Logic Luca Bertorelli, 2023-06-22 This story takes place more than two hundred years from now. Earth is no longer habitable, at least not comfortably so. Almost the entire story takes place aboard a spaceship called Star One. The ship itself is run almost exclusively using technology, including a supercomputer named LOGIC. LOGIC is a secret program maintained by a tech guru named Sydney. When LOGIC starts sending threatening messages to the inhabitants of the ship, the Commander of the ship panics and turns to a group called the Faithful to help prevent the threatened self-destruction of Star One. The Faithful is nothing more than a group of people on Star One who don't completely trust technology. They are interested, some would say obsessed, with older technologies – the stuff that we have today in the 21st century. Ironically, it is this older technology that may hold the key to survival for Commander Morris and the rest of the staff and civilians onboard his ship. Once you start reading LOGIC: A Forced Choice, you won't be able to put it down! Like other readers, you'll want to find out what happens with Officer Mike Mason and his friend Han Lo. You'll also want to see what First Lieutenant Adam Pace is up to. • Find out what happened to the original Star One ship • Can you tell who is a member of the Faithful? •

Who is behind the threatening messages sent by LOGIC? • Whatever happened to Sweeney? • Will Mason and Han save the day? Imagine what it's like to live on a spaceship two hundred years from now. Forget about eating pizza and drinking a soft drink. You'll be popping drink and food pellets instead. Maybe you'd want to join the Faithful and enjoy wading through the relics of the past. Cruise past the Garbage Canyons down on Earth and see if there's anything worth salvaging for use or sale. This is what life could be like in the year 2350. If you're one of the lucky ones, you'll qualify for an encryptor implant. If not, will you be able to tell who has one? Find out who's intercepting the air messages being sent onboard Star One. Can you figure out who Han Lo's contacts are back on Earth and beyond? Read on to find out if the Commander ever makes it back to Andromeda, where he can get a cushy post and live in a fantastic house. Just when you think you've got it all figured out, you'll enter the twist and turns of life in space. No more creature comforts for you - the only comfort the people onboard Star One enjoy is technology. But you can always take a stroll through the Hall of Records if you want to read a few dusty books from days gone by. Or, if you're extra curious, ask Mike Mason to give you a tour of the Museum of Antiquities! That's the closest you'll come to living on Earth in this book!
