**Evaluating Mental Health Services for Older People** Jenny Finch,2004 This book provides a comprehensive account of the current developments in mental health services for older people and describes a robust model for evaluating health and social care to improve these services. Drawing on international experience, it provides accounts of the development of mental health services for older people in the UK, Europe, the USA, Canada and Australia. The approaches to evaluating health and social care in these countries are all outlined, and a comparative analysis is given. The services currently offered are patchy, so there is a pressing need for effective mechanisms to be introduced in order to monitor quality - this book will show you how. Managers and commissioners working within Primary Care Trusts, NHS Trusts, Strategic Health Authorities, geriatricians, psychiatrists, psychologists and allied health and social care professionals will find this book valuable reading.

**Basic Concepts of Psychiatric-mental Health Nursing** Louise Rebraca Shives,2007 This seventh edition includes new chapters and maintains popular features from previous editions such as self awareness prompts while adding research boxes and student worksheets at the end of each chapter.

**Mental Health Systems Compared** R. Paul Olson,2006 The primary objective of this book is to provide comprehensive descriptions and make comparative evaluations of each of the mental health systems of four Western, industrialized countries. The countries selected illustrate a continuum from a highly centralized and publicly financed, national health service in Great Britain to a predominantly decentralized and more privately financed market of mental health services in the United States. In between these two contrasting types are examples of national health services and insurance programs in Norway and Canada. Contributing experts from each country begin their chapters with an overview of the geographic, demographic, political, economic, and cultural contexts in which their mental health systems are situated. Thereafter, they (a) present national data to estimate the need for mental health services, (b) describe national mental health policies and programs designed to meet their population's need, (c) indicate how mental health services are organized and delivered, and (d) discuss how their system is financed and provided resources. A common chapter outline facilitates comparisons among all four systems on relevant evaluation criteria: (a) access and equity, (b) quality and efficacy, (c) cost and efficiency, (d)

financing and fairness, (e) protection and participation, and (f) population relevance. In the final section of each chapter, the authors provide recommendations for improved performance of their mental health system. In the initial chapter, the editor provides an overview, introduces the four countries selected, and defines the evaluation criteria applied by all contributing authors. The final two chapters address convergence and divergence among the four systems and provide recommendations for improvement and for future comparative studies. The intended audience includes mental health policymakers, program administrators and managers; teachers of graduate level courses relat

**Psychiatry** Neel Burton, 2011-12-15 This book is very different from any medical textbook you've ever read... its greatest merit is to have single-handedly transformed the perception of psychiatry from that of Cinderella speciality to that of hottest speciality on offer. Following in the footsteps of the groundbreaking first edition, this second edition of Psychiatry is a comprehensive textbook of mental health that brings its subject alive with numerous case studies, images and photographs, and short references from the arts, history, and philosophy. These not only facilitate learning and memorisation, but also highlight the subjective experience of mental illness, and stimulate thought into the nature of the human experience. Based on extensive feedback from students and lecturers, this second edition places greater emphasis on psychological treatments, clinical skills, and exam success, and integrates more than 350 self-assessment questions. Other important features include: A clear and attractive layout with colour coding and colour images and photographs Learning objectives,

boxed summaries, and self-assessment questions in every chapter Step-by-step coverage of the psychiatric history, mental state examination, and formulation, with an integrated account of the signs and symptoms of mental disorders and a model case history Clinical skills/OSCE boxes on competencies such as enquiring about delusions and hallucinations, assessing suicidal risk, and assessing capacity Greater coverage of psychiatric subspecialties An expanded chapter on the history of psychiatry with introductions to Freud and Jung Psychiatry is the perfect textbook for medical students, junior doctors, GPs, and all healthcare professionals needing a thorough account of mental disorders.

**Social and Community Psychiatry** Stelios Stylianidis, 2016-05-14 This book presents the basic theoretical and historical concepts and it describes current perspectives and data, focusing on good practices in community psychiatry in Greece and in other parts of Europe. Concepts such as the biopsychosocial model, psychiatric reform, psychosocial rehabilitation and the recovery model, as well as new case management models are approached from a critical, anthropocentric perspective. The current socioeconomic crisis in Europe brings with it new realities in mental health systems. New forms of social suffering are forcing the psychiatric community to re-examine what is considered normal. In order to respond to the complexity of the newly emerging needs, social and community psychiatry has been compelled to broaden the objectives of intervention and research alike, developing new and dynamic relations with complementary scientific fields such as social anthropology, psychoanalysis and microeconomics. The present work is the result of collaboration between professionals from across these different fields.

