**Oliver Sacks**

**The Man who Mistook His Wife for a Hat and Other Clinical Tales** Oliver Sacks, 1987 In his most extraordinary book, one of the great clinical writers of the 20th century (The New York Times) recounts the case histories of patients lost in the bizarre, apparently inescapable world of neurological disorders. Oliver Sacks's *The Man Who Mistook His Wife for a Hat* tells the stories of individuals afflicted with fantastic perceptual and intellectual aberrations: patients who have lost their memories and with them the greater part of their pasts; who are no longer able to recognize people and common objects; who are stricken with violent tics and grimaces or who shout involuntary obscenities; whose limbs have become alien; who have been dismissed as retarded yet are gifted with uncanny artistic or mathematical talents. If inconceivably strange, these brilliant tales remain, in Dr. Sacks's splendid and sympathetic telling, deeply human. They are studies of life struggling against incredible adversity, and they enable us to enter the world of the neurologically impaired, to imagine with our hearts what it must be to live and feel as they do. A great healer, Sacks never loses sight of medicine's ultimate responsibility: the suffering, afflicted, fighting human subject.

*The Man Who Mistook His Wife for a Hat* Oliver Sacks, 2014-12-15 Celebrating Fifty Years of Picador Books If a man has lost a leg or an eye, he knows he has lost a leg or an eye; but if he has lost a self - himself - he cannot know it, because he is no longer there to know it. In this extraordinary book, Dr. Oliver Sacks recounts the stories of patients struggling to adapt to often bizarre worlds of neurological disorder. Here are people who can no longer recognize everyday objects or those they love; who are stricken with violent tics or shout involuntary obscenities, and yet are gifted with unusually acute artistic or mathematical talents. If sometimes beyond our surface comprehension, these brilliant tales illuminate what it means to be human. A provocative exploration of the mysteries of the human mind, *The Man Who Mistook His Wife for a Hat* is a million-copy bestseller by the twentieth century's greatest neurologist. Part of the Picador Collection, a series showcasing the best of modern literature.

**Speaking Being** Bruce Hyde,Drew Kopp,2019-08-06 *Speaking Being: Werner Erhard, Martin Heidegger, and a New Possibility of Being Human* is an unprecedented study of the ideas and methods developed by the thinker Werner Erhard. In this book, those ideas and methods are revealed by presenting in full an innovative program he developed in the 1980s called The Forum—available in this book as a transcript of an actual course led by Erhard in San Francisco in December of 1989. Since its inception, Erhard’s work has impacted the lives of millions of people throughout the world. Central to this study is a comparative analysis of Erhard’s rhetorical project, The Forum, and the philosophical project of Martin Heidegger. Through this comparative analysis, the authors demonstrate how each thinker’s work sometimes parallels and often illuminates the other. The dialogue at work in The Forum functions to generate a language which speaks being. That is, The Forum is an instance of what the authors call ontological rhetoric: a technology of communicating what cannot be said in language. Nevertheless, what does get said allows those participating in the dialogue to discover previously unseen aspects of what it currently means to be human. As a primary outcome of such discovery, access to creating a new possibility of what it is to be human is made available. The purpose of this book is to show how communication of the unspoken realm of language—speaking being—is actually accomplished in The Forum, and to demonstrate how Erhard did it in 1989. Through placing Erhard’s language use next to Heidegger’s thinking—presented in a series of “Sidebars” and “Intervals” alongside The Forum transcript—the authors have made two contributions. They have illuminated the work of two thinkers, who independently developed similar forms of ontological rhetoric while working from very different times and places. Hyde and Kopp have also for the first time made Erhard’s extraordinary form of ontological rhetoric available for a wide range of audiences, from scholars at work within a variety of academic disciplines to anyone interested in exploring the possibility of being for human beings. From the Afterword: I regard *Speaking Being* as an enormously important contribution to understanding Heidegger and Erhard. The latter has received far too little serious academic attention, and this book begins to make up for that lack. Moreover, the book’s analysis of Heidegger’s thought is among the best that I have ever read. I commend this book to all readers without reservation. Michael E. Zimmerman, Professor Emeritus, University of Colorado, Boulder

The Letters of Thom Gunn Thom Gunn,2022-05-24 The Letters of Thom Gunn presents the first complete portrait of the private life, reflections, and relationships of a maverick figure in the history of British and American poetry. "I write about love, I write about friendship," remarked Thom Gunn. "I find that they are absolutely intertwined." These core values permeate his correspondence with friends, family, lovers, and fellow poets, and they shed new light on "one of the most singular and compelling poets in English during the past half-century" (Hugh Haughton, The Times Literary Supplement). The Letters of Thom Gunn, edited by August Kleinzahler, Michael Nott, and Clive Wilmer, reveals the evolution of Gunn's work and illuminates the fascinating life that informed his poems: his struggle to come to terms with his mother's suicide; settling in San Francisco and his complex relationship with England; his changing relationship with his life partner, Mike Kitay; the LSD trips that led to his celebrated collection Moly (1971); and the deaths of friends from AIDS that inspired the powerful, unsparing elegies of The Man with Night Sweats (1992).

