The Market Gardener Jean-Martin Fortier,Marie Bilodeau,2014-03-04 Grow better not bigger with proven low-tech, human-scale, biointensive farming methods

Farms and Territory Philippe Martin,Solène Pissonnier,2025-08-25 What are the new relationships between territories and farms? Farms and Territory addresses this question by exploring a range of landscapes, from mountains to cereal plains, forged by different actors who exploit and protect resources such as land and wild - or domestic - biodiversity. These territories are also the site of renewed interactions between farms for the use of biomass, whether for methanization or herd feeding. This book focuses on the various methods and tools used to diagnose, design or evaluate agricultural dynamics in territories: database matching, material and energy flow calculations, codesign approaches, etc. In short, this book illustrates the diversity of work carried out at the farm-territory interface by research teams to understand changes in the agricultural world and the ecological, economic and societal impacts.

The Urban Garden City Sandrine Glatron,Laurence Granchamp,2018-03-24 This book provides an interdisciplinary

overview of the role of gardens in cities throughout different historical periods. It shows that, thanks to various forms of spatial and social organisation, gardens are part of the material urban landscape, biodiversity, symbolic and social shape, and assets of our cities, and are increasingly becoming valued as an 'order' to follow. Gardens have long been part of the development of cities, serving different purposes through the ages: shaping neighborhoods to promote health or hygiene, introducing aesthetic or biological elements, gathering the citizens around a social purpose, and providing food and diversity in times of crisis. Highlighting examples that can serve as the basis for comparisons, the chapters offer a brief panorama of experiences and models of gardens in the city - in the European context and in various periods of history - while also discussing issues related to garden cities, urban agriculture and community gardens. The contributors are university staff from various disciplines in the human and life sciences, in discourse with other academics but also with practitioners who are interested in experiences with urban gardens and in promoting an awareness of their spatial, social and 'philosophical' goals throughout history. The book will appeal to urban geographers, sociologists and historians, but also to urban ecologists dealing with ecosystem services, biodiversity and sustainable development in cities. From a more operational standpoint, landscape planners and architects are sure to find many of the projects enlightening and inspirational.

Coltivare bio con successo Jean-Martin Fortier, 2023-07-28 Dopo il successo in Canada, Germania, Francia e Regno Unito, questo libro è diventato il manifesto della nuova agricoltura per le piccole aziende biologiche, in grado di stimolare un circuito economico virtuoso a livello locale, assicurare un reddito decoroso all'agricoltore, creare posti di lavoro per i giovani e un rapporto diretto tra produttore e consumatore. Nel libro, l'autore condivide le strategie agronomiche ed economiche che hanno decretato il successo della sua azienda nonostante un budget iniziale molto contenuto: la vendita a chilometro zero, l'organizzazione degli spazi secondo i principi della permacultura, l'impiego di attrezzi e macchine innovativi, la riduzione delle lavorazioni del terreno, il metodo di coltivazione bio-intensivo, senza dimenticare le schede pratiche per coltivare oltre 25 ortaggi. Una vera e propria guida pratica per le piccole aziende agricole, ma anche per i giovani neo-agricoltori che vedono nell'agricoltura biologica uno spazio per il loro futuro e un contributo concreto per la salvaguardia del Pianeta. L'edizione italiana è stata curata da Myrtha Zierock, orticatrice trentina che ha lavorato presso l'azienda dell'autore e che ha adattato le indicazioni tecniche al nostro clima e contesto.
