**The Project Manager's MBA** Dennis J. Cohen, Robert J. Graham, 2001-07-09 Project managers are no longer judged by the technical success of their projects alone. They're also held accountable for their contributions to the company's financial

goals. Yet most project managers don't have the business knowledge necessary to make project-based decisions that lead to bottom-line success. In this book, Dennis Cohen and Robert Graham, both former university professors and experienced project management consultants, provide the skills that, until now, could only be gained through a graduate degree and years of hands-on experience. Cohen and Graham walk project managers through basic business concepts such as value creation, accounting and finance, strategy, and marketing. They connect these concepts to the decisions project managers face every day. And they make it easy to apply the resulting solutions on the job through a unique business systems calculator. Readers can use the online calculator in conjunction with the book to understand how different project variables affect business outcomes, to determine the overall impact of proposed project changes, and to evaluate the economic results of many decisions they make. Cohen and Graham's principles apply equally to projects in business, non-profit, and government organizations. And each one is illustrated through case studies drawn from a range of industries, including pharmaceuticals, the technology sector, even the winemaking business. Whether the mandate is to get new products to market, improve the infrastructure, or better serve customers and clients, this book teaches project managers how to make day-to-day decisions from an upper-management perspective. And it provides a blueprint for planning and pitching potential projects that demonstrates a higher level of business savvy.

*How Indian Business Went Global* Benedict Paramanand, 2019-05-29 This book is an intimate and a rare collection of more than 30 stories of top Indian business leaders about how late Professor CK Prahalad inspired and guided them through their most painful journey after the 1991 Economic Reforms. Most of them, who didn't think they could survive the MNC onslaught, went on to build profitable global enterprises. At a time when most business and management ideas are getting debunked CK's radical approach to strategy, managing people, leadership, teaching, and life, will continue to be relevant and

will interest business leaders, entrepreneurs, policy makers, students and the academia around the world. The first edition, published in 2014, covered a wide area and was perceived as CK's biography. This edition covers more business pole-vaulting stories with a separate chapter on India's mammoth potential to become a global leader in healthcare. This book is an invitation to celebrate and learn from one of the world's greatest management thinkers. "CK was gathering us like a shepherd would gather his flock and was essentially bent on chastising us for what we hadn't done and how we could do."

Thinking the Unthinkable: A new imperative for leadership in the digital age Chris Langdon, Nik Gowing, 2018-06-08

Executive leadership faces new vulnerabilities. Many leaders privately concede them, but few are willing to talk publicly about them. Unthinkable events since 2014 have revealed a new leadership fragility at the highest levels. And the pace of change in 2017 shows that the uncertainties are greater than ever. Is this the new normal? Thinking The Unthinkable is an investigation into why leaders have appeared more unable or unwilling than ever to anticipate the biggest issues of our time. In an era of wicked problems why are current leadership behaviours and culture apparently not fit for purpose? What are the causes of so many failures in policy and strategic forecasting? Are they human frailties? Or are they systemic failures to embrace smartly new realities? Through hundreds of interviews and conversations, Nik Gowing and Chris Langdon have analysed the deep new challenges to the human capacity of leaders at the highest levels to accept, understand, embrace then handle the extraordinary processes of change and disruption. This essential book draws on the candid responses. The findings are scary and disconcerting.

**Your Next Five Moves** Patrick Bet-David, Greg Dinkin, 2021-06 Originally published in hardcover in 2020 by Gallery Books.

**The New Localism** Bruce Katz, Jeremy Nowak, 2018-01-09 The New Localism provides a roadmap for change that starts in the communities where most people live and work. In their new book, The New Localism, urban experts Bruce Katz and

Jeremy Nowak reveal where the real power to create change lies and how it can be used to address our most serious social, economic, and environmental challenges. Power is shifting in the world: downward from national governments and states to cities and metropolitan communities; horizontally from the public sector to networks of public, private and civic actors; and globally along circuits of capital, trade, and innovation. This new locus of power—this new localism—is emerging by necessity to solve the grand challenges characteristic of modern societies: economic competitiveness, social inclusion and opportunity; a renewed public life; the challenge of diversity; and the imperative of environmental sustainability. Where rising populism on the right and the left exploits the grievances of those left behind in the global economy, new localism has developed as a mechanism to address them head on. New localism is not a replacement for the vital roles federal governments play; it is the ideal complement to an effective federal government, and, currently, an urgently needed remedy for national dysfunction. In *The New Localism*, Katz and Nowak tell the stories of the cities that are on the vanguard of problem solving. Pittsburgh is catalyzing inclusive growth by inventing and deploying new industries and technologies. Indianapolis is governing its city and metropolis through a network of public, private and civic leaders. Copenhagen is using publicly owned assets like their waterfront to spur large scale redevelopment and finance infrastructure from land sales. Out of these stories emerge new norms of growth, governance, and finance and a path toward a more prosperous, sustainable, and inclusive society. Katz and Nowak imagine a world in which urban institutions finance the future through smart investments in innovation, infrastructure and children and urban intermediaries take solutions created in one city and adapt and tailor them to other cities with speed and precision. As Katz and Nowak show us in *The New Localism*, “Power now belongs to the problem solvers.”
