Heraclitus and Thales' Conceptual Scheme: A Historical Study Aryeh Finkelberg, 2017-02-06 In *Heraclitus and Thales' Conceptual Scheme: A Historical Study* Aryeh Finkelberg offers an alternative to the traditional teleological interpretation of early Greek thought. Instead of explaining it as targeted at later results, viz. philosophy, as this thought was first conceptualized by Aristotle and has been regarded ever since, the author seeks to determine its intended meaning by restoring it to its historical context as evinced, inter alia, by epigraphic and papyrological evidence, in particular the Gold Leaves, the Olbian bone plates, and the Derveni papyrus. This approach, together with a considerable amount of hitherto unidentified or largely disregarded evidence, yields a picture of early Greek thought significantly different from the traditional history of 'Presocratic philosophy'.

The Garden of Reality Roland Faber, 2018-06-20 *The Garden of Reality* contemplates the relativity of religious truth, religious pluralism, transreligious discourse, postmodern cosmology, and multireligious mysticism. Its transreligious approach aims at a future multireligious, peaceful society in an ecological and cosmic context. It proposes that the future of humanity is bound to conviviality with itself and the Earth, that the deepest religious motivations of existing together are relative to one another, and that transreligious relativity is essential to the conviction of religions that their motivations, experiences, and conceptualities are meaningful, real, and true. By engaging diverse voices from poststructuralism to Sufism, Dzogchen, and philosophical Daoism, from conceptual frameworks of Christianity and Hinduism to mystical and postmodern cosmology, current cosmopolitanism, and interreligious and interspiritual discourses, but especially understudied contributions of process thought and the Bahá'í religion, this book suggests that multireligious conviviality must listen to the universal relevance of a multiplicity of minority voices. Its polyphilic pluralism affirms the mutual immanence and co-creative nature of religions and spiritualities with the universal in-sistence of divine or ultimate reality in the cosmos. Embracing a relativistic and evolutionary paradigm in an infinite cosmos of creative becoming, religions must cope with events of novelty that disturb and connect, transcend and contrast, the continuum of their truth claims, but must avoid conflict, as religious diversity is enveloped by an ever-folding landscape of ultimate reality.

Aristarchus of Samos Sir Thomas Heath, 2004-12-09 A most welcome addition to the literature of astronomical history. — Nature A most important contribution to the early history of Greek thought and a notable monument of English scholarship.

— **Journal of Hellenic Studies** This classic work traces Aristarchus of Samos's anticipation by two millennia of Copernicus's revolutionary theory of the orbital motion of the earth. Heath's history of astronomy ranges from Homer and Hesiod to Aristarchus and includes quotes from numerous thinkers, compilers, and scholasticists from Thales and Anaximander through Pythagoras, Plato, Aristotle, and Heraclides. 34 figures.

Descartes and the Last Scholastics Roger Ariew, 2019-06-07 The ongoing renaissance in Descartes studies has been characterized by an attempt to understand the philosopher's texts against his own intellectual background. Roger Ariew here argues that Cartesian philosophy should be regarded as it was in Descartes's own day—as a reaction against, as well as an indebtedness to, scholastic philosophy. His book illuminates Cartesian philosophy by analyzing debates between Descartes and contemporary schoolmen and surveying controversies arising in its first reception. The volume touches upon many topics and themes shared by Cartesian and late scholastic philosophy: matter and form; infinity, place, time, void, and motion; the substance of the heavens; the object or subject of metaphysics; principles of metaphysics (being and ideas) and transcendentals (for example, unity, quantity, principle of individuation, truth and falsity). Part I exhibits the differences and similarities among the doctrines of Descartes and those of Jesuits and other scholastics in seventeenth-century France. The contrasts Descartes drew between his philosophy and that of others are the subject of Part II, which also examines some arguments in which he was involved and details the continued controversy caused by Cartesianism in the second half of the seventeenth century.

Abraham Cohen de Herrera: Gate of Heaven Kenneth Krabbenhoft, 2021-10-11 With the publication of Abraham Cohen de Herrera's *Gate of Heaven*, a widely influential work of Jewish mysticism is available for the first time in an unabridged, annotated English edition. In this work, originally written in Spanish for the marrano community of Amsterdam, Herrera (d. 1635) follows the syncretic model of Marsilio Ficino and Pico della Mirandola in reconciling the teachings of the *Sefer Yezirah*, the *Zohar*, Moses Cordovero, Isaac Lurian and the Lurianic school (in particular Israel Sarug), with Aristotelian, Platonic, and Neoplatonic metaphysics, medieval Islamic and Jewish theology, and Scholasticism. This thorough synthesis explains the work's appeal to philosophers like Spinoza, Leibniz, Henry More, Hegel, and Jacob Bruckner.

