**Minjie Lin**

*Marine Protected Areas for Whales, Dolphins and Porpoises* Erich Hoyt, 2012-10-02 The first edition of the widely praised *Marine Protected Areas for Whales, Dolphins and Porpoises*, published in 2005, led to numerous new marine protected area proposals and a number of notable conservation successes around the world. In this completely revised and expanded second edition, new developments in the Mediterranean, Caribbean and Pacific are described, as well as future directions for High Seas protection. New sections show how to design and manage MPAs in an ever noisier ocean subject to climate change, increased shipping and hydrocarbon exploration. The process of protected area creation for cetaceans has been accelerated and more than 200 exciting new places are detailed in this edition. This book provides a route map for MPA managers, as well as countries, to meet the ambitious targets for highly protected MPA networks by 2012 and 2020. This book is a key conservation tool and a springboard for worldwide change in human attitudes toward the world ocean where all life originated and where the majority of life on Earth still lives.

Marine Reserves Jack Sobel, Craig Dahlgren, 2004-08-06 Annotation. Describes the need for marine reserves and their potential benefits, examines how reserves can be designed to achieve specific objectives, and considers gaps in our knowledge and the research needed to address those gaps.

Partnership for Conservation Rodney V. Salm, Yemi Tessema, 1998

The Riches of Diani-Chale, 2002

**Marine and Coastal Protected Areas** Rodney V. Salm, John R. Clark, Erkki Siirila, 2000 This is a new edition of the classic textbook on marine protected area (MPA) management in the tropics, originally produced as an output of the Bali World Parks Congress in 1982. Approaches to planning and managing MPAs have evolved considerably. Major advances include innovative financing mechanisms, partnerships with the private sector and NGOs, and collaborative management between government and coastal communities. These advances have brought new approaches for MPA establishment and management that are more participatory, involving communities through interaction and collaboration rather than prescription. With new case studies and illustrations, the guide comes in a water-resistant cover for field use. It is intended for those who plan individual and/or national MPA systems and gives philosophical context for MPAs along with some basic principles and approaches.

**Conservation of Tropical Coral Reefs** Brian Joseph McFarland, 2020-12-16 This book critically engages with how the conservation of tropical coral reefs is financed. Beginning with the context of tropical coral reef degradation and loss, alongside an overview of tropical ecology, global environmental policy and finance, the book reviews several conservation financing instruments. These include ecotourism, debt-for-nature swaps, impact investments, and government domestic budgetary expenditures. From the Great Barrier Reef, to the Coral Triangle, to the Mesoamerican Reef, tropical coral reef degradation and loss are serious global environmental issues, contributing to loss revenue and food insecurity for coastal communities, and species extinction. Yet, many leading companies, individuals, and governments are making a positive impact on tropical coral reef conservation through the use of conservation finance. *Conservation of Tropical Coral Reefs*, using 30 case studies which span 23 countries and 6 continents, tells the history of international conservation finance and provides a variety of options for individuals, businesses, and governments to support conservation financing projects.

*Coral Reefs of the Indian Ocean* T. R. McClanahan, C. R. C. Sheppard, D. O. Obura, 2000-10-12 Coral reefs are among Earth's most diverse, productive, and beautiful ecosystems, but until recently, their ecology and the means to manage them have been poorly understood and documented. In response to the inadequate information base for coral reefs, this book reviews the ecological and conservation status of coral reefs of the Western Indian Ocean, bringing together presentations of the region's leading scientists and managers working on coral reefs. *Coral Reefs of the Indian Ocean: Their Ecology and Conservation* starts with a general overview of the biogeography of the region and a historical account of attempts to conserve this ecosystem. It goes on to describe the state of the reefs in each of the countries with coral reefs, and it concludes with a series of management case studies. The book also summarizes most of the existing ecological information on reefs in this region and efforts at management, making it useful for students, teachers, and investigators interested in tropical or marine ecology, conservation biology and management, and environmental sciences.

