Redefining Liberal Arts Education in the Twenty-First Century Robert E. Luckett Jr., 2021-05-28 Contributions by William D. Adams, Sarah Archino, Mario J. Azevedo, Katrina Byrd, Rico D. Chapman, Helen O. Chukwuma, Monica Flippin Wynn, Tatiana Glushko, Eric J. Griffin, Kathi R. Griffin, Yumi Park Huntington, Thomas M. Kersen, Robert E. Luckett Jr., Floyd W. Martin, Preselfannie W. McDaniels, Dawn Bishop McLin, Lauren Ashlee Messina, Byron D'Andra Orey, Kathy Root Pitts, Candis Pizzetta, Lawrence Sledge, RaShell R. Smith-Spears, Joseph Martin Stevenson, Seretha D. Williams, and Karen C. Wilson-Stevenson *Redefining Liberal Arts Education in the Twenty-First Century* delves into the essential nature of the liberal arts in America today. During a time when the STEM fields of science, technology, engineering, and math dominate the narrative around the future of higher education, the liberal arts remain vital but frequently dismissed academic pursuits. While STEAM has emerged as a popular acronym, the arts get added to the discussion in a way that is often rhetorical at best. Written by scholars from a diversity of fields and institutions, the essays in this collection legitimize the liberal arts and offer visions for the role of these disciplines in the modern world. From the arts, pedagogy, and writing to social justice, the digital humanities, and the African American experience, the essays that comprise *Redefining Liberal Arts Education in the Twenty-First Century* bring attention to the vast array of ways in which the liberal arts continue to be fundamental parts of any education. In an increasingly transactional environment, in which students believe a degree must lead to a specific job and set income, colleges and universities should take heed of the advice from these scholars. The liberal arts do not lend themselves to the capacity to do a single job, but to do any job. The effective teaching of critical and analytical thinking, writing, and speaking creates educated citizens. In a divisive twenty-first-century world, such a citizenry holds the tools to maintain a free society, redefining the liberal arts in a manner that may be key to the American republic.

Art history Michael Hatt, Charlotte Klonk, 2025-03-18 *Art History: A critical introduction to its methods* provides a lively and stimulating introduction to methodological debates within art history. Offering a lucid account of approaches from Hegel to post-colonialism, the book provides a sense of art history's own history as a discipline from its emergence in the late-

eighteenth century to contemporary debates. By explaining the underlying philosophical and political assumptions behind each method, along with clear examples of how these are brought to bear on visual and historical analysis, the authors show that an adherence to a certain method is, in effect, a commitment to a set of beliefs and values. The book makes a strong case for the vitality of the discipline and its methodological centrality to new fields such as visual culture. This book will be of enormous value to undergraduate and graduate students, and also makes its own contributions to ongoing scholarly debates about theory and method.

Video Art Historicized Malin Hedlin Hayden, 2016-03-03 Video art emerged as an art form that from the 1960s and onwards challenged the concept of art - hence, art historical practices. From the perspective of artists, critics, and scholars engaged with this new medium, art was seen as too limiting a notion. Important issues were to re-think art as a means for critical investigations and a demand for visual reconsiderations. Likewise, art history was argued to be in crisis and in need of adapting its theories and methods in order to produce interpretations and thereby establish historical sense for moving images as fine art. Yet, as this book argues, video art history has evolved into a discourse clinging to traditional concepts, ideologies, and narrative structures - manifested in an increasing body of texts. *Video Art Historicized* provides a novel, insightful and also challenging re-interpretation of this field by examining the discourse and its own premises. It takes a firm conceptual approach to the material, examining the conceptual, theoretical, and methodological implications that are simultaneously contested by both artists and authors, yet intertwined in both the legitimizing and the historicizing processes of video as art. By engaging art history's most debated concepts (canon, art, and history) this study provides an in-depth investigation of the mechanisms of the historiography of video art. Scrutinizing various narratives on video art, the book emphasizes the profound and widespread hesitations towards, but also the efforts to negotiate, traditional concepts and practices. By focusing on the politics of this discourse, theoretical issues of gender, nationality, and particular themes in video art, Malin Hedlin Hayden contests the presumptions that inform video art and its history.