The Court of Reason Beatrix Himmelmann, Camilla Serck-Hanssen, 2021-11-08 The Proceedings present the contributions to the 13th International Kant Congress which was held at the University of Oslo, August 6-9, 2019. The congress, which hosted speakers from more than thirty countries and five continents, was dedicated to the topic of the court of reason. The idea that reason stands before itself as a tribunal characterizes the whole of Kant's critical project. Without such a court, reason falls into conflict with itself. With such a court in place, however, it may succeed in establishing the possibility and limits of metaphysics, ethics, aesthetics, law and science. The idea of reason being its own judge is not only pivotal to a proper understanding of Kant's philosophy, but can also shed light on the burgeoning fields of meta-philosophy and

philosophical methodology. The 2019 Kant Congress put special emphasis on Kant's methodology, his account of conceptual critique, and the relevance of his ideas to current issues in especially political philosophy and the philosophy of law. Additional sections discussed a wide range of topics in Kant's philosophy. The Proceedings will provide anyone who is interested in exploring the variety of present-day work on Kant and Kantian themes with a wealth of fruitful inspiration.

Aristarchus of Samos, the Ancient Copernicus Thomas Heath, 2013-09-26 Prefaced by a history of ancient Greek astronomy, this 1913 edition of Aristarchus' only surviving treatise includes a facing-page translation.

In Order to Talk with the Dead Jorge Teillier, 2013-03-15 In order to talk with the dead you have to know how to wait: they are fearful like the first steps of a child. But if we are patient one day they will answer us with a poplar leaf trapped in a broken mirror, with a flame that suddenly revives in the fireplace, with a dark return of birds before the glance of a girl who waits motionless on the threshold. —from *In Order to Talk with the Dead* Reared in the rainy forests of Chile's La Frontera region which had nurtured Pablo Neruda a generation earlier, Jorge Teillier has become one of Chile's leading contemporary poets, whose work is widely read in Latin America and Europe along with the poetry of his well-known contemporaries Nicanor Parra and Enrique Lihn. This English-Spanish bilingual anthology now introduces English-speaking readers to Teillier, with a representative selection of his best work from all phases of his career. Carolyn Wright has translated poems from the volumes *Muertes y maravillas* (1971), *Para un pueblo fantasma* (1978), and *Cartas para reinas de otras primaveras* (1985). Avoiding the bravura effects of some of his contemporaries, Teillier writes from a life lived directly and simply, returning time and again in his poetry to the timeless and mythic South of his boyhood, the Land of Nevermore.

Neuroscience in Science Fiction Films Sharon Packer, M.D., 2014-11-19 As the gap between science fiction and science fact has narrowed, films that were intended as pure fantasy at the time of their premier have taken on deeper meaning. This volume explores neuroscience in science fiction films, focusing on neuroscience and psychiatry as running themes in SF and finding correlations between turning points in neuroscience fiction and advances in the scientific field. The films covered include *The Strange Case of Dr. Jekyll and Mr. Hyde*, *The Island of Dr. Moreau*, *Robocop*, *The Stepford Wives*, *The Mind Snatchers* and iconic franchises like *Terminator*, *Ironman* and *Planet of the Apes*. Examining the parallel histories of psychiatry, neuroscience and cinema, this book shows how science fiction films offer insightful commentary on the

scientific and philosophical developments of their times.

A Practical Commentary on Holy Scripture Friedrich Justus Knecht, 1910

The Ocean of God Roland Faber, 2019-06-29 'The Ocean of God' conveys the proposition that the future of religions, if they will not want to contribute to the destruction of humanity, will become transreligious. Based on the assumption that the spiritual impulse of humanity cannot simply be eradicated, religiosity will persist in transreligious forms, as secularizations, naturalizations and transhumanist dreams only envision such transformations, but fall short in their ability to replace the force of spirituality to further civilized peace of human existence on Earth and its future in evolutionary, ecological and cosmological dimensions. In relating the contributions of religious pluralism to the concept of the unity of religions, which have arisen in this "new axial age" for overcoming the checkered history of religions in furthering peace, the program of a polyphilic pluralism with its transreligious discourse, based on the insight of the fundamental relativity of (religious) truth and the special contributions of process philosophy and theology as well as the Bahá'í universe of thought, analyses and projects a new religiosity or spirit enabling religions to overcome their deepest motives of strife and warfare.

