**Christina H. Moon**

**The City and the World** Margaret E. Crahan, Alberto Vourvoulias-Bush, 1997 Although this volume looks at New York City, the United States' largest and most prominent international center, the issues and processes discussed represent fundamental challenges faced by cities and communities across the country, particularly at a time when many of the traditional functions of the central government are being privatized or decentralized.

**The Global City 2.0** Kristin Ljungkvist, 2015-08-27 Global cities all over the world are taking on new roles as they increasingly participate directly and independently in international affairs and global politics. So far, surprisingly few studies have analyzed the role of the Global City beyond its already well explicated role in the globalized economy. How is it that local governments of Global Cities claim international political authority and develop what appears to be their own independent foreign and security policies despite the fact that such policy areas have traditionally been considered to be the core function of nation-states and central governments? What does it mean to be and to govern the contemporary Global City? In this book Kristin Ljungkvist claims that we can better understand why local governments find it to be in their Global City's interest to claim international political authority by exploring how the city's role in the globalized world is constructed and narrated locally. A core claim is that Global City-hood as a specific type of collective identity can play a constitutive part in such interest formation. Combining insights from International Relations and Urban Studies scholarship, and with the help of a case study on New York City, Ljungkvist develops a new analytical framework for studying the Global City as an international political actor. The Global City 2.0 shows that even as the Global City engages in various global issues such as global environmental governance or counterterrorism, such pursuit will be framed and rationalized in terms of the city's economic growth. The quest for growth and global competitiveness are not necessarily the only available meanings attached to the being and governing of the contemporary Global City. However, there seems to be a remarkable persistency and attraction in economic ideas and an economic conception of the Global City.

**The Global City** Saskia Sassen, 2013-04-04 This classic work chronicles how New York, London, and Tokyo became command centers for the global economy and in the process underwent a series of massive and parallel changes. What distinguishes Sassen's theoretical framework is the emphasis on the formation of cross-border dynamics through which these cities and the growing number of other global cities begin to form strategic transnational networks. All the core data in this

new edition have been updated, while the preface and epilogue discuss the relevant trends in globalization since the book originally came out in 1991.

**Writing the Global City** Anthony D King, 2016-04-14 Over the last three decades, our understanding of the city worldwide has been revolutionized by three innovative theoretical concepts – globalisation, postcolonialism and a radically contested notion of modernity. The idea and even the reality of the city has been extended out of the state and nation and re-positioned in the larger global world. In this book Anthony King brings together key essays written over this period, much of it dominated by debates about the world or global city. Challenging assumptions and silences behind these debates, King provides largely ignored historical and cultural dimensions to the understanding of world city formation as well as decline. Interdisciplinary and comparative, the essays address new ways of framing contemporary themes: the imperial and colonial origin of contemporary world and global cities, actually existing postcolonialisms, claims about urban and cultural homogenisation and the role of architecture and built environment in that process. Also addressed are arguments about indigenous and exogenous perspectives, Eurocentricism, ways of framing vernacular architecture, and the global historical sociology of building types. Wide-ranging and accessible, *Writing the Global City* provides essential historical contexts and theoretical frameworks for understanding contemporary urban and architectural debates. Extensive bibliographies will make it essential for teaching, reference and research.

*The Routledge Handbook of Spanish in the Global City* Andrew Lynch, 2019-08-08 *The Routledge Handbook of Spanish in the Global City* brings together contributions from an international team of scholars of language in society to offer a conceptual and empirical perspective on Spanish within the context of 15 major cosmopolitan cities from around the world. With a unique focus on Spanish as an international language, each chapter questions the traditional and modern notions of language, place, and identity in the urban context of globalization. This collection of new perspectives on the sociology of Spanish provides an insightful and invaluable resource for students and researchers seeking to explore lesser-known areas of sociolinguistic research.

**Performance and the Global City** D. Hopkins, K. Solga, 2013-10-15 Winner of the Association for Theatre in Higher Education Excellence in Editing Award 2016 Following the ground-breaking *Performance and the City*, this new volume explores what it means to create and experience urban performance – as both an aesthetic and a political practice – in the burgeoning world where cities are built by globalization and neoliberal capital.

*Encyclopedia of Global Studies* Helmut K. Anheier, Mark Juergensmeyer, 2012-03-09 With all entries followed by cross-references and further reading lists, this current resource is ideal for high school and college students looking for connecting ideas and additional sources on them. The work brings together the many facets of global studies into a solid reference tool and will help those developing and articulating an ideological perspective. — Library Journal *The Encyclopedia of Global*

**Labor and Creativity in New York's Global Fashion Industry** Christina H. Moon, 2020-02-25 This book tells the story of fashion workers engaged in the labor of design and the material making of New York fashion. Christina H. Moon offers an illuminating ethnography into the various sites and practices that make up fashion labor in sample rooms, design studios, runways, factories, and design schools of the New York fashion world. By exploring the work practices, social worlds, and aspirations of fashion workers, this book offers a unique look into the meaning of labor and creativity in 21st century global fashion. This book will be of interest to scholars in design studies, fashion history, and fashion labor.

