**The Political Marketing Revolution** Jennifer Lees-Marshment, 2004-10 This book shows how British politics is being transformed from a leadership-run system to one dictated by public needs and demands. No longer confined to party politics, organizations including the monarchy, the BBC, universities, local councils, charities and the Scottish Parliament are adopting the tools of market intelligence to understand their market needs and demands. The political marketing revolution raises many questions, such as whether the student or patient really does know best and can decide his own education and health care. The book calls for a debate about the movement of the British political system towards a market-orientation and a re-negotiation of the relationship between leaders and the market. While recognizing the need for political leaders to listen, this debate places some responsibilities on the political consumer, looking to create a new relationship that might work more effectively for both sides.

**Digital Media and Reporting Conflict** Daniel Bennett, 2013-07-18 This book explores the impact of new forms of online reporting on the BBC's coverage of war and terrorism. Informed by the views of over 100 BBC staff at all levels of the corporation, Bennett captures journalists' shifting attitudes towards blogs and internet sources used to cover wars and other conflicts. He argues that the BBC's practices and values are fundamentally evolving in response to the challenges of immediate digital publication. Ongoing challenges for journalism in the online media environment are identified: maintaining impartiality in the face of calls for more open personal journalism; ensuring accuracy when the power of the former audience allows news to break at speed; and overcoming the limits of the scale of the BBC's news operation in order to meet the demands to present news as conversation. While the focus of the book is on the BBC's coverage of war and terrorism, the conclusions are more widely relevant to the evolving practice of journalism at traditional media organizations as they grapple with a revolution in publication.

**Guardians of Public Value** Arjen Boin, Lauren A. Fahy, Paul 't Hart, 2020-11-12 This open access book presents case studies of twelve organisations which the public have come to view as institutions. From the BBC to Doctors Without Borders, from the Amsterdam Concertgebouw Orchestra to CERN, this volume examines how some organisations rise to prominence and remain in high public esteem through changing and challenging times. It builds upon the scholarly tradition of institutional scholarship pioneered by Philip Selznick, and highlights common themes in the stories of these highly diverse

organizations; demonstrating how leadership, learning, and luck all play a role in becoming and remaining an institution. This case study format makes this volume ideal for classroom use and practitioners alike. In an era where public institutions are increasingly under threat, this volume offers concrete lessons for contemporary organisation leaders.

**Cultural Policy, Work and Identity** Jonathan Paquette, 2016-05-13 How have cultural policies created new occupations and shaped professions? This book explores an often unacknowledged dimension of cultural policy analysis: the professional identity of cultural agents. It analyses the relationship between cultural policy, identity and professionalism and draws from a variety of cultural policies around the world to provide insights on the identity construction processes that are at play in cultural institutions. This book reappraises the important question of professional identities in cultural policy studies, museum studies and heritage studies. The authors address the relationship between cultural policy, work and identity by focusing on three levels of analysis. The first considers the state, the creativity of the power relationship established in cultural policies and the power which structures the symbolic order of cultural work. The second presents community in the cultural policy process, society and collective action, whether it is through the creation of institutions for arts and heritage profession or through resistance to state cultural policies. The third examines the experience of cultural policy by the professional. It illustrates how cultural policy is both a set of contingencies that shape possibilities for professionals, as much as it is a basis for identification and identity construction. The eleven authors in this unique book draw on their experience as artists and researchers from a range of countries, including France, Canada, United Kingdom, United States, and Sweden.

**Public Media Management for the Twenty-First Century** Michał Głowacki, Lizzie Jackson, 2013-10-15 This book analyzes the challenges facing public service media management in the face of ongoing technological developments and changing audience behaviors. It connects models, strategies, concepts, and managerial theories with emerging approaches to public media practices through an examination of media services (e.g. blogs, social networks, search engines, content aggregators) and the online performance of traditional public media organizations. Contributors identify the most relevant and useful approaches, those likely to encourage creativity, interaction, and the development of innovative content and services, and discuss how such innovation can underpin the continuation or expansion of public service media in the changing mediascape.

