly, including what is considered a part of national security as well as the relationships agencies have with the public. The book highlights the impact of big data on intelligence production and national security from the perspective of Australian national security leaders and practitioners, and the research is based on empirical data collection, with insights from nearly 50 participants from within Australia's National Intelligence Community. It argues that big data is transforming intelligence and national security and shows that the impacts of big data on the knowledge, activities and organisation of intelligence agencies is challenging some foundational intelligence principles, including the distinction between foreign and domestic intelligence collection. Furthermore, the book argues that big data has created emerging threats to national security; for example, it enables invasive targeting and surveillance, drives information warfare as well as social and political interference, and challenges the existing models of harm assessment used in national security. The book maps broad areas of change for intelligence agencies in the national security context and what they mean for intelligence communities, and explores how intelligence agencies look out to the rest of society, considering specific impacts relating to privacy, ethics and trust. This

book will be of much interest to students of intelligence studies, technology studies, national security and International Relations.
