Contracting for Services in State and Local Government Agencies William Sims Curry,2016-04-28 This second edition of *Contracting for Services in State and Local Government Agencies* provides state-of-the-art tools for best practice in the procurement of services at state and local levels, from initial stages through to completion. Including lively case studies and research conducted with state and local agencies across the United States, this book provides management advice and tips on compliance to reduce costs, select the best-qualified contractors, manage contractors' performance, and prevent corruption and waste. Utilizing the results of new research in all fifty states, author William Sims Curry offers updated best-practice documents, methodologies, and templates including: a Request for Proposal (RFP), a scorecard for proposals to select the best-qualified contractor, a toolkit for meeting socioeconomic contracting goals without compromising price, quality, or on-time delivery, and a Model Services Contract (MSC). Special consideration is given to obtaining services and products in states of emergency. Several additional resources for practitioners are available online, including sample contracts and a straightforward, inexpensive tool for tracking contractors' progress and cost management. The roadmap and templates contained in this book and available online to readers will prove essential to state and local government agency contracting professionals and other officials and employees called upon to participate in the drafting of solicitations, writing sole source justifications, writing scopes of work, serving on advance contract planning and source selection teams, recommending award of contracts, or assisting in the management of those contracts.

Government Contracting William Sims Curry,2016-08-05 The second edition of *Government Contracting: Promises and Perils* picks up where the first edition's mission left off: exposing fraud, incompetence, waste, and abuse (FIWA) and analyzing corruption, mismanagement, and ineptitude that defile government contracting. The first edition thoroughly outlined procurement throughout the contracting cycle including initial planning, contractor selection, contract administration, contract closeout, and auditing. This significantly revised new edition provides additional much-needed guidance on contracting documents, management tools, and processes for addressing negative influences on government contracting, including an improved approach to evaluating proposals. Specific guidance for avoiding FIWA is provided for government officials and employees, government agencies, and government contractors, and practical solutions to problems faced by individuals and organizations involved in government contracting are intended for both practitioner and pedagogical applications. The Government Procurement Corruption Wall of Shame that was introduced in the first edition to illustrate contracting perils such as conflicts of interest, duplicity, favoritism, incompetence, kickbacks, and protests is continued in the second edition, and cases illustrating the existence of FIWA in government contracting have been thoroughly updated. Contracting documents and contract management tools are provided on a website designed to accompany the book. Written at the graduate level and specifically intended for state, local, federal, and international government procurement activities, this textbook is required reading for public procurement, contract management, business, and public administrations courses.
