The Palgrave Handbook of Gothic Origins Clive Bloom, 2022-01-01 This handbook provides a comprehensive overview of research on the Gothic Revival. The Gothic Revival was based on emotion rather than reason and when Horace Walpole created Strawberry Hill House, a gleaming white castle on the banks of the Thames, he had to create new words to describe the experience of gothic lifestyle. Nevertheless, Walpole's house produced nightmares and his book *The Castle of Otranto* was the first truly gothic novel, with supernatural, sensational and Shakespearean elements challenging the emergent fiction of social relationships. The novel's themes of violence, tragedy, death, imprisonment, castle battlements, dungeons, fair maidens, secrets, ghosts and prophecies led to a new genre encompassing prose, theatre, poetry and painting, whilst opening up a whole world of imagination for entrepreneurial female writers such as Mary Shelley, Joanna Baillie and Ann Radcliffe, whose immensely popular books led to the intense inner landscapes of the Bronte sisters. Matthew Lewis's *The Monk* created a new gothic: atheistic, decadent, perverse, necrophilic and hellish. The social upheaval of the French Revolution and the emergence of the Romantic movement with its more intense (and often) atheistic self-absorption led the gothic into darker corners of human experience with a greater emphasis on the inner life, hallucination, delusion, drug addiction, mental instability, perversion and death and the emerging science of psychology. The intensity of the German experience led to an emphasis on doubles and schizophrenic behaviour, ghosts, spirits, mesmerism, the occult and hell. This volume charts the origins of this major shift in social perceptions and completes a trilogy of Palgrave Handbooks on the Gothic—combined they provide an exhaustive survey of current research in Gothic studies, a go-to for students and researchers alike.

The Intention Economy Doc Searls,2012-04-10 Caveat venditor—let the seller beware While marketers look for more ways to get personal with customers, including new tricks with “big data,” customers are about to get personal in their own ways, with their own tools. Soon consumers will be able to: • Control the flow and use of personal data • Build their own loyalty programs • Dictate their own terms of service • Tell whole markets what they want, how they want it, where and when they should be able to get it, and how much it should cost And they will do all of this outside of any one vendor’s silo. This new landscape we’re entering is what Doc Searls calls The Intention Economy—one in which demand will drive supply far more directly, efficiently, and compellingly than ever before. In this book he describes an economy driven by consumer intent, where vendors must respond to the actual intentions of customers instead of vying for the attention of many. New customer tools will provide the engine, with VRM (Vendor Relationship Management) providing the consumer counterpart to vendors’ CRM (Customer Relationship Management) systems. For example, imagine being able to change your address once for every company you deal with, or combining services from multiple companies in real time, in your own ways—all while keeping an auditable accounting of every one of your interactions in the marketplace. These tantalizing possibilities and many others are introduced in this book. As customers become more independent and powerful, and the Intention Economy emerges, only vendors and organizations that are ready for the change will survive, and thrive. Where do you stand?

Stop Being Reasonable Eleanor Gordon-Smith,2019-10-22 A thought-provoking exploration of how people really change their minds, and how persuasion is possible. In Stop Being Reasonable, Eleanor Gordon-Smith weaves a narrative that illustrates the limits of human reason. Here, she tells the stories of people who have radically altered their beliefs--from the woman who had to reckon with her husband's terrible secret to the man who finally left the cult he had been raised in since birth. Gordon-Smith shows how we can change the course of our own lives, and asks: what made someone change course? How should their reversals affect how we think about our own beliefs? And in an increasingly divided world, what do they teach us about how we might change the minds of others? Inspiring, perceptive, and moving, Stop Being Reasonable explores why resistance to evidence is often rooted in self-preservation and fear, why we feel shame in admitting we are wrong, and why who we believe is often more important than what we believe. This fascinating book will completely change the way you look at the power of persuasion.