*Anglo-American Relations* Alan Dobson, Steve Marsh, 2013-01-17 This book provides an examination of contemporary Anglo-American relations. Sometimes controversially referred to as the Special Relationship, Anglo-American relations constitute arguably the most important bilateral relationship of modern times. However, in recent years, there have been frequent pronouncements that this relationship has lost its 'specialness'. This volume brings together experts from Britain, Europe and North America in a long-overdue examination of contemporary Anglo-American relations that paints a somewhat different picture. The discussion ranges widely, from an analysis of the special relationship of culture and friendship, to an

examination of both traditional (e.g. nuclear relations) and more recent (e.g. environment) policies. Contemporary developments are discussed in the context of longer-term trends and contributing authors draw upon a range of different disciplines, including political science, diplomacy studies, business studies and economics. Coupled with a substantive introduction and conclusion, the result is an insightful and engaging portrayal of the complex Anglo-American relationship. The book will be of great interest to students of US and UK foreign policy, diplomacy and international relations in general.

Citizens of the Whole World Benjamin Balthaser, 2025-07-22 After a tumultuous century, the Jewish radical tradition lives on in the United States. Since October 7, 2023, the world has witnessed a massive American Jewish uprising in support of Palestinian liberation. Through sit-ins in Congress or Grand Central Terminal, through petitions and marches, thousands of Jews have made it known the Israeli state is not acting in their name. This resistance did not come out of nowhere. *Citizens of the Whole World* returns us to its roots in the “red decade” of the 1930s and, from there, traces the history of American Jewish radicals and revolutionaries to the present day. Benjamin Balthaser delves into radical Jewish novels and memoirs, as well as interviews with Jewish revolutionaries, to unearth a buried if nonetheless unbroken continuity between leftist Jewish Americans and the diasporic internationalism of today. Covering more than just the politics of anti-Zionism, *Citizens of the Whole World* explores the Jewish revolutionary traditions of Marxist internationalism, Jewish solidarity with Third World struggles, and relations between Jewish and Black radicals during the Civil Rights era. Balthaser’s book stages an intervention into current anti-Zionist politics, suggesting activists can learn from past struggles to help form a future politics in a world after Zionism.

Important topics in this realm are how IS outsourcing can contribute to innovation, how it can be dynamically governed, how to cope with its increasing complexity through multi-vendor arrangements, how service quality standards can be met, how corporate social responsibility can be upheld and how to cope with increasing demands of internationalization and new sourcing models, such as crowdsourcing and platform-based cooperation. The Routledge Research Companion to Media Geography Paul C. Adams,Jim Craine,2016-03-23 This Companion provides an authoritative source for scholars and students of the nascent field of media geography. While it has deep roots in the

wider discipline, the consolidation of media geography has started only in the past decade, with the creation of media geography's first dedicated journal, *Aether*, as well as the publication of the sub-discipline's first textbook. However, at present there is no other work which provides a comprehensive overview and grounding. By indicating the sub-discipline's evolution and hinting at its future, this volume not only serves to encapsulate what geographers have learned about media but also will help to set the agenda for expanding this type of interdisciplinary exploration. The contributors-leading scholars in this field, including Stuart Aitken, Deborah Dixon, Derek McCormack, Barney Warf, and Matthew Zook-not only review the existing literature within the remit of their chapters, but also articulate arguments about where the future might take media geography scholarship. The volume is not simply a collection of individual offerings, but has afforded an opportunity to exchange ideas about media geography, with contributors making connections between chapters and developing common themes.

A valuable, far-reaching range of theoretical, empirical, reflective, comparative, and archival approaches are brought to bear on translational sites of memory and mnemonic sites of translation through the examination of topics such as traumatic, postcolonial, cultural, literary, and translator memory. This Handbook is key reading for advanced undergraduates, postgraduates and researchers in translation studies, memory studies, and related areas.
