Love, Money, and Parenting Matthias Doepke, Fabrizio Zilibotti, 2020-11-03 Doepke and Zilibotti investigate how economic forces shape how parents raise their children. They show that in countries with increasing economic inequality, such as the United States, parents push harder to ensure their children have a path to security and success. Economics has transformed the hands-off parenting of the 1960s and '70s into a frantic, overscheduled activity. Growing inequality has also resulted in an increasing 'parenting gap' between richer and poorer families, raising the disturbing prospect of diminished social mobility and fewer opportunities for children from disadvantaged backgrounds. The authors discuss how investments in early childhood development and the design of education systems factor into the parenting equation, and how economics can help shape policies that will contribute to the ideal of equal opportunity for all. --From publisher description.

Creative Play-Based DBT Activities for Children and Their Caregivers Kellie Giorgio Camelford, Krystal Vaughn, Erin Dugan, 2021-06-14 Children feel emotions in many ways. At times, the intensity of children's emotions can create difficulties at school, home, and social settings, and obstruct children's relationships with others in their lives. Dialectical behavioral therapy (DBT) has been proven as an evidence-based intervention for teenagers and adults with various mental health diagnoses that focuses on mindfulness, interpersonal relationships, distress tolerance, and emotional regulation. This helpful workbook guides clinicians to translate DBT principles through play therapy-informed activities for children and their caregivers. Supportive activities and techniques for use in the therapy room and at home with children are provided to assist children in managing their emotions and strengthening their relationships. Blending the facilitative powers of DBT and play therapy allows children to use the needed tools and techniques to process their internal conflicts. Utilizing these skills while combining the therapeutic powers of play allows children to better understand their world.

When Kids Say They're Trans Stella O'Malley, Sasha Ayad, Lisa Marchiano, 2023-09-07 'Essential reading for all parents and professionals supporting young people struggling with the issue of gender identity' Louise Perry Being the parent of a gender-questioning child is confusing. There is a lot of advice out there, but much of it goes against what many parents feel

instinctively is the right approach. And the stakes are very high if you get it wrong. There have been many books written for parents who are facilitating a child's gender transition, but almost none for parents who decide that social or medical transition is not the best option for their child. Written by three professionals working in the field – Sasha Ayad, Lisa Marchiano and Stella O'Malley – *When Kids Say They're Trans* is explicitly a resource for parents who want their children to flourish, but do not believe that hasty medicalisation is the best way to ensure long-term health and well-being. Parents who have successfully helped their children navigate gender distress without resorting to surgery and hormones have done so by actively taking the reins, not waiting until they found the right therapist or doctor. *When Kids Say They're Trans* will tell you all you need to know, and will give you the confidence to trust your own instincts.

Assessing Culturally Informed Parenting in Social Work Davis Kiima, 2021-03-07 This book explores how social workers incorporate issues of culture when evaluating the parenting competence of Black, Asian, and Minority Ethnic (BAME) parents and highlights the gap in how social workers assess safe parenting in BAME families. Drawing on a study that combined a phenomenological research philosophy with frame analysis, the book explores how culturally informed parenting is construed by social workers and BAME parents. It argues that effective assessment of the parenting competence of BAME parents is predicated on understanding how culture frames perspectives of what constitutes competent parenting. Throughout the eight chapters, the book moves the debate within the literature away from the universality of parenting concepts to a focus on a deeper understanding of culture. It highlights the influence that culture has on the way that BAME parents socialise their children, as well as how parents and social workers conceptualise safe parenting. The result is useful insights into the cultural context of parenting. The book will be of interest to all scholars and students of social work, childhood studies, sociology, and social policy, as well as social work professionals more broadly.

The Encyclopedia of Human Ecology Julia R. Miller, Richard M. Lerner, Lawrence B. Schiamberg, Pamela M. Anderson, 2003-08-13 The first—and only—source to integrate the multiple disciplines and professions exploring the many ways people interact with the natural and designed environments in which we live. Comprising more than 250 informative entries, *The Encyclopedia of Human Ecology* examines the interdisciplinary and complex topic of human ecology. Knowledge gathered from disciplines that study individuals and groups is blended with information about the environment from the

fields of family science, geography, anthropology, urban planning, and environmental science. At the same time, professions intended to enhance individual and family life—marriage and family therapy, clinical psychology, social work, dietetic and other health professions—are represented alongside those concerned with the preservation, conservation, and management of the environment and its resources. How rampant are eating disorders among our youth? Are AIDS educational programs effective? What problems do adolescents transitioning into adulthood encounter? Here, four leading scholars in the field have assembled a team of top-tier psychologists, sociologists, anthropologists, and other experts to explore these and hundreds of other timely issues.

