Leveraging the Potential of Argentine Cities Elisa Muzzini,Beatriz Eraso Puig,Sebastian Anapolsky,Tara Lonnberg,Viviana Mora,2016-12-16 Argentina's path to economic prosperity is through efficient, sustainable and economically thriving cities. Not only are cities a spatial concentration of people, but also they generate agglomeration economies by concentrating ideas, talent, and knowledge. Argentina is one of the most urbanized countries in Latin America, with 90 percent of Argentine people currently living in cities. Argentina's cities are geographically and economically diverse, and its largest urban area - Metropolitan Buenos Aires - is one of Latin America's urban giants.Argentine cities need to address three main challenges to leverage their economic potential. Argentina's current patterns of urban development are characterized by (a) high primacy and unbalanced regional development, (b) limited global economic footprint of urban economies, with employment concentrated in nontradable and resource intensive sectors, and (c) unplanned low-density urban expansion. Argentine cities thus face the challenges of moving toward a more balanced regional development, transitioning from local to global cities, and from urban sprawl to articulated densities to take full advantage of the benefits of agglomeration economies. To address these challenges, Argentina needs the leadership of the federal government; the coordinating power of provinces; and the capacity of empowered, financially sound municipalities. Argentine cities also need system-wide policy reforms in areas such as territorial planning, municipal finance, housing, urban transport, and local economic development.Leveraging the

Potential of Argentine Cities: A Framework for Policy Action aims to deepen our empirical understanding of the interplay between urbanization and agglomeration economies in Argentina by asking the following: (a) What are the main trends and spatial patterns of Argentina's urbanization that underlie agglomeration economies?, (b) Are urban policies leveraging or undermining the benefits of agglomeration economies?, and (c) Are Argentine cities fully reaping the benefits of agglomeration economies to deliver improvements in prosperity and livability? By addressing such questions and exploring their implications for action, this study provides a conceptual framework, empirical data, and strategic directions for leveraging the potential of Argentine cities.

Investigación en pedagogías digitales: conectadas, colaborativas, gamificadas y flexibles Sonia Santoveña-

Casal,2023-10-13 El objetivo de este libro es presentar una cartografía de las pedagogías digitales y del estado actual de este campo científico que sirva de referencia para el desarrollo de la educación digital en la Universidad Nacional de San Martín, así como en aquellas otras universidades interesadas en la implementación de un sistema basado en la pedagogía digital. Las pedagogías digitales presentadas se definen por un conjunto de principios, estrategias y actividades concretos que se llevan a cabo en un contexto digitalizado. En esta obra se describen las principales pedagogías digitales, se aborda su análisis teórico y, partiendo de este, se reflexiona sobre la evolución y las tendencias de la investigación en cada una de las pedagogías digitales, con el foco puesto en las pedagogías digitales conectadas y críticas, colaborativas, gamificadas y flexibles, mediante la aplicación del análisis bibliométrico y la revisión sistemática de la producción científica. El libro concluye con el estudio de caso de la Universidad Nacional de San Martín y el estado actual de las publicaciones e investigaciones en el campo de la pedagogía digital.

Endophytes: Mineral Nutrient Management, Volume 3 Dinesh Kumar Maheshwari,Shrivardhan Dheeman,2021-03-04 The challenges to meet the food requirement of the burgeoning population and stabilized productivity of agriculture lands can only be met by a second green revolution. After steadily declining for over a decade hunger is on the rise again, affecting

million people of the global population. Therefore, crop yields must be increased substantially over the coming decades to keep pace with global food demand. The plant rhizosphere is a multidimensional and dynamic ecological environment of complicated microbe-plant interactions for harnessing essential macro and micronutrients from a limited nutrient pool. This book will showcase naturally-occurring endophyte which can be explored for nutrient mineralization and mobilization for sustainable agriculture. This will cover recent trends, prospects, critical commentaries and advancement in the research area focusing on naturally-occurring beneficial endophytic microbes. Thus, it is proposed to bring out new scientific insights and frontiers of research that have exploration of endophyte for mineral nutrient management in soil and crops. The chapters are contributed by leading scientists across the globe. The book will be useful to agronomists, microbiologists, ecologists, plant pathologists, molecular biologists, environmentalists, policy makers, conservationists, and NGOs working for the crop production and productivity development and consequently over all agricultural significance.
