Life Examined Nick Garside, Jonathan Lavery, Charles Wells, 2021-12-15 Life Examined is an anthology of carefully edited readings designed to serve as an introduction to many of the fundamental concepts of ethical and socio-political thought. It includes primary sources from a variety of traditions, with selections that range chronologically from ancient times through to the present day. These readings have been thoughtfully selected, edited, and contextualized to provide students with opportunities to sharpen their capacities for critical and theoretical reflection. The book begins with three key texts that frame the historical discourse. Subsequent chapters are organized around ethical themes and theoretical questions that have animated debates throughout the ages, including the nature of practical rationality, scientific reasoning, wisdom, the law, equality, power, violence, and identity.

Philosophy and the Spiritual Life Victoria S. Harrison, Tyler Dalton McNabb, 2023-07-01 This book breaks new ground for the philosophy of religion by showcasing work that engages with the lived reality of the spiritual life. It demonstrates that philosophy's relationship with spirituality is more than a historical curiosity and that, in the twenty-first century, it is still meaningful to think about philosophy in connection with spirituality. The chapters are organised around the following themes: spiritual practice and philosophical understanding; philosophical reflections on living a spiritual life; philosophical problems concerning the spiritual life. The first part discusses whether or not the topic of spirituality should be given a more fundamental role within the philosophy of religion, and, if so, how that might be accomplished. The second part addresses fundamental issues concerning human beings, their lives, and their self-understanding in relation to the spiritual life. The final part considers philosophical problems that emerge when discussing the spiritual life. By bringing together discussions of these topics, this volume constitutes a valuable resource for scholars in disciplines in which the spiritual life is a focus of interest, particularly philosophy, theology, and religious studies.

Being and Authenticity Xunwu Chen, 2021-12-28 This book presents a creative approach to the problem of individual authenticity. What is authenticity? What are its necessary conditions? How is an authentic self possible in society? What are the relationships of authenticity, morality, and happiness? The book examines a wide range of questions in Eastern and Western thought, to which it gives novel answers.

Life Course Studies Handbook Neeraj Venkataraman,2025-02-20 Life Course Studies Handbook is a comprehensive guide exploring the intricacies of human development across the lifespan. Authored by leading experts in life course studies, we provide a multidisciplinary perspective on the factors that shape individuals from infancy to old age. We examine the interplay of biological, psychological, social, and cultural influences to gain insights into the complex pathways individuals follow as they grow and change. Our handbook delves into various life stages, from childhood to old age, exploring unique challenges and opportunities at each stage. We consider factors like socioeconomic status, family dynamics, and historical context, shaping life course trajectories and influencing experiences and outcomes. Resilience is a key theme throughout the book. We discuss how individuals can adapt and thrive in the face of adversity, drawing on social support, coping strategies, and positive thinking to overcome obstacles and build strength. Whether you are a researcher, practitioner, student, or simply interested in understanding human development, Life Course Studies Handbook offers valuable insights and practical strategies for navigating the complexities of life. We hope this book serves as a valuable resource for exploring the diverse experiences and trajectories that shape individuals across the lifespan.

Life Stories Charlotte Linde,1993-07-01 All adult speakers in Western cultures have life stories argues Charlotte Linde, and the ways in which these life stories are formed and exchanged with others have a powerful effect on all of us. Life stories express our sense of self, who we are and how we got that way. According to Linde, we also use these stories to show that our lives can be understood as coherent, and to assert or negotiate group membership. These life stories take part in the highest level of social constructions, since they are built on cultural assumptions about what is expected in a life, what the norms for a successful life are, and what common or special belief systems are necessary to establish coherence. The life story, illuminated by this engrossing study, is a form of everyday discourse which has not previously been precisely defined or studied. It is an oral, discontinuous unit, consisting of stories which are retold in a variety of forms over a long period of time, and which may be revised and changed as the speaker comes to drop old meanings and add new ones to parts of the life story. The life story is a particularly rich and important area for study, because it represents a crossroads of linguistic structure and social practice. Linde's analysis is of importance to linguistics, as well as having broader implications for anthropology, psychology, and sociology.

Engineering for Industrial Designers and Inventors Thomas Ask,2016-05-04 If you have designs for wonderful machines in mind, but aren't sure how to turn your ideas into real, engineered products that can be manufactured, marketed, and used, this book is for you. Engineering professor and veteran maker Tom Ask helps you integrate mechanical engineering concepts into your creative design process by presenting them in a rigorous but largely nonmathematical format.

Through mind stories and images, this book provides you with a firm grounding in material mechanics, thermodynamics, fluid dynamics, and heat transfer. Students, product and mechanical designers, and inventive makers will also explore nontechnical topics such as aesthetics, ethnography, and branding that influence product appeal and user preference. Learn the importance of designing functional products that also appeal to users in subtle ways Explore the role of aesthetics, ethnography, brand management, and material culture in product design Dive into traditional mechanical engineering disciplines related to the behavior of solids, liquids, and gases Understand the human factors of design, such as ergonomics, kinesiology, anthropometry, and biomimicry Get an overview of available mechanical systems and components for creating your product

Family Life in England and America, 1690-1820, vol 2 Rachel Cope,Amy Harris,Jane Hinckley,2021-11-18 This four-volume collection of primarily newly transcribed manuscript material brings together sources from both sides of the Atlantic and from a wide variety of regional archives. It is the first collection of its kind, allowing comparisons between the development of the family in England and America during a time of significant change. Volume 2: Making Families This volume provides a comprehensive examination of the process of creating a family, as well as some of the issues surrounding family breakdown. Documents are divided into sections covering courtship, marriage, sex and reproduction, childhood and parenthood. Gender roles are clearly defined in the source material, with documents offering specific advice to men and women. This is Volume II.

The Only Way to Eternal Life Chaikou Bah,2006-08 The author--a physician--embarks on a quest for the meaning of life and finds it, unexpectedly, in sunny Bermuda, amidst a troubling world of questionable professional ethics and entrenched discrimination. (Practical Life)

Autobiography and the Psychological Study of Religious Lives ,2008-01-01 This volume positions itself on the cutting edge of two fields in psychology that enjoy rapidly increasing attention: both the study of human lives and some core domains of such lives as religion and spirituality are high on the agenda of current research and teaching. Biographies and autobiographies are being approached in new ways and have become central to the study of human lives as an object of research and a preferred method for obtaining unique data about subjective human experiences. Ever since the beginning of the psychology of religion, autobiographies have also been pointed out as an important source of information about psychic processes involved in religiosity. In this volume, a number of leading theoreticians and researchers from Europe and the USA try to bring them back to this field by drawing on new insights and latest developments in psychological theory.