**Asylum Seeking and the Global City** Francesco Vecchio, 2014-08-13 Asylum seeking and the global city are two major contemporary subjects of analysis to emerge both in the literature and in public and official discourses on human rights, urban socioeconomic change and national security. Based on extensive, original ethnographic research, this book examines the situation of asylum seekers in Hong Kong and offers a narrative of their experiences related to internal and external borders, the performance of border crossing and asylum politics in the context of the global city. Hong Kong is a city with no comprehensive legislation covering refugee claims and official and public opinion is dominated by the view that the city would be flooded with illegal economic migrants were policy changes to be implemented. This book considers why Hong Kong has become a destination for asylum seekers, how asylum seekers integrate into local and global economic markets and why the illegalization of asylum seekers plays a significant role in the processes of global city formation. This book will be essential reading for academics and students involved in the study of migration; globalization and borders; research methods in criminology; social problems and urban sociology.

**Re-Living the Global City** John Eade, Chris Rumford, 2017-11-22 Living the Global City (1996) was a landmark text in the field of Global Studies, offering an analysis of globalization and global/local processes by focussing on specific issues and themes which include community, culture, milieu, socioscapes and sociospheres, microglobalization, poverty, ethnic identity

and carnival. In this new collection Eade and Rumford draw together scholars whose work has engaged with the original volume over the last 15 years and the result is a unique and thematically coherent collection of essays which both complements the original book and challenges some of its core assumptions. *Re-Living the Global City* both pays homage to a key text and pushes its agenda into important new areas. After reflecting upon how debates in the field have developed since the original publication, the contributors seek to drive the debate forward through discussion of contemporary themes and issues such as borders and bordering, social movements, community and global connectivity. They consider the ways in which the city produces different experiences of globalization for different people and examine the various accounts of the ways in which new forms of sociality are definitive of contemporary globalization and cosmopolitanism. Drawing together scholars from a range of disciplines including international relations, politics, sociology, urban studies and anthropology, this work will be of great interest to all students and scholars of global studies and globalization.

**Global City Typologies** Nigel C. Lewis, 2025-07-31 *Global City Typologies* explores the historical, cultural and socio-economic transactional forces in the development of existing cities through to newly planned and emerging cities. Individual chapters address different sets and typologies of global cities to analyse their comparative evolution and standing today. The separate parts and individual chapters have been grouped around 125 different established, planned and emerging cities and analysed according to different typologies and thematic categories that comprise historic cities, early trading cities, planned cities, emerging global cities, mega cities and megalopolitan agglomerations. These span five continents – including the industrial cities of Chicago and Manchester, new capitals such as Brasília and New Delhi, innovative cities such as Singapore and Tel Aviv and mega cities such as Mexico City. The book is fully illustrated throughout with modern and historical maps, which enables visualisation of the forces that have shaped ongoing development of these major global cities. This is an essential book for students and professionals in urban design and planning, administrators, economists, designers and developers.

**Global City-Regions** Allen J. Scott, 2001-01-25 There are now more than three hundred city-regions around the world with populations greater than one million. These city-regions are expanding vigorously, and they present many new and deep challenges to researchers and policy-makers in both the more developed and less developed parts of the world. The processes of global economic integration and accelerated urban growth make traditional planning and policy strategies in these regions increasingly inadequate, while more effective approaches remain largely in various stages of hypothesis and experimentation. 'Global City-Regions' represents a multifaceted effort to deal with the many different issues raised by these developments. It seeks at once to define the question of global city-regions and to describe the internal and external dynamics that shape them; it proposes a theorization of global city-regions based on their economic and political responses to intensifying levels of globalization; and it offers a number of policy insights into the severe social problems that confront

global city-regions as they come face to face with an economically and politically neoliberal world. At a moment when globalization is increasingly subject to critical scrutiny in many different quarters, this book provides a timely overview of its effects on urban and regional development, one of its most important (but perhaps least understood) corollaries. The book also offers a series of nuanced visions of alternative possible futures.

**The Global Cities Reader** Neil Brenner, Roger Keil, 2006 This book contains fifty selections from classic writings by authors such as John Friedmann, Michael Peter Smith, Saskia Sassen, Peter Taylor, Manuel Castells and Anthony King, as well as major contributions by other international scholars of global city formation.

**Sustainability in the Global City** Gary McDonogh, Melissa Checker, 2015-03-05 This volume is a vital contribution to conversations about urban sustainability, looking beyond the propaganda to explore its consequences for everyday life.