Contemporary Phenomenologies of Normativity Sara Heinämaa, Mirja Hartimo, Ilpo Hirvonen, 2022-03-30 This volume investigates forms of normativity through the phenomenological methods of description, analysis, and interpretation. It takes a broad approach to norms, covering not only rules and commands but also goals, values, and passive drives and tendencies. Part I Basic Perspectives begins with an overview of the phenomena of normativity and then clarifies the constitution of norms by Husserlian and Heideggerian concepts. It offers phenomenological alternatives to the neo-Kantian and neo-Hegelian approaches that dominate contemporary debates on the sources of normativity. Part II From Perception to Imagination turns to the normativity of three basic types of experiences. This part first sheds light on the normativity of perception and then illuminates the kind of normativity characteristic of imagination and drive intentionality. Part III Social Dimensions analyzes the norms that regulate the formation of practical communities. It takes a broad view of practical norms, discussing social and moral norms as well as the epistemic norms of scientific practices. By clarifying the divergences and interrelations between various types and levels of norms, the volume demonstrates that normativity is not one phenomenon but a complex set of various phenomena with multiple sources. *Contemporary Phenomenologies of Normativity: Norms, Goals, and Values* will be of interest to researchers and advanced students working on issues of normativity in phenomenology, epistemology, ethics, and social philosophy.

Frontiers in Social Dilemmas Research Wim B.G. Liebrand, David M. Messick, 2012-12-06 Social dilemmas are situations in which individuals, groups or nations face a choice between their own short-term interests and the longer-term

interests of all parties involved, including themselves. As a consequence, in the end they all regret the way they have acted. Examples of social dilemmas are easy to find: depletion of vital resources, arms races, over-production of hazardous substances and environmental pollutants, information hoarding, and the failure to provide and maintain public goods. Understanding the dynamics of social dilemmas constitutes a major challenge. One prominent feature that distinguishes this book is the focus on computer simulations as a methodology for the exploration of the dynamic interplay of individual level processes and aggregate outcomes.

Creation ex nihilo Gary A. Anderson, Markus Bockmuehl, 2017-11-15 The phrase creation ex nihilo refers to the primarily Christian notion of God's creation of everything from nothing. *Creation ex nihilo: Origins, Development, Contemporary Challenges* presents the findings of a joint research project at Oxford University and the University of Notre Dame in 2014-2015. The doctrine of creation ex nihilo has met with criticism and revisionary theories in recent years from the worlds of science, theology, and philosophy. This volume concentrates on several key areas: the relationship of the doctrine to its purported biblical sources, how the doctrine emerged in the first several centuries of the Common Era, why the doctrine came under heavy criticism in the modern era, how some theologians have responded to the objections, and the relationship of the doctrine to claims of modern science—for example, the fundamental law of physics that matter cannot be created from nothing. Although the Bible never expressly states that God made everything from nothing, various texts are taken to imply that the universe came into existence by divine command and was not assembled from preexisting matter or energy. The contributors to this volume approach this topic from a range of perspectives, from exposition to defense of the doctrine itself. This is a unique and fascinating work whose aim is to present the reader with a compelling set of arguments for why the doctrine should remain central to the grammar of contemporary Christian theology. As such, the book will appeal to theologians as well as those interested in the relationship between theology and science. Contributors: Gary A. Anderson, Markus Bockmuehl, Janet Soskice, Richard J. Clifford, S.J., Sean M. McDonough, Gregory E. Sterling, Khaled Anatolios, John C. Cavadini, Joseph Wawrykow, Tzvi Novick, Daniel Davies, Cyril O'Regan, Ruth Jackson, David Bentley Hart, Adam D. Hincks, S.J., Andrew Pinsent, and Andrew Davison.

Studies in the Physics and Metaphysics of Hasdai Crescas Harvey Warren Zev, 2023-03-27 This book examines central themes in the thought of Rabbi Hasdai Crescas (c. 1340-1410/11), the great Catalan Jewish philosopher who contributed to the revolution of modern science and profoundly influenced Spinoza. Part I treats of Crescas' radical critique of the Aristotelian concepts of space, time, and the vacuum, and analyzes his vision of an infinite universe; it discusses his criticisms of Maimonides' proofs of God, and expounds his own proof; and it concludes with a discussion of his concept of God as infinite Love. Part II contains three essays on Crescas' strictly deterministic theory of human choice.