Art History and Fetishism Abroad Gabriele Genge, Angela Stercken, 2014-12-15 By focusing on the various modes and media of the fetishised object, this anthology shifts the debates on thingness into a new global art historical perspective. The contributors explore the attention given to those material images, in both artistic and cultural practice from the heyday of colonial expansion until today. They show that in becoming vehicles and agents of transculturality, so called »fetishes« take shape in the 17th to 19th century aesthetics, psychology and ethnography - and furthermore inspire a recent discourse on magical practice and its secular meanings requiring altered art historical approaches and methods.

Theory for Art History Jae Emerling, 2019-06-06 *Theory for Art History* provides a concise and clear introduction to key contemporary theorists, including their lives, major works, and transformative ideas. Written to reveal the vital connections between art history, aesthetics, and contemporary philosophy, this expanded second edition presents new ways for

rethinking the methodologies and theories of art and art history. The book comprises a complete revision of each theorist; updated and trustworthy bibliographies on each; an informative introduction about the reception of critical theory within art history; and a beautifully written, original essay on the state of art history and theory that serves as an afterword. From Marx to Deleuze, from Arendt to Rancière, *Theory for Art History* is designed for use by undergraduate students in courses on the theory and methodology of art history, graduate students seeking an introduction to critical theory that will prepare them to engage the primary sources, and advanced scholars in art history and visual culture studies who are themselves interested in how these perspectives inflect art historical practice. Adapted from *Theory for Religious Studies* by William E. Deal and Timothy K. Beal.

The Trans/National Study of Culture Doris Bachmann-Medick, 2014-02-27 This volume introduces key concepts for a trans/national expansion in the study of culture. Using translation as an analytical category, it explores what is translatable and untranslatable between nation-specific approaches such as British/American cultural studies, German *Kulturwissenschaften* and other traditions in studying culture. The range of articles included in the book covers both theoretical reflections and specific case studies that analyze the tensions and compatibilities amongst contemporary perspectives on the study of culture. By testing various key concepts – translation, cultural transfer, travelling concepts – this volume reflects on an essential vocabulary and common points of reference for scholars seeking new frameworks and methodologies for the foundation of a trans/national study of culture that is commensurate with the entangled nature of our world society.

The Routledge Companion to African Diaspora Art History Eddie Chambers, 2024-10-31 This is an authoritative companion that is global in scope, recognizing the presence of African Diaspora artists across the world. It is a bold and broad reframing of this neglected branch of art history, challenging dominant presumptions about the field. Diaspora pertains to the global scattering or dispersal of, in this instance, African peoples, as well as their patterns of movement from the mid twentieth century onwards. Chapters in this book emphasize the importance of cross-fertilization, interconnectedness, and intersectionality in the framing of African Diaspora art history. The book stresses the complexities of artists born within, or living and working within, the African continent, alongside the complexities of Africa-born artists who have migrated to other parts of the world. The group of international contributors emphasizes and accentuates the interplay between, for example, Caribbean art and African Diaspora art, or Latin American art and African Diaspora art, or Black British art and African Diaspora art. The book will be of interest to scholars and students working in art history, the various branches of African studies, African American studies, African Diaspora studies, Caribbean studies, and Latin American studies.