Oxford Textbook of Inpatient Psychiatry Alvaro Barrera, Caroline Attard, Rob Chaplin, 2019-05-28 Inpatient mental health care is an essential part of community-based mental health care in the UK. Patients admitted to acute mental health wards are often experiencing high levels of distress and acute mental illness and need to be assessed, managed, and treated by a wide team of mental health care professionals. Inpatient care is often a traumatic experience for patients and their relatives which can define their relationship with mental health care services. Reforming inpatient psychiatry is a priority for both patients and staff, yet there are few reference texts on this psychiatric specialty. The Oxford Textbook of Inpatient Psychiatry bridges this gap by offering a comprehensive and pragmatic guide to the UK's inpatient mental health care system today. Written and edited by a multidisciplinary team, this innovative resource discusses the real-life experiences and challenges of a wide range of professionals working on acute mental health wards. Organized into 8 sections this resource covers nursing, team leadership, multidisciplinary work, psychology, and medical aspects. Individual chapters address key topics such as the management of children and adolescents, and contain information on up-to-date research and best practice. Focusing on the dignity and autonomy of patients, this unique resource offers a model for clinical and organizational practice both at a national and international level.

**Oxford Textbook of Primary Medical Care** Roger Jones (Prof.), 2005

*Textbook of Community Psychiatry* Wesley E. Sowers, Hunter L. McQuiston, Jules M. Ranz, Jacqueline Maus Feldman, Patrick S. Runnels, 2022-10-17 The second edition of the AACPP's (American Association for Community Psychiatry) Textbook of Community Psychiatry is a welcome update of this notable work that comprehensively presents the state of the art in this field. Along with continuously evolving scientific advances and principles of clinical care, community psychiatry must respond to shifts in public policy as well as economic climate. The past decade has witnessed significant political and social changes, including climate change, immigration levels, technological advancement, the influence of social media and the rise of political unrest. This new edition reflects these wider changes, incorporating new chapters and enhancing previous ones. It remains the standard text for certification of those working in healthcare and social welfare systems design and delivery of services. Readers will gain knowledge of: Basic pillars of the field Evidence based interventions Telepsychiatry and technological aids Trauma informed services Integrated health systems Social determinants of health Structural discrimination

**Essentials of Mental Health Nursing - Theory and Practice** Mr. Rohit Manglik, 2024-06-24 A core guide for nurses on psychiatric disorders, therapeutic communication, and mental health assessment and intervention.

**Confidentiality and Mental Health** Christopher Cordess, 2001-01-01 People experiencing mental health problems may need to be able to present and explore deeply disturbing thoughts and actions in a safe environment. This book will enable professionals to meet both the needs of clients and the demands of society through a responsible and thoughtful understanding of the significance of confidentiality and disclosure.

Mental Health Care Delivery Isaac M. Marks, Robert A. Scott, 1990-08-31 The provision of effective mental health services, at a reasonable cost, to all sections of the population is one of the most pressing problems facing clinicians, planners and administrators of mental health services in the industrialised countries. Changes in paradigms for mental health care delivery are accelerating, and are likely to culminate in the 1990s in major shifts in many countries. This book reviews the emerging patterns of health care delivery in different western countries, outlining the innovations of recent years and analysing some of the impediments to their full implementation. The contributors are all prominent experts in mental health services, whose chapters comprise an up-to-date account of many of the most important issues in mental health care delivery today. The text falls into three sections. Part I describes a number of innovations in the community care of psychiatric patients, including programmes for psychotic patients, primary care based psychiatric services for non-psychotics and emergency services in community settings. Part II examines the main impediments to their systematic implementation whether sociopolitical, administrative, economic or professional. Part III integrates the book, provides an overview, and details some specific issues in the implementation of innovation in mental health care delivery.