Character Deborah L. Rhode, 2019-08-02 Americans claim to care about character. Over four fifths want it taught in public schools, and 95 percent think that a president's character is important. And historically, philosophers, educators, politicians, religious leaders, judges, and the general public have agreed that character should be valued and reinforced. Yet in the United States, the institutions charged with that mission have consistently fallen short. Simply put, too little effort has been made to understand the importance of character and the strategies that can best develop and support it. After first exploring the history of the concept over time, Deborah Rhode turns her focus to the institutions that have traditionally fostered good character: families, schools, youth organizations, civic groups, and political organizations. However, as we have increasingly de-emphasized the subject—a trend that is most evident in our politics—our awareness of its shaping influence has waned. Indeed, we often focus on the wrong things when it comes to fostering good character. For instance, almost a third of the workforce is covered by licensing laws requiring good moral character, even occupations where the need for screening is not self-evident: florist, fortune teller, and frog farmers. Character also plays a pivotal role in the criminal justice system, in defining guilt, punishment, and eligibility for parole. All too often, these legal requirements are idiosyncratic, inequitable, and subject to race and class bias. Millions of Americans who have convictions for minor offenses are excluded from a vast range of occupations and benefits without evidence that such exclusion serves the public interest. We can do better, she stresses, and outlines a powerful program for reform. Rhode punctuates the book through a series of portraits of exemplary individuals whose good character made them who they were: Ida B. Wells, Jane Addams, Martin Luther King, Mother Teresa, Nelson Mandela, Albert Schweitzer, and Thurgood Marshall. All of these individuals had flaws, but through their commitments to both social justice and helping the less fortunate, they all demonstrate the power and importance of strong character.

Attack of the Teenage Brain John Medina, 2018-03-12 Marvel at the neuroscientific reasons why smart teens make dumb decisions! Behold the mind-controlling power of executive function! Thrill to a vision of a better school for the teenage brain! Whether you're a parent interacting with one adolescent or a teacher interacting with many, you know teens can be hard to parent and even harder to teach. The eye-rolling, the moodiness, the wandering attention, the drama. It's not you, it's them. More specifically, it's their brains. In accessible language and with periodic references to Star Trek, motorcycle daredevils, and near-classic movies of the '80s, developmental molecular biologist John Medina, author of the New York Times best-seller *Brain Rules*, explores the neurological and evolutionary factors that drive teenage behavior and can affect both achievement and engagement. Then he proposes a research-supported counterattack: a bold redesign of educational practices and learning environments to deliberately develop teens' cognitive capacity to manage their emotions, plan, prioritize, and focus. *Attack of the Teenage Brain!* is an enlightening and entertaining read that will change the way you think about teen behavior and prompt you to consider how else parents, educators, and policymakers might collaborate to help our challenging, sometimes infuriating, often weird, and genuinely wonderful kids become more successful learners, in school and beyond.

Evaluating Program Effectiveness Marc T. Braverman, 2022-10-26 The book shows how to apply validity concepts when planning and conducting an evaluation, thereby making sure that the evaluation stays true to the purposes for which it was initiated. Marc T. Braverman demonstrates that evaluating with validity means being able to answer the evaluation questions in a way that is useful, accurate, and reflective of the information needed from the evaluation. His approach is practical, with the goal of helping evaluators to conduct high-quality outcome evaluations, and he illustrates concepts with case study examples drawn from studies of intervention effectiveness over many years. The book begins by looking at the ways that validity is conceptualized and the uses to which it is put. Subsequent chapters analyze separate phases of the outcome evaluation process and the critical decisions about design and analysis that are typically required.

Reality-Based Parenting REV. ROBERT D. ZANCAN, 2015-10-05 Reality-Based Parenting: How Parents of African Descent Can Cultivate Loving Relationships With their Children is a thoughtful, inspirational, sensitive and culturally-driven how-to manual designed for parents in the African diaspora who long to know themselves. The cumulative effect of self-discovery (development of self-awareness and acquisition of self-knowledge) is the transmission of cultural and spiritual heritage to the next generation. As a developmental and transformational process, Reality-Based Parenting is culturally specific, not universal. This is based on the multi-cultural premise of fullness before overflow. That is to say a group must recognize and affirm itself before it is able to share and appreciate the differences of others. Cultural competency then is the distinguishing characteristic of reality-based parenting. Through this book, parents are enabled to use what they have their cultural strengths to obtain what they want: a tested plan for nurturing children, a formula for instilling disciplining in the young, a model for psycho-social recovery. Conscientious readers are inspired to apply the books content to activities of daily living so that our sons may flourish in their youth like well-nurtured plants; and our daughters may be like cornerstones, polished after the similitude of a palace (Psalms 144: 12-14).
