**Positive Thinking** Anthony Ekanem,2016-08-12 You have probably had someone tell you to think positive when you were in a trying situation. That is because the power of positive thinking is something that is a widely held belief. Most people easily accept that when you give off positive energy, you can infect others with that positive energy and that they will return

that energy to you. It is basically the idea that what you put out there will come back to you. Positive influences are all around us. They exist because people love to feel good. People prefer the positive to the negative. You can likely relate to this. You would probably rather be around someone who is upbeat and full of energy than someone who is depressed and moping around. People see that thinking positive and having a positive attitude can play a large role in their life. Positive thinking can be very powerful and by putting it to work in your life; you can reap the positive benefits.

**Trying to Conceive** Genevieve Morton, 2013-01-24 Getting pregnant isn't easy. Have you spent months and months upside down riding an imaginary bike or scissor-kicking the ceiling? Or spent hours thinking 'maybe I'm not ovulating?' or 'maybe you're not aiming it right?' Well you're not alone. One in six couples experience some kind of fertility problem, and the average couple takes over six months to conceive. Author Genevieve Morton and her husband Ben started trying for a baby when she was 34. After 18 months of trying to get pregnant without success, they realised that a positive pregnancy test might be harder than they thought. Sperm tests, a laparoscopy and a few ultrasounds proved nothing, leaving them with that most unsatisfactory of categorisations: unexplained infertility. If you're considering IUI (Intrauterine Insemination) or IVF (In Vitro Fertilization), or you're wondering what oats and liquid zinc can do for your partner's fertility, *Trying to Conceive* is the book for you. It brings you conception tips, advice and first-hand insights from other people who have

experienced only too well the emotional rollercoaster of trying to conceive. An honest - and fun - guide to coping with life while trying to conceive, *Trying to Conceive* is your A-Z survival guide if you're trying for a baby. Helping you cope with the drawn-out conception process - and, crucially, written by someone who has been through the trials of unexplained infertility - *Trying to Conceive* gets you through the emotional, psychological and physical experience of trying to conceive. Combining personal stories with medical advice, it's an easy-to-read, approachable guide to getting pregnant, including tips on how to ensure healthy ovulation, reduce the risk of impeding fertility and deal with the stress of well-meaning pregnant friends. *Trying to Conceive* isn't overloaded with scientific, medical language you don't understand. It isn't scary. It won't make you feel old or desperate either. Think of it more as your caring, wise, empathetic best friend guiding you through the difficulty of how to get pregnant.