**Insight Guides: Kenya** Insight Guides, 2013-02-15 Insight Guide Kenya is illustrated throughout with hundreds of specially commissioned colour photographs. Our inspirational Best of Kenya section illustrates the country's highlights, from wildlife safaris to dive sites and Swahili landmarks to tropical beaches - making sure you don't miss anything. With a longer and more in-depth history and culture section than its competitors, this guide provides an essential introduction to Kenya's archaeological importance, colonial history and transition to a modern republic and tourist magnet. The informative text, written by regional experts, is a pleasure to read and accompanied by stunning photography. A fact-filled wildlife section covers mammals, reptiles and birds and a handy gazetteer provides an on-the-spot reference source to help identify animals on safari. Lavish Photo Features offer a unique insight into the country's bird and plant life, and the Maasai tribes people and Swahili culture. All major sights are cross-referenced with the maps, and the travel tips section provides a wealth of practical information on how to plan your trip, choosing a safari, plus carefully selected hotel and restaurant listings.

**Kenya Coast Handbook** Jan Hoorweg,D. Foeken,2000 The Kenya Coast poses a development enigma in more than one way. Historically it was part of the Indian Ocean world and its economy. With the coming of colonial rule and later nationhood, the political and economic allegiances inevitably changed. Economic and political power shifted to the centre of Kenya. The coastal region is not richly endowed in natural resources but it has economic lynchpins in the port of Mombasa which serves Kenya and other East African countries, the tourism industry which has great potential and which flourished in previous decades but has recently shown a steep decline, and agriculture which so far serves mainly as a means of subsistence for large parts of the local population. Despite this potential the region finds itself in a marginal position. This book traces the causes behind this situation and analyses it from different angles - political, economical and social. Contributors from very different disciplines review resources, economy, people and history as well as the development potential and existing development limitations. The latter consist not only of infrastructural and human constraints but also of fragile coastal ecosystems, such as coral reefs, beaches and mangrove forests, that easily suffer from environmental degradation. This book is an indispensable tool for anyone with a professional interest in the East African Coast. The book contains 26 chapters divided over 6 sections: Introduction, General Background, People and History, Economic Resources, Human Resources, and Development Issues. The book also contains a large bibliography and statistical information.

*Towards Sustainable Fisheries Law* Gerd Winter,2009 With the growing scarcity of fish resources, instruments of fisheries management become crucial. This publication suggests a legal approach to this issue, and focuses on six case studies: Indonesia, Kenya, Namibia, Brazil, Mexico and the EU. The case studies are preceded by an analysis of the international law requirements concerning fisheries management, with a focus on fisheries in Exclusive Economic Zones. The final part of the book summarises the case studies and develops a proposal for a 'legal clinic' for fisheries management.

**A Guide to the Seashores of Eastern Africa and the Western Indian Ocean Islands** Matthew D. Richmond,1997

**East African Ecosystems and Their Conservation** T. R. McClanahan,T. P. Young,1996 East Africa is one of the most diverse and interesting tropical area on the planet. It is home not only to the last great megafaunal assemblage, but also to human populations with the highest growth rates. This book draws on the expertise of leading ecologists, each intimately familiar with a particular set of East African ecosystems, to provide the first in-depth and integrated account of the ecology, management, threats, and conservation of these diverse ecosystems. Summarizing the tremendous wealth of scientific

research that has come out of East Africa in the last few decades, each chapter analyses a given ecosystem type, taking the reader through the basics of its ecology, its historical use (and misuse) by humans, and its prospects for conservation. Throughout the book, linkages and similarities among ecosystems are emphasized, the historical and contemporary role of humans in shaping these ecosystems is considered, fundamental principles of ecology are considered, and interesting case studies are highlighted. Students and researchers in ecology, conservation biology, and environmental sciences will find this book useful in their work.