The Humanities between Global Integration and Cultural Diversity Hans G. Kippenberg, Birgit

Mersmann,2016-03-21 Modernization and digital globalization have proven to mark major thresholds where paradigmatic shifts and realignments take place. This volume aims to capture the reconfiguration of humanistic study between the forces of global integration and cultural diversification from a full range of disciplines within the humanities and social sciences. The key issue is discussed in three major parts. The first chapter examines transnational interpolations of the humanities as potential indicator for a globalizing humanistic research. The second chapter deals with humanistic revisions of modernity with and against globality. The third chapter discusses the ambiguous constitution of cultural diversity as a complement and counter-movement to global integration, ideologically moving between social cohesion and exclusion. The final chapter outlines what the threshold-crossing from modern to global humanities will mean for the future of humanistic research. The multidisciplinary study of culture within the history of the humanities documents and reflects the mobility and migration of its concepts and methods, moving and translating between disciplines, research traditions, historical periods, academic institutions, and the public sphere.

Research Methods for History Simon Gunn,2011-11-30 The first guide to the sources, techniques and concepts needed for effective historical research. While historians have become increasingly sensitive to social and cultural theory since the 1980s, the actual methods by which research is carried out in History have been largely taken for granted. Research Methods for History encourages those researching the past to think creatively about the wide range of methods currently in use, to understand how these methods are used and what historical insights they can provide. The book covers sources and methods that are well-established in History, such as archival research, together with those that are less widely known. The themes of the different chapters have been selected to reflect recent trends in the subject. Even with more established methods, however, the aim is to present new insights and perspectives and to open researchers' minds to new methodological possibilities.

Art History and Its Institutions Elizabeth Mansfield,2002 What is art history? The answer depends on who asks the question. Museum staff, academics, art critics, collectors, dealers and artists themselves all stake competing claims to the aims, methods, and history of art history. Dependent on and sustained by different - and often competing - institutions, art history remains a multi-faceted field of study. *Art History and Its Institutions* focuses on the professional and institutional formation of art history, showing how the discourses that shaped its creation continue to define the field today. Grouped into three sections, articles examine the sites where art history is taught and studied, the role of institutions in conferring legitimacy, the relationship between modernism and art history, and the systems that define and control it. From museums and universities to law courts and photography studios, the contributors explore a range of different institutions, revealing the complexity of their interaction and their impact on the discipline of art history. --BOOK JACKET.

The Routledge Companion to Digital Humanities and Art History Kathryn Brown,2020-04-15 The Routledge

Companion to Digital Humanities and Art History offers a broad survey of cutting-edge intersections between digital technologies and the study of art history, museum practices, and cultural heritage. The volume focuses not only on new computational tools that have been developed for the study of artworks and their histories but also debates the disciplinary opportunities and challenges that have emerged in response to the use of digital resources and methodologies. Chapters cover a wide range of technical and conceptual themes that define the current state of the field and outline strategies for future development. This book offers a timely perspective on trans-disciplinary developments that are reshaping art historical research, conservation, and teaching. This book will be of interest to scholars in art history, historical theory, method and historiography, and research methods in education.

Look Again! Anne D'Alleva, 2005 This handbook is designed to accompany the major textbooks used in the art history survey, presenting various methods for analysis of art as well as extensive tips on writing about art. Professor Anne D'Alleva created this handbook to accompany the major textbooks used in art history survey courses. Because the main survey texts focus on the artworks themselves, she saw the need for a complementary handbook that introduces students to the methodologies of art history in an open, accessible way. Look! discusses basic art historical practices, such as visual and contextual analysis, and provides guidelines for writing papers and taking examinations in art history. It provides a short history of the discipline and provides links to related academic disciplines to provide students with a sense of intellectual context for their work.--Publisher's website.

Art History as Social Praxis David Craven, 2017-08-21 Art History as Social Praxis: The Collected Writings of David Craven brings together more than thirty essays that chart the development of Craven's voice as an unorthodox Marxist who applied historical materialism to the study of modern art. This book demonstrates the range and versatility of David Craven's praxis as a 'democratic socialist' art historian who assessed the essential role the visual arts play in imagining more just and equitable societies. The essays collected here reveal Craven's lifelong commitment to exposing interstices between western and non-western cultures by researching the reciprocating influences between First- and Third-World artists, critics and historians.
