Glaciations in North and South America from the Miocene to the Last Glacial Maximum Nat Rutter,Andrea

Coronato,Karin Helmens,Jorge Rabassa,Marcelo Zárate,2012-06-30 Improved dating methods have increased our ability to more precisely determine the timing and durations of glaciations. Utilizing glacial and loess deposits, we have compared glaciations that occurred in North and South America in order to determine if events are synchronous or not, to explore forcing mechanisms, and to compare glaciations with cold periods of the Marine Oxygen Isotope stages and the loess/paleosol records of China. Stratigraphic sections containing a variety of glacial deposits, some with interbedded volcanics, as well as loess deposits, were used in reconstructing the glacial history. The Late Pleistocene (Brunhes Chron) Last Glacial Maximum is recognized in mountain and continental areas of North America but only in the mountains of South America. Commonly our comparisons indicate roughly synchronous glaciations on the two continents, whereas other glaciations are more elusive and difficult to compare. Although our comparisons are at low resolutions, the results suggest that Milankovitch forcing is most likely the dominant trigger for hemispheric glaciation modified by local factors.

Walks of a Lifetime from Around the World Robert Manning,Martha Manning,2023-10-17 Walking is simple, but it can also be profound. In an increasingly complex and frantic world, walking can help simplify and focus our lives, is an elegantly sustainable form of recreation, deepens our understanding and appreciation of the world's great cultural landscapes, stimulates our thinking, and makes us healthier and happier in the process. In Walks of a Lifetime from Around

the World, Bob and Martha Manning invite readers to join the walking community. The heart of the book is a series of first-hand descriptions of forty of the world's great multi-day walks — walking vacations of a few days to a few weeks — spanning six continents, most U.S. states and Washington, DC, and ranging from inn-to-inn walks to backpacking treks. Many of these walks are among the world's most iconic. Trail descriptions are richly illustrated with color photographs and maps.

North-South Knowledge Networks Towards Equitable Collaboration Between Tor Halvorsen,Jorun Nossun,2017-02-23 Since the 1990s, internationalisation has become key for institutions wishing to secure funding for higher education and research. For the academic community, this strategic shift has had many consequences. Priorities have changed and been influenced by new ways of thinking about universities, and of measuring their impact in relation to each other and to their social goals. Debates are ongoing and hotly contested. In this collection, a mix of renowned academics and newer voices reflect on some of the realities of international research partnerships. They both question and highlight the agency of academics, donors and research institutions in the geopolitics of knowledge and power. The contributors offer fresh insights on institutional transformation, the setting of research agendas, and access to research funding, while highlighting the dilemmas researchers face when their institutions are vulnerable to state and donor influence. Offering a range of perspectives on why academics should collaborate and what for, this book will be useful to anyone interested in how scholars are adapting to the realities of international networking and how research institutions are finding innovative ways to make NorthSouth partnerships and collaborations increasingly fair, sustainable and mutually beneficial.

Olympic Legacies: Intended and Unintended J A Mangan,Mark Dyreson,2013-10-18 For more than a century, the Olympics have been the modern world's most significant sporting event. Indeed, they deserve much credit for globalizing sport beyond the boundaries of the Anglo-American universe, where it originated, into broader global realms. By the 1930s, the Olympics had become a global mega-event that occupied the attention of the media, the interest of the public and the energies of nation-states. Since then, projected by television, funded by global capital and fattened by the desires of nations to garner international prestige, the Olympics have grown to gargantuan dimensions. In the course of its epic history, the Olympics have left numerous legacies, from unforgettable feats to monumental stadiums, from shining triumphs to searing tragedies, from the dazzling debuts on the world's stage of new cities and nations to notorious campaigns of national

propaganda. The Olympics represent an essential component of modern global history. The Olympic movement itself has, since the 1990s, recognized and sought to shape its numerous legacies with mixed success as this book makes clear. It offers ground-breaking analyses of the power of Olympic legacies, positive and negative, and surveys the subject from Athens in 1896 to Beijing in 2008, and indeed beyond. This book was published as a special issue of the International Journal of the History of Sport.

Regional Geography of Pakistan K. R. Dikshit, Jutta K. Dikshit, 2025-02-18 This book provides an integrated view of each of the four provinces of Pakistan, considered the four micro regions, owing to their relative internal homogeneity and distinctiveness from the adjacent regions. Each chapter of the book deals with a specific province, its physical environment, historic antecedents, contemporary social and economic organization and potential for future growth. This volume presents an in-depth study of Punjab, stressing on its transformation from a barren pastureland to rich, fertile agricultural land. The mineral-rich western provinces of Baluchistan and Khyber Pakhtunkhwa are subjects of focused study. The penultimate part of the book is a regional study of Sindh, evaluating the role of Indus in the economy of the province, and the contribution of Karachi as a financial and commercial center. It also outlines the planning and development of the federal capital, Islamabad, a symbol of pride and aspiration of the people of Pakistan. The book would be of immense academic value to students, researchers and teachers interested in area studies and regional planning. With a descriptive analysis of the country's physical and social characteristics, it would also be a great source of information for professionals working in the tourism sector.
