Katherine M. Hertlein, Markie L. C. Twist

The Effects of Video Games on Children Barrie Gunter, 1998-01-01 The rapid growth in popularity of computer and video games, particularly among children and teenagers, has given rise to public concern about the effects they might have on youngsters. The violent themes of many of these games, coupled with their interactive nature, have led to accusations that they may be worse than televised violence in affecting children's antisocial behaviour. Other allegations are that they have an addictive quality and that excessive playing results in a diminished social contact and poorer school performance. But how bad are video games? There are strong methodological reasons for not accepting the evidence for video games effects at face value. There are also positive signs that playing these games can enhance particular mental competencies in children. This book provides an up-to-date review and critique of research evidence from around the world in an attempt to put the issue of video game effects into perspective.

Video Games and Social Competence Rachel Kowert, 2014-11-27 Despite their popularity, online video games have been met with suspicion by the popular media and academic community. In particular, there is a growing concern that online video game play may be associated with deficits in social functioning. Due to a lack of empirical consistency, the debate surrounding the potential impact of online video game play on a user's sociability remains an active one. This book contributes to this debate by exploring the potential impact of online video game involvement on social competence outcomes, theoretically and empirically. Through empirical research, Kowert examines the relationships between online video game involvement, social goals, and social skills and discusses the underlying mechanisms of these effects.

It examines the rise of gaming, now a multi-billion dollar industry, and how its design, social dynamics, and accessibility can contribute to addictive behaviors. Masculinity in the Making Nicholas D. Young, Christine N. Michael, Elizabeth Jean, 2019-11-27 Contemporary society has imposed a set of unrealistic and confusing rules for men over 18 to follow. With post-adolescent men experiencing lower rates of academic success at the post-secondary level and escalating rates of violence perpetrated by this age group, jobs, careers and life itself are in crisis. These men in transition have emotional, social, academic, and career struggles that affect every aspect of their lives. Masculinity in the Making: Managing the Transition to Manhood; therefore, will examine these issues and offer strategies and examples of what is possible for the post-adolescent male; more specifically, attention will be paid to theories and health issues specific to this population, social and cultural issues, academic and career interventions, aggression and violence, and media portrayals. The reader will be left with a deep and clear understanding of the needs of men as well as how mentoring and counseling can provide them with the support needed to be successful and productive members of society.

Families at Play Sinem Siyahhan, Elisabeth Gee, 2024-07-02 How family video game play promotes intergenerational communication, connection, and learning. Video games have a bad reputation in the mainstream media. They are blamed for encouraging social isolation, promoting violence, and creating tensions between parents and children. In this book, Sinem Siyahhan and Elisabeth Gee offer another view. They show that video games can be a tool for connection, not isolation, creating opportunities for families to communicate and learn together. Like smartphones, Skype, and social media, games help families stay connected. Siyahhan and Gee offer examples: One family treats video game playing as a regular and valued activity, and bonds over Halo. A father tries to pass on his enthusiasm for Star Wars by playing Lego Star Wars with his young son. Families express their feelings and share their experiences and understanding of the world through playing video games like The Sims, Civilization, and Minecraft. Some video games are designed specifically to support family conversations around such real-world issues and sensitive topics as bullying and peer pressure. Siyahhan and Gee draw on a decade of

research to look at how learning and teaching take place when families play video games together. With video games, they argue, the parents are not necessarily the teachers and experts; all family members can be both teachers and learners. They suggest video games can help families form, develop, and sustain their learning culture as well as develop skills that are valued in the twenty-first century workplace. Educators and game designers should take note.

Feminine, Feministic, Feminists, and Feminisms Bushra Naz, Sadia Irshad, Farzana Masroor, Maria Farooq Maan, Stacy Blythe, Abida Sharif, 2025-08-20 This Research Topic aims at bringing together writings across various disciplines to deliberate on how women as a philosophical, aesthetic, and political category are represented, negotiated, and transformed in the world of today. The representation of women as a philosophical, aesthetic and political category has been shaped by cultural and societal norms, as well as by historical and political factors. While progress has been made in recent years towards greater equality and representation for women, there is still much work to be done to fully recognize and celebrate the diversity and complexity of women's experiences and identities. There have been continued debates around the notion of feminism becoming obsolete because perceptions exist that feminism has achieved all of its goals. However, while certain fights have been partially won, such as the right to vote and equal access to education, women continue to be adversely impacted by all sorts of violence and discrimination in all facets of life. Both the United Nations (UN) and World Health Organization (WHO) have published various reports on injustice to women and the four key findings suggest: 1) approximately 1 in 3 women worldwide, according to WHO, has experienced physical or psychological violence at some point in their lives. UN reports that both women and girls face gender-based violence in the form of domestic violence, human trafficking, and sexual harassment. 2) Women face economic injustice, as the UN reports that women are often less paid than

men for the same work and are more likely to work in low-paying jobs in poor working conditions. 3) According to a report by the UN women worldwide have less than 25% of parliamentary seats and only 21 countries have women as heads of state. 4) WHO reports that women face serious and significant health disparities, especially in low-income countries, including maternal mortality, cervical cancer and mental health.