Behavioural Dynamics at the Workplace Umashankar K,Charitra H G,2020-11-23 This book offers strategies and effective ways for professional improvement in the workplace. It focuses on behavioural dynamics in a work environment, and offers perspectives on self-assessment, critical thinking, experiential learning, stress management and information processing. The book discusses concepts like self-image and self-concept which have been aligned with professional

excellence and provides a psychoanalytic and theoretical understanding of organizational dynamics, individual and group behaviour, and the expectations of the contemporary corporate world. Through case studies, stories, helpful questionnaires and guides, the volume offers tools and practical solutions for young professionals to develop essential skills to thrive in their careers. It also highlights the importance of effective listening, communication, and identifying cognitive, behavioural and transpersonal patterns for professional and personal development. Insightful and detailed, the book is an essential read for students and professionals in the field of management, business communication, human resource, and behavioural psychology. It will also be of great use to young professionals working in various sectors who are interested in learning about organizational dynamics.

The Event of Style in Literature M. Aquilina,2014-09-16 The Event of Style in Literature brings discussions about the question of style up-to-date by schematising the principal issues relating to the topic through a critical overview of the canon of style studies. It reads the work of Jacques Derrida, Maurice Blanchot, and Hans-Georg Gadamer as groundbreaking and 'eventful' interventions.

Nature in the Middle Ages and the Early Modern Times Albrecht Classen,2024-07-01 The study of pre-modern anthropology requires the close examination of the relationship between nature and human society, which has been both precarious and threatening as well as productive, soothing, inviting, and pleasurable. Much depends on the specific circumstances, as the works by philosophers, theologians, poets, artists, and medical practitioners have regularly demonstrated. It would not be good enough, as previous scholarship has commonly done, to examine simply what the various writers or artists had to say about nature. While modern scientists consider just the hard-core data of the objective world, cultural historians and literary scholars endeavor to comprehend the deeper meaning of the concept of nature presented by countless writers and artists. Only when we have a good grasp of the interactions between people and their natural environment, are we in a position to identify and interpret mental structures, social and economic relationships, medical and scientific concepts of human health, and the messages about all existence as depicted in major art works. In light of the current conditions threatening to bring upon us a global crisis, it matters centrally to take into consideration pre-modern discourses on nature and its enormous powers to understand the topoi and tropes determining the concepts through which we perceive nature. Nature thus proves to be a force far beyond all human comprehensibility, being both material and

spiritual depending on our critical approaches.

The English Lyric Tradition R. James Goldstein,2017-04-03 Modern readers can sometimes be unsure about the language and the literary conventions of medieval and Renaissance verse--lyrical works written at a time before poetry was assumed to be about personal expression. This readers' guide introduces to a 21st century audience some of the greatest masterpieces of English poetry spanning five centuries. Focusing on poems by Chaucer, Wyatt, Shakespeare, Milton and others, the author discusses the development of poetic technique, explains the rhetorical culture of earlier centuries and describes the various lyric forms--including lover's complaints, sonnets and elegies--that poets used to communicate with readers.

Regional Human Rights Systems Christina M. Cerna,2016-12-05 Over the past sixty years the regional human rights systems have surpassed the UN human rights bodies in affording protection to the victims of human rights violations. Most of these systems have courts that are empowered to issue legally binding judgments and reparations for violations of human rights, which states have been unwilling to accord the UN system. The essays selected for this volume examine the structure and functioning of the principal regional human rights systems in the world today: 1) the Inter-American Commission and Court of Human Rights, 2) the European Court of Human Rights, 3) the African Commission and Court of Human and Peoples' Rights and 4) the ASEAN Intergovernmental Human Rights Commission. These systems guarantee primarily civil and political rights. Central to all four systems is the necessity of a democratic form of government to guarantee these rights, although not all governments, parties to these regional treaties, are democracies. These articles trace the history of these systems, in particular, the expansion of their membership to include almost all independent countries in the region, and their evolution towards recognition of a 'right to democracy'.