*Bloomberg's New York* Julian Brash, 2011 New York mayor Michael Bloomberg claims to run the city like a business. In Bloomberg's New York, Julian Brash applies methods from anthropology, geography, and other social science disciplines to examine what that means. He describes the mayor's attitude toward governance as the Bloomberg Way--a philosophy that holds up the mayor as CEO, government as a private corporation, desirable residents and businesses as customers and clients, and the city itself as a product to be branded and marketed as a luxury good. Commonly represented as pragmatic and nonideological, the Bloomberg Way, Brash argues, is in fact an ambitious reformulation of neoliberal governance that advances specific class interests. He considers the implications of this in a blow-by-blow account of the debate over the Hudson Yards plan, which aimed to transform Manhattan's far west side into the city's next great high-end district. Bringing this plan to fruition proved surprisingly difficult as activists and entrenched interests pushed back against the Bloomberg administration, suggesting that despite Bloomberg's success in redrawing the rules of urban governance, older political arrangements--and opportunities for social justice--remain.

**Global City-Twinning in the Digital Age** Michel S Laguerre, 2019-12-18 For many years, cities throughout the globe have developed ties with each other to process and nurture friendship, solidarity, and collaboration. These city relationships constitute a mode of governance distinct from those of cities that are not involved in such cross-border arrangements, with influence that expands far beyond region. In this light, *Global City-Twinning in the Digital Age* unveils an analysis of intercity relationships both on a global scale and as a global phenomenon with digital communication technologies that play key roles in upgrading traditional practices, enhancing cross-border cooperation, and facilitating the production of digital sister cities. This book analyzes the deployment of sister-city formations and operations throughout the world with a focus on cities of North America, Latin America, North Africa, Europe, and the Mediterranean region. Using a global approach, it discusses friendship, entrepreneurship, urban development, cooperative management, municipal policy, and digital entanglements. It expands the scope of study of sister cities by unveiling the role of immigrants, diaspora, and post-diaspora in the making and

functioning of the digital model of sister cities.

The City Reader Richard T. LeGates, Frederic Stout, 2015-07-16 The sixth edition of the highly successful The City Reader juxtaposes the very best classic and contemporary writings on the city to provide the comprehensive mapping of the terrain of Urban Studies and Planning old and new. The City Reader is the anchor volume in the Routledge Urban Reader Series and is now integrated with all ten other titles in the series. This edition has been extensively updated and expanded to reflect the latest thinking in each of the disciplinary areas included and in topical areas such as compact cities, urban history, place making, sustainable urban development, globalization, cities and climate change, the world city network, the impact of technology on cities, resilient cities, cities in Africa and the Middle East, and urban theory. Sixty generous selections are included: forty-four from the fifth edition, and sixteen new selections, including three newly written exclusively for The City Reader. Burgess, LeCorbusier, Lewis Mumford, Jane Jacobs, and Louis Wirth, as well as the best contemporary writings of, among others, Peter Hall, Manuel Castells, David Harvey, Saskia Sassen, and Kenneth Jackson. In addition to newly commissioned selections by Yasser Elshestawy, Peter Taylor, and Lawrence Vale, new selections in the sixth edition include writings by Aristotle, Peter Calthorpe, Alberto Camarillo, Filip DeBoech, Edward Glaeser, David Owen, Henri Pirenne, The Project for Public Spaces, Jonas Rabinovich and Joseph Lietman, Doug Saunders, and Bish Sanyal. The sixth edition includes fifty plates in four plate sections, substantially revised from the fifth edition.

Power in the Global Era T. Cohn, S. McBride, J. Wiseman, 2000-09-08 This volume discusses the effects of globalization on changing power relationships between transnational corporations (TNCs), and transnational capital, the state, and subnational groups. TNCs have expanded their power with the deepening of market relations, but they are not causing the state to wither away. Indeed, neoliberal changes often occur with the permission or even encouragement of powerful states. Transnational capital has weakened labour groups in order to make production more competitive, but the disadvantaged groups may mobilise to counter the power of transnational capital. Finally, globalization is subjecting domestic policies to increased international scrutiny.

Education in the Global City Aaron Koh, Terence Chong, 2017-10-02 Education in the Global City examines education in Singapore through the critical lens of 'manufacturing'. The book brings together two disparate fields which inform each other, education and the 'global city'; and the book's contributors analyse and critique the manufacturing of Singapore education and Singapore's global city formation. The collection covers vocational education, language policies, Higher

Education, English education, critical thinking, sex education, creativity, and critical feminist scholarship. Collectively, the book pries open the ideology of the manufacturing education system, and points out the tension between the nation and its ideologies, and the 'global city' aspirations. It also asks how education contributes to, and is shaped by, the market realities of Singapore's global city ambitions - which are at odds with the nationalistic local agenda and priorities of nation-building. In interrupting and speaking against the prevailing (and narrow) manufacturing of education for a teleological end, in spite of Singapore's successful nation-building, this book is an important contribution to critical education scholarship. This book was originally published as a special issue of *Discourse: Studies in the Cultural Politics of Education*.

**Another Global City** P. Saunier, 2008-07-21 This collection uses the transnational activities of municipal urban governments to historicize the origins and development of the global city, focusing on how urban problems were addressed with concepts that emerged from the world in between nations and cities.
