The book also contains one keynote paper in full paper length. The book is dedicated to Hartmut Ehrig, one of the fathers and most productive members of the Graph Transformation community, who passed away in 2016. An obituary is included in the front matter of the volume.

Alice Walker's The Color Purple, 2009-01-01 Alice Walker's Pulitzer Prize winning novel *The Color Purple* is a tale of personal empowerment which opens with a protagonist Celie who is at the bottom of America's social caste. A poor, black, ugly and uneducated female in the America's Jim Crow South in the first half of the 20th century, she is the victim of constant rape, violence and misogynistic verbal abuse. Celie cannot conceive of an escape from her present condition, and so she learns to be passive and unemotional. But *The Color Purple* eventually demonstrates how Celie learns to fight back and how she discovers her true sexuality and her unique voice. By the end of the novel, Celie is an empowered, financially-independent entrepreneur/landowner, one who speaks her mind and realizes the desirability of black femaleness while creating a safe space for herself and those she loves. Through a journey of literary criticism, *Dialogue: Alice Walker's The Color Purple* follows Celie's transformation from victim to hero. Each scholarly essay becomes a step of the journey that paves the way for the development of self and sexual awareness, the beginnings of religious transformation and the creation of nurturing places like home and community.

*Fluency and Reading Comprehension in Typical Readers and Dyslexics Readers* Simone A. Capellini, Giseli D. Germano, 2018-02-22 Reading involves decoding and comprehension components and, to become efficient, it requires a large number of cognitive and linguistic processes. Among those, the phonological awareness, the alphabetic principle, the decoding, the fluency, the lexical development and the text comprehension development. The reading comprehension is strongly related with the development of vocabulary, oral language, linguistic skills, memory skills and ability to make inferences, and the world experiences of each individual. These processes become important only when the professional needs to deal with students presenting difficulties in learning how to read. The difficulty using the knowledge of conversion rules between grapheme and phoneme to the word reading construction characterizes the dyslexia, which is a specific learning disorder with a neurological source. These difficulties presented by students with dyslexia interfere in their learning process impairing the learning development. Knowing and following the reading development and its processes, as well as obtaining the punctuation of fluency abilities and students comprehension allow us to understand what happens when the student presents difficulties to read. This could help in the identification of learning disabilities and in the development of

intervention programs.
