The Works of Saint Augustine Saint Augustine (of Hippo),1990 In 1990, New City Press, in conjunction with the

Augustinian Heritage Institute, began the project known as: The Works of Saint Augustine, A Translation for the 21st Century. The plan is to translate and publish all 132 works of Saint Augustine, his entire corpus into modern English. This represents the first time in which The Works of Saint Augustine will all be translated into English. Many existing translations were often archaic or faulty, and the scholarship was outdated. New City Press is proud to offer the best modern translations available. The Works of Saint Augustine, A Translation for the 21st Century will be translated into 49 published books. To date, 41 books have been published by NCP containing 93 of The Works of Saint Augustine, A Translation for the 21st Century. Augustine's writings are useful to anyone interested in patristics, church history, theology and Western civilization. -- Publisher.

Realisms Interlinked Arindam Chakrabarti, 2019-09-19 This book brings together over 25 years of Arindam Chakrabarti's original research in philosophy on issues of epistemology, metaphysics, and philosophy of mind. Organized under the three basic concepts of a thing out there in the world, the self who perceives it, and other subjects or selves, his work revolves around a set of realism links. Examining connections between metaphysical stances toward the world, selves, and universals, Chakrabarti engages with classical Indian and modern Western philosophical approaches to a number of live topics including the refutation of idealism; the question of the definability of truth, and the possibility of truths existing unknown to anyone; the existence of non-conceptual perception; and our knowledge of other minds. He additionally makes forays into fundamental questions regarding death, darkness, absence, and nothingness. Along with conceptual clarification and progress towards alternative solutions to these substantial philosophical problems, Chakrabarti demonstrates the advantage of doing philosophy in a cosmopolitan fashion. Beginning with an analysis of the concept of a thing, and ending with an analysis of the concept of nothing, *Realisms Interlinked* offers a preview of a future metaphysics, epistemology, and philosophy of mind without borders.

Aristotle and Philoponus on Light Jean De Groot, 2015-08-14 Originally published in 1991. Philoponus' long commentary on Aristotle's definition of light sets up the major concerns, both in optics and theory of light, that are discussed here. Light was of special interest in Neoplatonism because of its being something incorporeal in the world of natural bodies. Light therefore had a special role in the philosophical analysis of the interpenetration of bodies and was also a paradigm for the soul-body problem. The book contains much about the physiology of vision as well as the propagation of light. Several chapters investigate the philosophical theory behind what came to be known as 'multiplication of species' in medieval light

theory. These issues in the history of science are placed within an analysis of Neoplatonic development of the distinction between Aristotle's kinesis and energeia. The book treats Philoponus' philosophy of mathematical science from the point of view of matter, quantity, and three-dimensionality.

Being in Time to the Music David Ross, 2008-12-18 Being-in-time to the music from the ground up is a work in phenomenology, where this term is broadly defined, comprehending Plato, Heidegger, Hegel, and Marx. The most direct referent is Hegel, together with the theoretical revolution that he initiated with Phenomenology of Mind. This text's more general purpose is to set the tone for a 21st communism based upon the idea of dancing with death, assuming full responsibility for one's mortality, and abandoning the self to love as the meaning of existence. This dance is choreographed through my conversations with the above mentioned writers. In conversing with them I aim to displace (if not usurp) them from the throne of honour which is nothing more than the authority borrowed from me. By this I do not intend to deny completely their 'other to me' character. However, they exist or even 'figure' for me, both in the sense of 'count,' having importance, as those that I read, and by which I read myself. They have borrowed my authority, namely, my own potential to be an author. So 'reading them is to re-assume that borrowed authority. The life of the reader, to paraphrase Barthes, begins with the death of the author.

Seeing Dark Things Roy A. Sorensen, 2011-06-09 Roy Sorensen here defends the causal theory of perception by treating absences as causes. He draws heavily on common sense and psychology to vindicate the assumption that we directly perceive

absences.