**Truth is the invention of a liar** Heinz von Foerster,Bernhard Poerksen,2024-09-02 This book is so rich with insights, sparkling dialogue, and wisdom that one would love to distribute it like a leaflet around town. Südwestrundfunk (German radio station) The intellectual dance that the two dare to dance is intelligent, light, humorous, and enchanting. Süddeutsche Zeitung (German daily) I recommend this book not only to the cybernetics and systems community, but to anyone. Ranulph Glanville, Cybernetics and Human Knowing Easy and enjoyable to read, without loss of scientific and philosophical depth and rigor. ... The reader will find the book difficult to put down. Bernd R. Hornung, Journal of Sociocybernetics Conversations for skeptics How real is reality? Are our images of the world mere inventions or do they correspond to an external reality? Is it possible to know the truth? These are some of the questions that are discussed in this book by physicist and philosopher Heinz von Foerster and media studies scholar Bernhard Poerksen. Together they explore the limits of our cognitive capacities; they debate the apparent objectivity of our sensual perception and the consequences of truth terrorism; and they talk about the relationship between knowledge and ethics, sight and insight. The authors: Heinz von Foerster (1911-2002) completed his studies of physics in Vienna and worked at different research labs before emigrating to the United States in 1949. In 1957, at the University of Illinois, he established the Biological Computer Lab (BCL) - the cradle of the epistemology that would later cause a stir under the label of constructivism. The focus was on analyzing the logical and methodological problems that inevitably arise when one seeks to know knowledge. He is the author of numerous books, including

Understanding Understanding: Essays on Cybernetics and Cognition. Bernhard Poerksen is professor of media studies at the University of Tübingen with a particular research interest in the new media age. His books about systemic thinking have been translated into many languages. In 2008 he was voted Professor of the Year in honor of his teaching. His most recent book publications in English include From Being to Doing: The Origins of the Biology of Cognition (with Humberto Maturana), The Unleashed Scandal: The End of Control in the Digital Age (with Hanne Detel), and Digital Fever: Taming the Big Business of Disinformation.

**The Man Who Tasted Words** Dr. Guy Leschziner, 2022-02-22 In The Man Who Tasted Words, Guy Leschziner leads readers through the senses and how, through them, our brain understands or misunderstands the world around us. Vision, hearing, taste, smell, and touch are what we rely on to perceive the reality of our world. Our senses are the conduits that bring us the scent of a freshly brewed cup of coffee or the notes of a favorite song suddenly playing on the radio. But are they really that reliable? The Man Who Tasted Words shows that what we perceive to be absolute truths of the world around us is actually a complex internal reconstruction by our minds and nervous systems. The translation into experiences with conscious meaning—the pattern of light and dark on the retina that is transformed into the face of a loved one, for instance—is a process that is invisible, undetected by ourselves and, in most cases, completely out of our control. In The Man Who Tasted Words, neurologist Guy Leschziner explores how our nervous systems define our worlds and how we can, in fact, be victims of falsehoods perpetrated by our own brains. In his moving and lyrical chronicles of lives turned upside down by a

disruption in one or more of their five senses, he introduces readers to extraordinary individuals, like one man who actually “tasted” words, and shows us how sensory disruptions like that have played havoc, not only with their view of the world, but with their relationships as well. The cases Leschziner shares in *The Man Who Tasted Words* are extreme, but they are also human, and teach us how our lives and what we perceive as reality are both ultimately defined by the complexities of our nervous systems.

Becoming Myself Irvin D. Yalom,2017-10-03 Bestselling writer and psychotherapist Irvin D. Yalom puts himself on the couch in a “candid, insightful” (Abraham Verghese) memoir Irvin D. Yalom has made a career of investigating the lives of others. In this profound memoir, he turns his writing and his therapeutic eye on himself. He opens his story with a nightmare: He is twelve, and is riding his bike past the home of an acne-scarred girl. Like every morning, he calls out, hoping to befriend her, Hello Measles! But in his dream, the girl's father makes Yalom understand that his daily greeting had hurt her. For Yalom, this was the birth of empathy; he would not forget the lesson. As *Becoming Myself* unfolds, we see the birth of the insightful thinker whose books have been a beacon to so many. This is not simply a man's life story, Yalom's reflections on his life and development are an invitation for us to reflect on the origins of our own selves and the meanings of our lives.
